EHS compliance software

Professional platform for EHS compliance management

Trusted by 500+ companies worldwide

The challenge

Managing legal compliance across multiple countries is time-consuming and risky. Tracking thousands of regulatory changes, understanding what's relevant, maintaining an audit trail, and ensuring accountability, all without the right tools puts enormous pressure on compliance teams.

Manual systems like spreadsheets increase the chance of:

- Missed updates and outdated registers
- Disconnected tasks and unclear responsibilities
- Delayed audits and incomplete records
- High administrative workload and stress

The solution? A centralized platform that delivers automation, collaboration, and control.

How our software revolutionizes legal compliance

- ✓ **Global legal register, powered by 6000+ experts**
Access expert-maintained legal content across 150+ countries, with full legislative text and clear, actionable summaries in each site's local language.
- ✓ **Company-specific compliance filtering**
Track only the laws relevant to your industry, geography, and activities. Your register is built around your real risks and obligations.
- ✓ **Actionable content, not legal text**
We show you the implications of every requirement and what you need to do

A Trusted Compliance Software Solution

Built by compliance experts to simplify and professionalise EHS legal compliance, from daily tracking to audit preparation.

Continuously updated legal content

Local experts deliver structured, understandable summaries, so your team doesn't need to dig through raw legislation.

Global compliance, localized

Central oversight with site-specific profiles and language support; one platform, multiple countries.

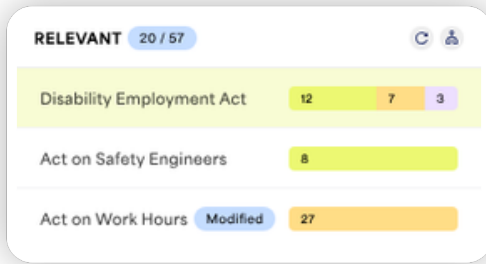

Collaborative & secure

Multi-user access with clear roles and permissions, enabling seamless collaboration across teams and external consultants.

denxpert EHS Compliance Software Functions

Standardise, simplify, and ensure your compliance process is consistent across countries and departments.

Smart Legal Register

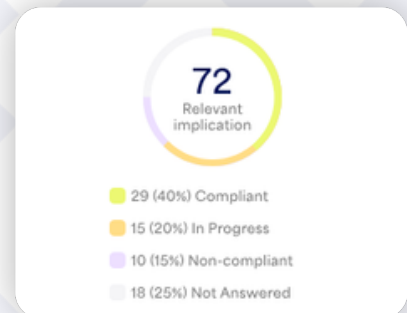

Your multi-country legal obligations, simplified

A tailored legal register built around your business profile, filtered by location, industry, and activity. Continuously updated by local experts, available in the local language, and presented as clear summaries rather than raw legal text. Whether operating in one country or ten, you'll always see what's relevant, with expert-reviewed updates you can trust.

Real-Time Dashboards & Reporting

Visibility and insights at a glance

Monitor compliance status across all sites in real time. Build visually impactful reports and charts with Power BI integration, perfect for EHS leaders and stakeholders who need clear, actionable insights.
