

Vista Del Mar Child & Family Services

PROVIDER TYPE: Community-based nonprofit organization in Los Angeles

Vista del Mar added the CalAIM Enhanced Care Management service through Full Circle Health Network to further integrate its service delivery to vulnerable children and families.

At A Glance

- Vista Del Mar supports children and families across Los Angeles through mental health, residential treatment, foster care, adoption, special education, autism services, and family support.
- We operate from our West LA campus and serve seven LA County SPAs.
- Our Enhanced Care Management (ECM) program began in 2025 and now supports about 80 — and growing — ECM clients as part of our integrated care model.

ECM allows us to advocate for our clients' care and collaborate closely with all members of their multidisciplinary team, including primary care providers and mental health clinicians.

Securing housing through community supports remains a challenge, but we continue to ensure clients receive coordinated, person-centered care and access to essential services.

Autumn Breck
Contract Administrator

Vista Del Mar Child & Family Services

The Challenge

Getting started with new staff, new workflows and engaging clients. Vista began with existing part-time staff serving existing clients to refine workflows and build a strong foundation.

Working with Full Circle

Full Circle provided infrastructure, managed care expertise, and hands-on guidance in navigating ECM's administrative requirements, allowing Vista to focus on program quality and staff development while Full Circle supported operational and contracting processes.

Ongoing training, technical guidance, and responsive support from Full Circle were essential in streamlining workflows and maintaining compliance.

Future Vision

ECM has strengthened internal collaboration, improved staff development, and deepened partnerships with managed care plans.

Vista plans to expand ECM services, enhancing data-driven outcomes, further integrating Community Supports, and continuing to build a sustainable, holistic model of care across Los Angeles County.
