

Customizable Enforcement

# Lightning Pay Enforcement Levels

Choose the level of enforcement that's right for your property. From guest-trusted signage to full-scale monitoring, Lightning Pay adapts to your needs — helping you improve compliance, protect availability, and recover lost revenue.

## Honor System

*No signage. No reminders.*

Guests self-report parking at the front desk, with no signage or enforcement. A simple, low-touch approach that relies on honesty and supports a guest-first experience.

## Lightning Pay

### Level 1

*Prompt to pay, no enforcement.*

Clear, branded signage prompts guests to pay using Lightning Pay. This level relies on visual guidance to encourage compliance, without taking enforcement action.

## Enforcement Lite

### Level 2

*Sticker-based, guest-resolved.*

Attendants place non-adhesive, guest-friendly notices on unpaid vehicles. Guests scan the QR code to resolve the violation instantly on their phone — no app, no confrontation, no mailing.

## Tire Lock Enforcement

### Level 3A – Full Enforcement

*Wheel-mounted enforcement lock.*

Attendants place a tire lock on unpaid vehicles. Guests pay online, self-remove the lock, and continue on their way, reducing confrontation and ensuring compliance in high-control settings.

## Mail-in Enforcement

### Level 3B – Full Enforcement

*License plate scans and mailed citations.*

PRRS scans license plates to confirm payment in real time. Unpaid vehicles receive mailed violations with instructions to pay online, simplifying resolution and dispute support.
