

# Enterprise Technology, Simplified

A consolidated, managed technology program that Propark uses to operate, support, and safeguard your parking operation

## What It Is

The monthly Technology Fee supports the enterprise technology environment behind your operation — without itemizing individual software licenses, monitoring tools, or vendor contracts.

It includes centrally managed access to core platforms such as Microsoft 365, device and endpoint management, identity management, secure backup, and technology governance.

## What the Fee Covers

- Core platform licensing and renewals
- Centralized device and system monitoring
- Identity and access management
- Secure data storage and recovery
- Vendor coordination and system integration
- Ongoing technology oversight and optimization

## Client Benefits

- Simplifies management by reducing vendors, renewals, and system touchpoints
- Predictable monthly cost instead of fragmented or surprise IT expenses
- Scales with operations as locations grow, consolidate, or evolve
- Keeps teams focused on parking performance and guest experience

**An investment that supports reliability, scalability, and modern technology management — so your team can stay focused on performance.**
