

# FIXTURES APPLICATION GUIDE

## Palm Trees & Flag Poles

Narrow beam uplights track the full vertical height of palms and flag poles from base to tip. Position 1-2 ft from the base and aim toward the crown or top for dramatic silhouetting against the night sky. Best suited for specimens 30 ft and taller.

## Recommended fixtures

BU117BZ

BU1412BZ

## Wide Canopy Trees

Large spreading canopies require a wide flood angle to wash the full crown evenly. Space multiple fixtures around the drip line for balanced, shadow-free coverage. Recommended for trees 20 ft and above.

## Recommended fixtures

BUR101BZ

## Mid-Size Tree

A standard flood angle provides even, balanced uplighting for mid-height trees with moderate canopy spread. Position slightly off-center to reveal natural branch structure. Ideal for trees up to 20 ft tall.

## Recommended fixtures

BU115BZ

BU117BZ

## Accent Shrubs, Tall Grasses & Stone Features

Low-profile uplights and wall-wash fixtures graze compact plantings, ornamental grasses, and natural stone with soft directional light. Keep the stake fully buried for a clean, unobtrusive installation. Works best on plantings up to 10 ft.

## Recommended fixtures

BU115BZ

BU132BZ

BUR106BZ

## Hedges & Privacy Screening

Wall-wash fixtures spaced evenly along a hedge line deliver consistent, uniform coverage across the full length. Ideal for defining property edges and creating a strong green wall effect after dark. Designed for hedges up to 6 ft tall.

### Water Features

Submersible fixtures placed below the waterline and aimed upward through the spray create dramatic illumination from within fountains, ponds, and water bowls. Run on a dedicated transformer zone for independent control.

### Recommended fixtures

BSU110NB

### Walkways & Ground Cover

Path lights define safe passage and add decorative accents along walkways and garden beds. Space evenly for overlapping pools of light without the harsh "runway" effect. Multiple fixtures are recommended for longer runs to maintain consistent coverage throughout.

### Recommended fixtures

BP118BZ

BLH105BZ

### Staircases

Step and hardscape lights integrated at the riser or side of each tread provide safety lighting on elevation changes while adding a polished architectural detail. Note that both the BH1033BZ and BST105BZ are compatible with this application and can be used depending on the stair construction and finish preference.

### Recommended fixtures

BST105BZ

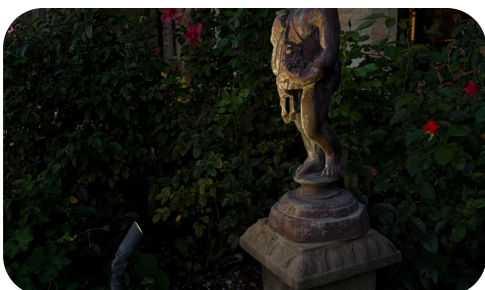

### Pergolas & Gazebos

Downlights mounted to pergola beams or overhead structure cast soft, even light downward over outdoor living and dining areas — mimicking natural moonlight without harsh glare. The ACD215ABZ is a modern aluminum option well suited for contemporary pergola and gazebo designs.

### Recommended fixtures

ACD215ABZ

### Pillars, Columns & Statues

A focused uplight aimed from the base grazes the vertical surface of columns, pillars, and statuary — revealing texture and creating strong architectural presence at night.
