

# Challenges Solved by Bolt360

Outdated systems frustrate guests and overburden operators. Bolt360 delivers smooth, app-free parking that eliminates hardware costs, speeds up entry and exit, and simplifies daily operations.

## Problem

## How Bolt360 Solves It

### Clunky Entry Methods

App downloads, ticket machines, and kiosk delays cause guest frustration and long lines.

### App-Free QR Access

Guests scan to enter and exit — no apps, no tickets, no hardware barriers.

### High Equipment Costs

Gated systems, kiosks, and maintenance drive up capital and operational expenses.

### Zero Hardware Investment

Installs directly on gate arms — no construction or infrastructure upgrades required.

### Limited Payment Flexibility

Slow, confusing payment options reduce conversions and delay exit.

### Instant Mobile Checkout

Guests receive a secure link via text and pay in seconds — no accounts or portals.

### Low Turnover, Lost Revenue

Exit congestion and friction reduce space utilization and cut into peak revenue.

### Faster Exit Flow

Quick scans and automatic payment increase turnover and minimize bottlenecks.

### Lack of Real-Time Visibility

No centralized data on guest behavior, session timing, or revenue trends.

### Live Usage & Revenue Data

Dashboards provide instant insights to optimize flow, staffing, and pricing.
