

Campus Mobility Solutions

Smart Transportation for
Sustainable Campuses

Propark[®]
MOBILITY

Who We Are

Propark Mobility is a leader in delivering integrated campus mobility solutions, specializing in sustainable transportation, advanced parking management, and tailored commuter services.

Comprehensive Approach

We address the full spectrum of parking, commuting, and mobility challenges with integrated, end-to-end solutions.

Our Commitment

We are dedicated to making campus mobility safe, efficient, and sustainable, delivering long-term value and a better commuting experience for students, employees, and visitors.

Data-Driven Insights

We leverage real-time data and advanced analytics to optimize operations and continuously improve efficiency.

Proven Experience

Trusted by leading corporations and campuses nationwide, we deliver reliable, scalable mobility programs.

Sustainability Focus

Our solutions reduce emissions and promote green commuting options to support sustainable environmental practices.

Campus Mobility

Core Services

Our comprehensive campus mobility services enhance transportation efficiency, sustainability, and accessibility through smart planning, tailored solutions, and seamless integration across all transit modes.

Mobility Parking Management

Enhancing campus parking with smart, efficient solutions.

Commuter Transport

Delivers efficient, reliable campus commuting through tailored shuttle solutions.

Micromobility

Sustainable campus transportation options that support the environment.

Workplace Solutions

Improves employee commutes with secure, efficient mobility services.

TDM

Promotes sustainable commuting through shared, flexible mobility solutions.

Mobility Planning

Delivers smart, adaptable mobility strategies for evolving campuses.

Mobility Parking Management

Our comprehensive mobility parking management solutions improve efficiency by leveraging advanced technology, streamlined operations, and data-driven strategies to enhance the parking experience.

Valet Optimization

Increase capacity and enhance user experience with tech-driven valet services.

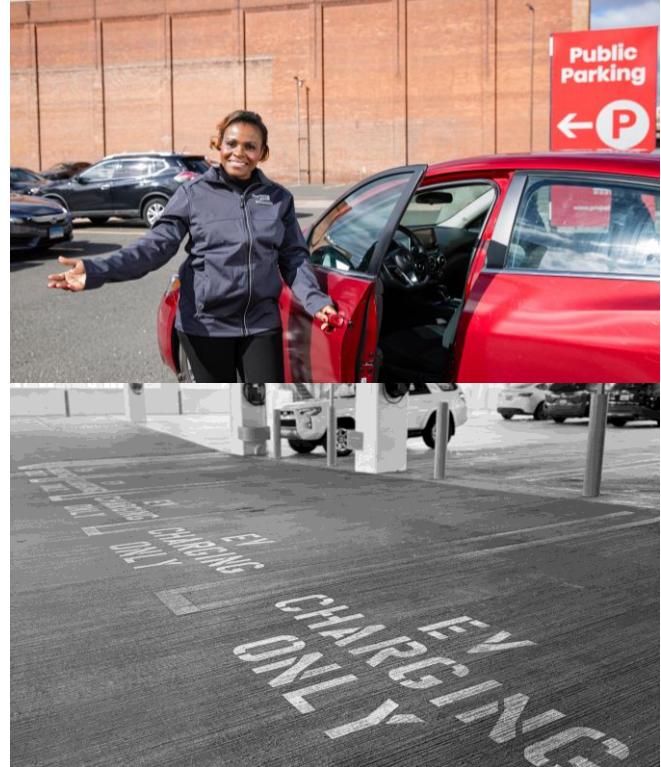

Advanced Access Control

Effectively manage employee and visitor access with cutting-edge technology.

Space Utilization

Accommodate pickups and deliveries with flexible parking configurations.

Parking Enforcement

Ensure proper use with reliable, database-supported tracking solutions.

Electrification

Meet growing demand by integrating EV charging infrastructure seamlessly.

Data Integration

Use analytics to understand parking patterns and make data-driven decisions.

Commuter Transport

Our customized commuter transport solutions streamline daily commutes, enhancing efficiency, reliability, and convenience while providing a seamless experience that simplifies everyday travel.

First and Last Mile Solutions

Seamlessly bridge the gap between public transit stations and pedestrian zones for efficient campus access.

Campus Connector Shuttles

Direct routes efficiently link key campus locations to nearby transit hubs, ensuring smooth commutes for employees.

Expert Drivers

Highly trained professionals provide a smooth, reliable, and enjoyable shuttle experience for all commuters and passengers.

On-Demand Shuttles

Flexible shuttle options are available to meet immediate transport needs for users, offering convenience and reliability.

Custom Shuttle Routes

Routes are tailored based on campus layout and peak commute times to deliver better, more efficient service.

