

– WHY LEGACY STOPS WORKING

Traditional PARCS* are breaking your operation.

01 Aging equipment

Ticket dispensers and printers fail constantly — driving up R&M and creating queue backups at peak hours.

02 Fragmented vendors

Multiple third-party systems mean no single owner — and nobody on the hook when something breaks.

03 Inflated fees

Recurring licensing, upfront CapEx, and unpredictable service contracts eat into NOI.

04 Poor parker experience

Lost tickets. Long lines. Frustrated guests. Modern parking should feel seamless.
