

## Senior Project Manager – Railway Automation & Smart Mobility

Railway Technologies | CBTC, ATO, C-DAS | Join the ELLEON Collective

*Are you passionate about engineering systems that move the world? At **ELLEON**, we are expanding our team with **Senior project Managers** ready to lead the modernization of next-generation railway vehicles.*

*If you're excited about cutting-edge technologies, cross-disciplinary collaboration, and contributing to the transformation of sustainable mobility — we want you with us!*

### Why Join ELLEON?

At **ELLEON**, we are building more than engineering solutions — we are creating a collective of experts shaping the **future of smart mobility**. Our engineers, consultants, and project leaders collaborate across Switzerland's most advanced technology environments

As part of **The Elleon Collective**, you'll work in a community where engineering talent drives the future of mobility.

By joining us, you gain access to:

- High-impact projects in mobility and digital transformation
- A strong community of engineering professionals
- Certified leadership coaching & continuous development
- Flexible career models and a commitment to work-life balance

### Your Role

As a **Senior Project Manager** at **ELLEON**, you will lead strategic and complex railway automation projects, from initial planning through execution. You will manage key customer relationships, oversee budgets and schedules, and coordinate cross-functional teams to deliver innovative, safe, and efficient solutions.

### Your Key Responsibilities

- Lead the delivery of complex railway automation projects (CBTC, ATO, C-DAS, Collision Warning Systems)
- Ensure projects are completed on time, within budget, and in compliance with contracts
- Act as the main point of contact for customers, suppliers, partners, and authorities
- Coordinate interdisciplinary teams across the entire value chain
- Represent project progress and strategy to senior management
- Develop innovative solutions with your team to meet technical and non-technical customer needs

## Who You Are

- Passionate about delivering innovative railway automation solutions
- Several years of experience managing customer projects, ideally in signaling or related railway sectors
- Familiar with current trends in railway automation technologies
- Strong communicator in both German and English (C1 level, written and spoken)

## What We Offer

- 💡 Part of The Elleon Collective – Connect with top engineers building the future of mobility.
- 🚀 Personal & Career Growth – Access leadership programs and technical upskilling.
- 👤 Women in Engineering and Family Friendly Initiatives – Supporting diverse career paths with flexible models.
- 📖 Continuous Learning – Annual budget for certifications and further education.
- 🏡 Well-being & Benefits – Occupational pension plans, wellness support, and more.

## Join Us & Build the Future

We are hiring now!

If you are an ambitious **Senior Project Manager** ready to drive transformation in the railway industry and grow within an inspiring engineering community — **ELLEON** is for you.

📄 Apply today! Applications are reviewed on a rolling basis.

At **ELLEON**, we celebrate diversity and believe in equal opportunities for all. We encourage candidates from all backgrounds to apply.
