

Electronics Engineer

Space | Join #The ELLEON Collective

Why Join ELLEON?

At **ELLEON**, we don't just consult, **we co-create** the future of industry. You'll join a community of forward-thinking engineers working on Switzerland's most exciting Aerospace projects. We combine deep technical expertise with human-centric leadership and a strong collective spirit !

By joining us, you'll gain access to:

- ✔ **International projects** with leading aerospace providers in Europe
- ✔ A **collaborative environment** focused on growth & innovation
- ✔ Opportunities to develop **leadership & technical expertise**
- ✔ A workplace that values **flexibility** and **well-being**

Your Role

As an **Electronics Engineer** you will contribute to the design, development, and verification of high-reliability electronic equipment, covering the full lifecycle from requirements definition to integration and testing.

Your Key Responsibilities

- **Requirements definition** at electronics board level
- **Perform electronics architecture and detailed design**
- Support PCB / CCA development activities
- **Verification of electrical circuits** by review, analysis and simulation
- Define and support test equipment
- Participate in prototype, qualification, and acceptance testing
- Assembly, Integration and **Testing (AIT) support**
- **Establish and maintain engineering plans** and activities schedules
- **Coordination** of a small team of development engineers

Who You Are

- 5+ years' experience in space industry or avionics industry or defense industry
- Master degree in electrical or electronic engineering
- Experience in Architecture definition at electronics board level
- Experience in motors and actuators driver electronics development
- Solid knowledge of EMC design and robustness principles
- Familiarity of Matlab/Simulink, Python or similar
- Experience with Requirements Management in DOORS
- Experience with RF design
- Ability to communicate fluently in both spoken and written English
- Pronounced self-motivation and commitment in connection with a strong sense of responsibility and reliability
- Pronounced communication skills and proven experience in working in international environment

What We Offer

We believe great work happens when people feel trusted, inspired, and empowered !

💡 Be Part of **the ELLEON Collective** – Work alongside a **selective network of engineers** shaping the future

📈 **Career Boost** – Access to certified coaching, negotiation skills, and leadership journeys

👨👩 **Flexibility & Family Initiatives** – Part-time and co-sharing models available to support your lifestyle

📖 **Learning Culture** – Personalized budget for upskilling & certifications

🧑‍🤝 **Well-being & Benefits** – Pension & insurance coverage, well-being perks, and community-driven events

It's Your Move – Let's Build Tomorrow Together!

We're hiring now! If you're passionate about mechanical design, **ready to make an impact**, and **eager to grow** your career within a strong engineering community, **ELLEON** is your next step.

Apply today – We review applications continuously.

At **ELLEON**, we celebrate diversity, curiosity, and courage. We encourage candidates from all backgrounds to apply.
