Musée Maillol

HIGHLIGHTS OF THE MONTH

Paris offers so much to do in July, especially on the 14th, which is going to be massive this year, with no fewer than 1,000 drones lighting up the sky during the fireworks - a world record! This year's festivities will pay tribute to the friendship between France and Brazil, with a completely new musical and visual show featuring French and international artists. Three major themes will enliven the evening: the Paris Agreement, the Seine in the spotlight, and Solidarity. In the same vein, the Musée des Arts Décoratifs will unveil its exhibit "La mode est une fête", so if you find yourself strolling around the Louvre, just take advantage of it, and maybe have a look at the Olympic Flame in the Jardins des Tuileries (no reservation needed). Eventually, remember that the Sales will be on until the 22nd in the entire city.
