LNG Facilities &
Main Areas 04

05 LNG Performance

AGENDA

WELCOME & OPENING

Acting CEO of KIPIC

Mrs. Wadha A .Al-Khateeb
Acting Chief Executive Officer

KIPIC
البتروولية المتكاملة

Kuwait Integrated Petroleum Industries Company (KIPIC) was founded on October 18, 2016. It is the first integrated Kuwaiti national company that specializes in the downstream industry and is affiliated with Kuwait Petroleum Corporation.

Permanent Liquefied Natural Gas Import Terminal: LNGI is located approximately 90 Kilometers south of Kuwait City, adjacent to the Al-Zour North Power Plant.

Due to the safety requirements the LNG storage and process areas are built on an offshore reclaimed island.

KIPIC MANDATE, VISION , MISSION , AND VALUES

Mandate

"Manage refinery and LNG import operations in the Al-Zour Complex"

Vision

"To be a leader in integrated refining and LNG supply that maximizes shareholder value, achieves operational excellence, unlocks the potential of our people and cares for the community"

Mission

"To manufacture refined petroleum and supply LNG in a reliable, efficient, safe and environmentally responsible manner to meet Kuwait's energy demand, maximize profit through integration, develop a professional and competent workforce, and enable the development of the local economy"

Values

Integrity

Innovation

Partnership

Pride

