IMPERIAL FILTRATION

Imperial Systems
quality & service, now in

CARTRIDGE FORM

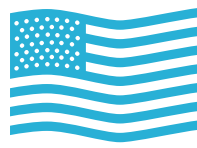

Our goal has always been not just to settle for what works, but to strive for constant improvement and innovation. Imperial Filtration was born out of the necessity for a better quality filter. For years, Imperial Systems has put time and care into making the best dust & fume collectors on earth, and now that same quality is seen in Imperial Filtration's cartridge filters.

While other companies are trying to juggle pool filters, HVAC filters, oil filters and more, Imperial Filtration is specialized in creating the best possible cartridge filter for almost all industrial brands of dust collectors. Experience unmatched customer service, application expertise, and the best construction on the market with Imperial Filtration.

SUPPORT YOU CAN RELY ON

- Technical support and troubleshooting supplied by industry leading experts
- Dependable cross referencing
- Custom designed solutions for troublesome applications
- Private labeling and consignment inventory programs available

BUILT BY HAND IN AMERICA

- Hand built in America
- Faster, reliable lead times
- Thousands of components in stock
- Popular stock filters ship within 24 - 48 hours
- Extensive inventory allows for expedited shipments

HAND CRAFTED ATTENTION TO DETAIL

- Manufacturing team specializing in cartridge filters
- Hand assembled with care
- Built to meet or exceed OEM expectations
- Stringent quality control process in place for raw materials and finished products

THE BEST CONSTRUCTION ON THE MARKET

DURABLE GASKET MATERIAL DESIGNED
TO SEAL IN ANY APPLICATION

TOP ADHESIVE TECHNOLOGY FOR
OPTIMAL FILTER ASSEMBLY

HAND CRAFTED WITH EXTREME
ATTENTION TO DETAIL

MOST ADVANCED FILTER MEDIAS
DESIGNED FOR EFFICIENCY AND
DURABILITY

DESIGNED WITH A DOUBLE HELIX
CORDING FOR INCREASED STRENGTH

HEAVY DUTY STEEL
AND COMPONENTS

UNMATCHED SERVICE & TECHNICAL SUPPORT

Imperial Filtration has made great customer service a part of our culture. Our team consists of fully trained filtration experts ready to provide industry leading assistance.

We know our job continues long after your filters leave our facility. Whether you need troubleshooting assistance, or simply someone to change your filters, our ServiceMAXX team is there to help. Our products come with the peace of mind that you have a team of experts just a phone call away.

MAKE OUR FILTERS YOUR FILTERS

- Private labeling - Custom boxes and labels to keep your brand consistent
- Blind shipping - Discreet shipping options for your protection
- Engineered and built carefully to customer specifications
- Control of brand loyalty - Filters labeled with your name to increase repeat orders

APPLICATION EXPERTISE

Imperial Filtration's focus on cartridge filters is near unprecedented in our industry. While other companies are focusing on pool filters, HVAC filters, oil filters, and more, we are working hard to improve and refine the quality of our dust collector cartridge filters.

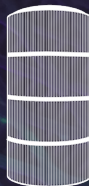

Our ServiceMAXX team can help.

System Inspection & Preventative Maintenance

Our technicians will inspect common wear items. They can also preform preventative maintenance and recommend replacement parts to prevent downtime.

Cartridge and Bag Filter Changeout

Whether you've got a twelve filter cartridge dust collector or hundreds of baghouse filter bags, our team of dust collector experts can keep your equipment running efficiently.

Dye Testing

Leaky filters may lead to ineffective dust collection. Our technicians can conduct a simple dye test to determine if your filters have a leak and need to be replaced.

APPLICATION GUIDE

MEDIA DESCRIPTION	MERV	GENERAL USAGE	MAX TEMP.	TYPICAL APPLICATION
Nanofiber	15	For standard dust applications	180°F	Blasting, carbon black, powder paint, chemical processing, pharmaceuticals
Nanofiber FR	15	For applications where there is a possibility of a spark entering the collector	180°F	Blasting, carbon black, powder paint, chemical processing, pharmaceuticals
Nanofiber Open Pleat Spacing	15	For applications with large or irregularly shaped particles	180°F	Composite grinding, fiberglass processing, grain handling, paper, tobacco, wood
Nanofiber FR Open Pleat Spacing	15	For applications with a spark or large or irregularly shaped particles	180°F	Blasting, carbon black, powder paint, chemical processing, pharmaceuticals
Cellulose/Polyester Blend	10	For standard dust applications	180°F	Blasting, carbon black, powder paint, chemical processing, pharmaceuticals
Cellulose/Polyester Blend FR	10	For applications where there is a possibility of a spark entering the collector	180°F	Blasting, carbon black, powder paint, chemical processing, pharmaceuticals
Cellulose/Polyester Blend with Open Pleat Spacing	10	For applications with large or irregularly shaped particles	180°F	Composite grinding, wood, paper
100% Synthetic Polyester/Fiberglass Blend	12	For applications where moisture can enter the air stream	275°F	Coffee, salt, sugar, cocoa, detergents, stearates
100% Polyester Spunbond	11	For applications where coarse particles and aggressive cleaning cycles needed	275°F	Powder coating, cardboard, cement, paper, coffee, polishing
100% Polyester Spunbond with hydro/oleophobic treatment	11	For applications where high humidity and oil can enter the air stream	275°F	Metal grinding, textiles, tobacco
100% Polyester Spunbond with PTFE Membrane	16	For applications demanding high efficiency or 100% reclaim characteristics	275°F	Food, pharmaceutical, pesticide, lead, agglomerating material
Cellulose/Polyester Blend with PTFE Membrane	16	For applications demanding high efficiency or 100% reclaim characteristics	160°F	Food, pharmaceutical, pesticide, lead, plastic processing

Not sure what kind of media you need? Our team would be happy to assist you further.