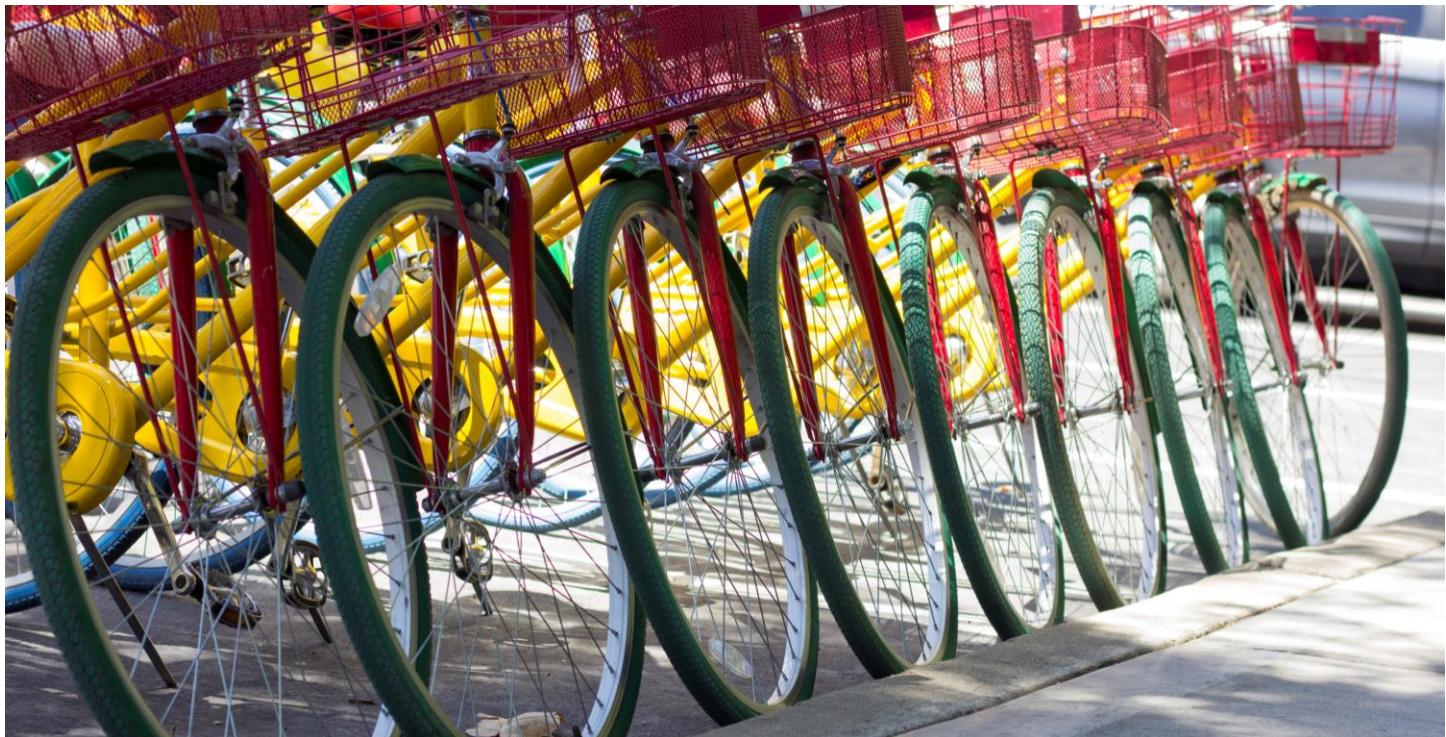

Technology Integration

GPS tracking provides real-time updates to improve operational efficiency and enhance the user experience.

Micromobility

Our micromobility solutions promote eco-friendly, efficient, and healthy transit options for a greener, more connected campus.

E-Bikes and E-Scooters

Reduce car dependency with energy-efficient alternatives for convenient campus travel.

Commuter Bicycle Programs

Encourage eco-conscious commuting with reliable, accessible bike options that meet commuter needs.

Moped Scooters

Ideal for short campus trips, providing a low-emission alternative for efficient travel.

User Management

Simple access through apps, offering user accounts for easy operation and management.

Maintenance and Safety

Regular servicing ensures the safety of users and maintains equipment performance at optimal levels.

System Integration

Seamlessly integrate access and usage monitoring for efficient operations on mobility platforms.

Campus Mobility

Workplace Solutions

Our workplace mobility solutions enhance employee commuting experiences, boosting workplace satisfaction, enhancing operational efficiency, and creating a seamless environment.

Badge Administration

Simplify building access and improve security with seamless integration.

Lobby Ambassadors

Elevate visitor experiences by providing professional, welcoming greetings.

Urban Planning Consulting

Develop efficient, sustainable commuting plans tailored to your needs.

Amenity Programs

Enhance workplaces with wellness services and convenient employee amenities.

Facility Optimization

Integrate mobility solutions to improve operational efficiency and workplace flow.

Safety Assurance

Regular checks and technology updates ensure safe, reliable operations.

Campus Mobility

Transportation Demand Management

Our TDM solutions promote sustainable and efficient commuting habits.

Micromobility Integration

Encourage the use of e-scooters and bikes to reduce reliance on single-occupant vehicles.

Vanpool Services

Facilitate shared commuting options that help reduce parking demand and traffic congestion.

Carpool Programs

Match employees for shared rides, lowering emissions and reducing environmental impact.

MaaS Integration

Provide flexible, multi-modal mobility options that serve as alternatives to car ownership.

Commuter Benefits

Enable employees to utilize non-taxable commuting expenses for transportation.

Commuter Data Analytics

Monitor ridership patterns to optimize routes and improve overall transportation efficiency.

Campus Mobility

Mobility Planning

Our experts design long-term mobility strategies that are adaptable to evolving campus needs, ensuring future-ready solutions that enhance efficiency and sustainability.

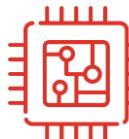

Comprehensive Program Management

Tailored to specific campus requirements.

Collaborative Planning

Engage stakeholders to create integrated solutions.

Technology Integration

Use real-time data to predict demand and enhance services.

Future-Ready Models

Design systems for growth and evolving mobility trends.

Sustainability Focus

Minimize environmental impact through smart planning.

Asset Enhancement

Improve campus value with modern, efficient mobility systems.
