

## Project Manager – Energy - Lead Innovation with ELLEON

Energy Transition | Capital Goods | Join the ELLEON Collective

*Are you a passionate **Project Manager** who thrives on delivering impactful solutions in high-stakes industries? At ELLEON, we are looking for experienced Project Managers to lead complex projects in the energy and industrial sectors, working at the forefront of innovation to reduce carbon emissions and drive sustainability.*

*If you are excited about shaping the future through leadership, collaboration, and excellence — we would love to meet you!*

### Why Join ELLEON?

At **ELLEON**, we are building a collective of industry-leading experts who believe in pushing boundaries. We empower our teams to own projects end-to-end, fostering a culture of trust, innovation, and personal development.

As part of **The Elleon Collective**, you will work on transformative projects with prestigious clients, access exclusive leadership coaching, and be part of a vibrant community where your career is truly valued.

### Your Role

As a **Project Manager** at **ELLEON**, you will lead multidisciplinary project teams within a global matrix organization. You will oversee all key project phases — from handover to delivery — ensuring scope, timeline, quality, and budget objectives are successfully met.

### Your Key Responsibilities

- Lead project execution in accordance with Project Lifecycle Management process.
- Act as the main customer contact for all project-related matters.
- Ensure the delivery of contractual scope on time, within budget, and meeting quality standards.
- Prepare and manage project risk assessments and mitigation plans.
- Coordinate and expedite activities with key sub-vendors and suppliers.
- Track and achieve project KPIs across schedule, quality, cost, and customer satisfaction.
- Prepare and present regular project status reports to internal and external stakeholders.
- Manage project resources effectively, ensuring optimal use of capacities and priorities.

- Maintain up-to-date project controlling documents, such as financials and technical specifications.

## Who You Are

- Several years of experience managing major capital goods projects, preferably in rotating equipment/turbomachinery or process industries.
- BSc/MSc degree in Mechanical, Chemical, Process, or Plant Engineering, or equivalent practical experience with formal training.
- Proficiency in SAP, MS Project, and other project management tools.
- Experience with workshop and site activities in mechanical engineering or related industries.
- Proven customer-facing experience with strong stakeholder communication skills at all levels.
- Fluent in German and English; additional languages are a plus.
- Strong intercultural understanding and experience in international environments.
- Formal Project Management certification (e.g., PMP, IPMA) is an advantage.
- Ability to build a professional network within local and international organizations.

## What We Offer

- 💡 Part of The Elleon Collective – Collaborate with a selective network of industry leaders.
- 🚀 Personal & Career Growth – Access leadership development programs and technical certifications.
- 👤 Women in Engineering and Family Friendly Initiatives – Flexible work models to support your ambitions.
- 📚 Continuous Learning – Annual budget for trainings and skill enhancement.
- 🏆 Well-being & Benefits – Occupational pension schemes, wellness programs, and more.

## Join Us & Make an Impact

We are hiring now!

If you are an **experienced Project Manager** ready to make an impact, lead change, and grow within a thriving engineering collective, **ELLEON** is the place for you.

📄 Apply today! We review applications continuously.

At **ELLEON**, we celebrate diversity and believe in equal opportunities for all. We encourage candidates from all backgrounds to apply.