Caring for people

One Team

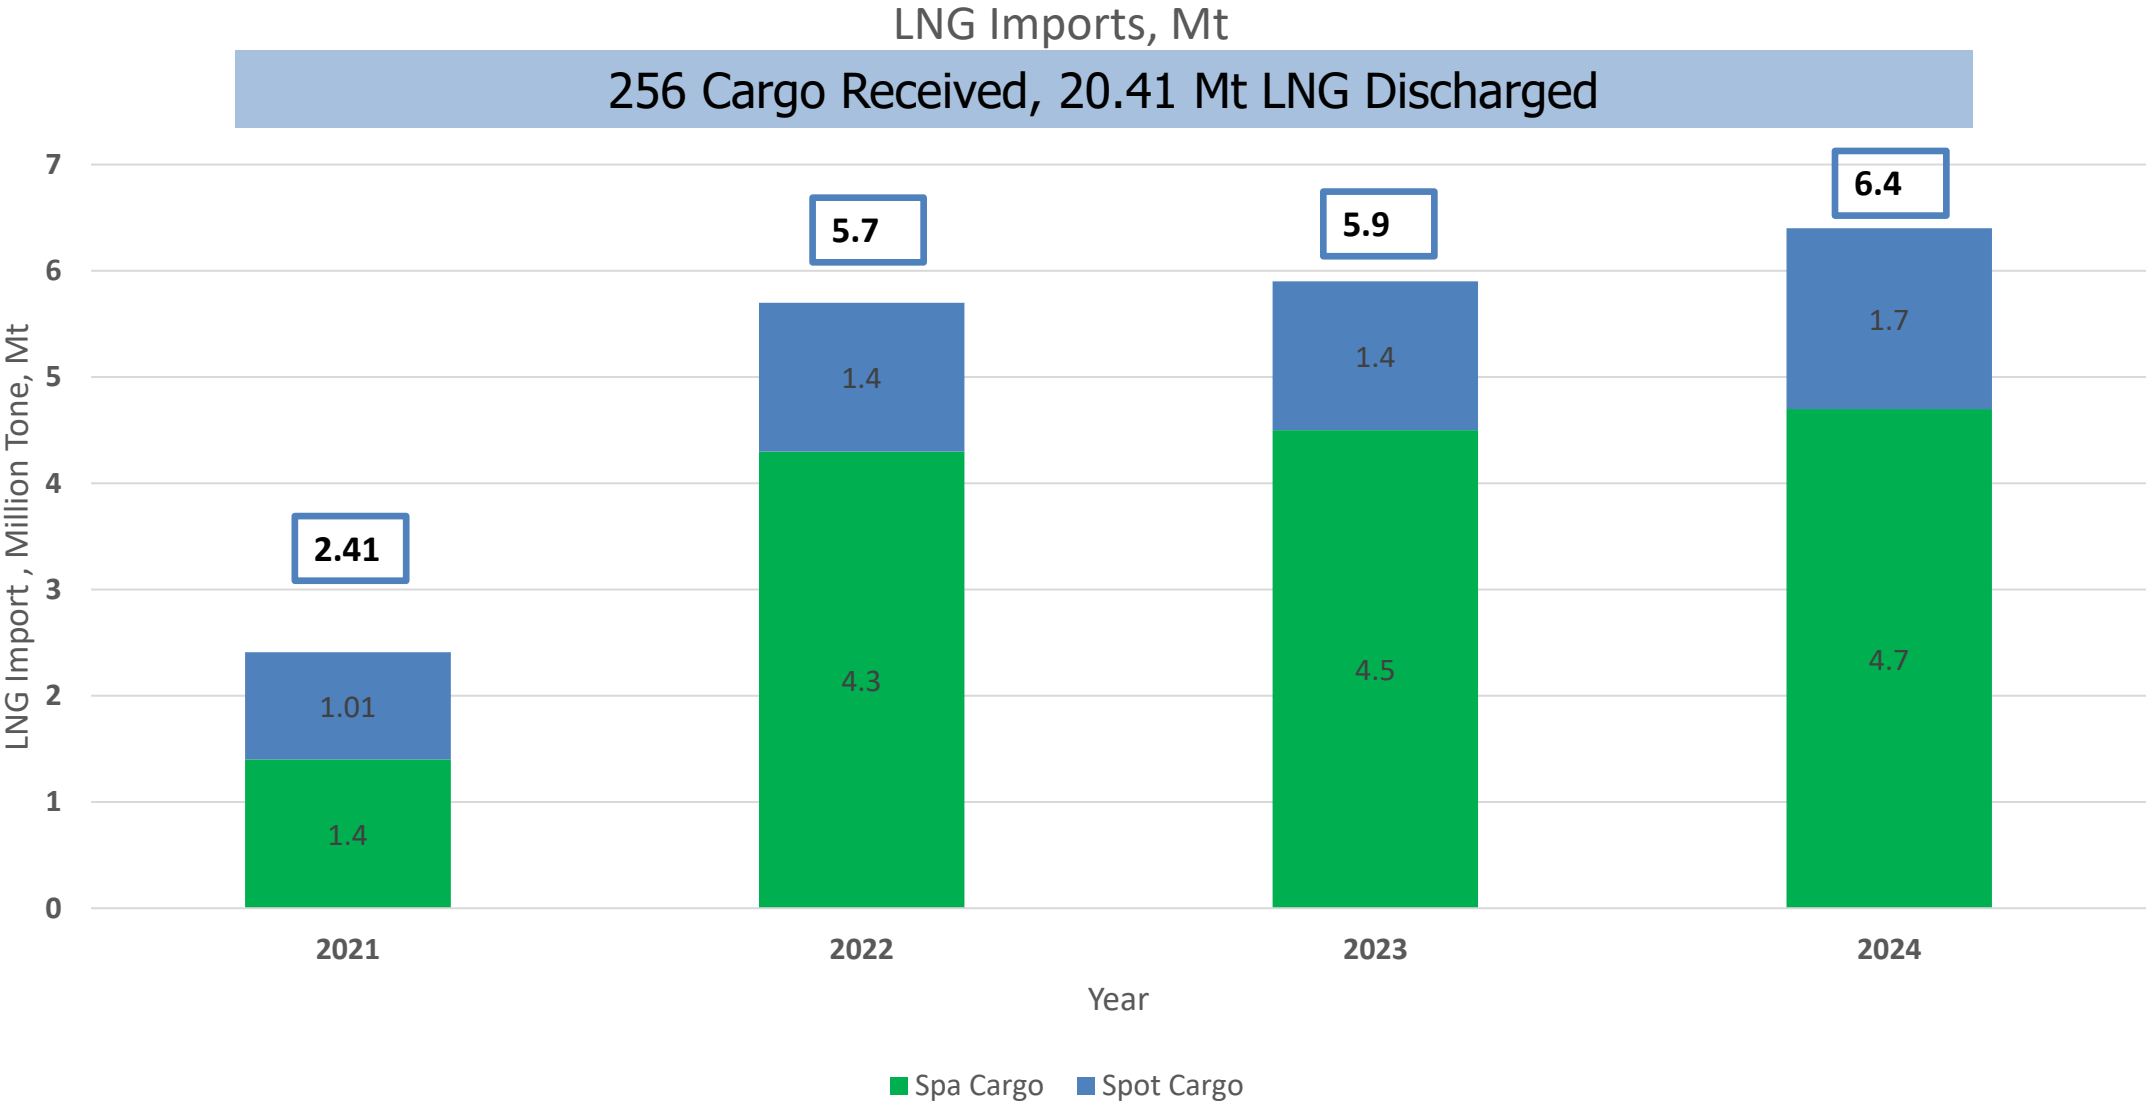

Commitment for HSSE

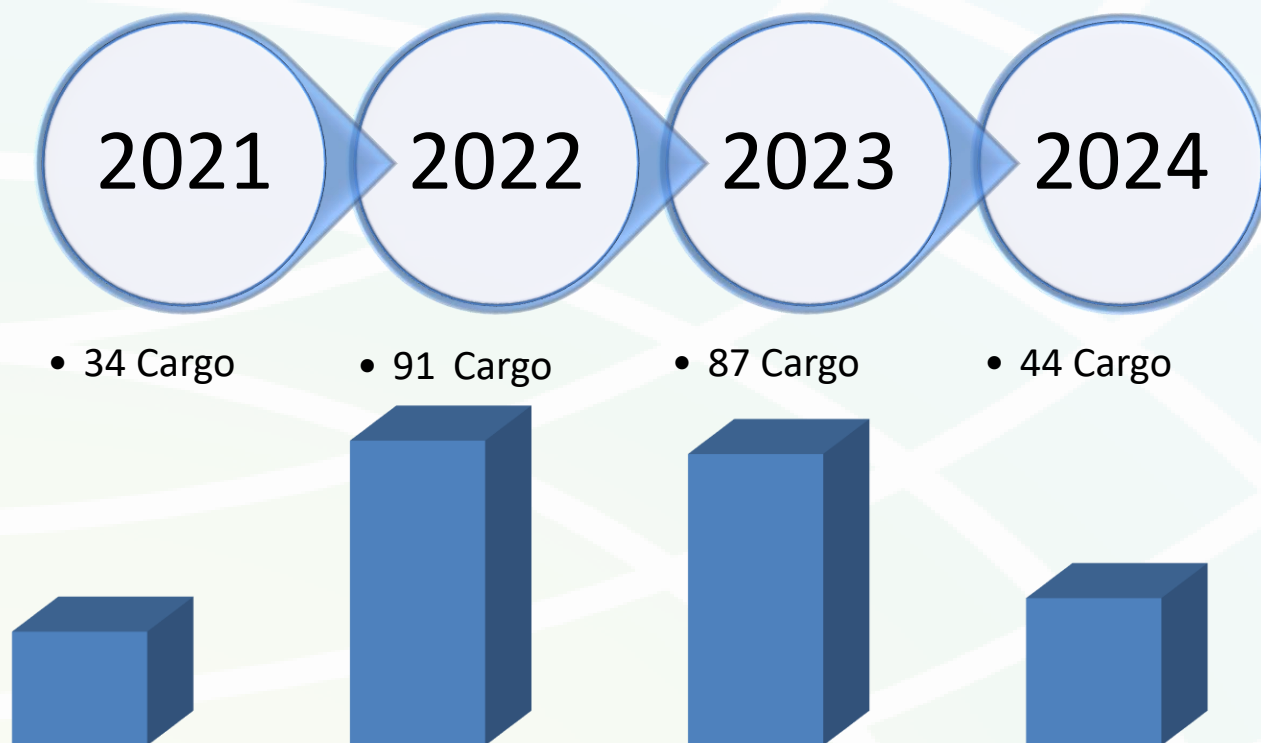

Excellence

LNG IMPORT

Ship Visited at Al Zour LNGI Terminal

The Record of LNG Import For The Year 2023

- **Total 5.9 Mt LNG Imported , 87 Cargo Received**

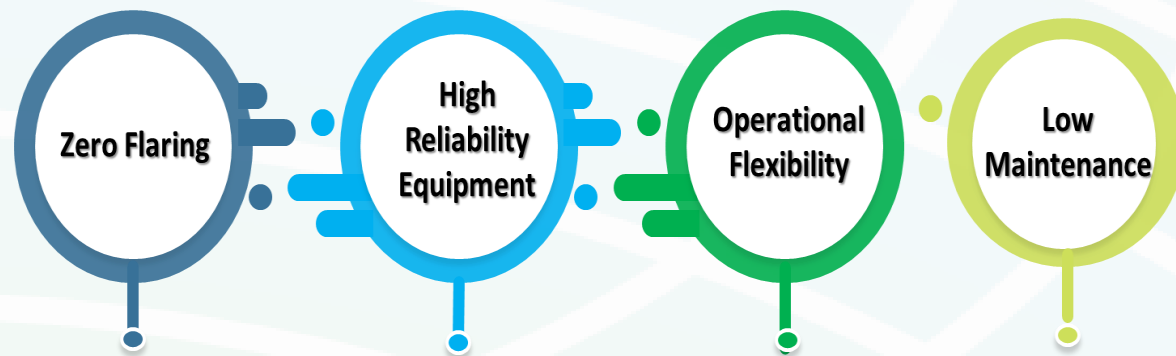

Summer (April to Oct)

- Spot - 1.12Mt
- Spa - 3.65 Mt

Winter (Nov to March)

- Spot-0.275 Mt
- Spa- 0.885 Mt

AL ZOUR LNGI FACILITIES

Maximum capacity of carriers on each Jetty: 266,000 m ³	
Total Storage Capacity: 8x225,500 m ³	
12-days autonomy for Maximum send-out	
Send-out Capacity : 3000 BBTU/day	

PLOT PLAN

Approximate Dimensions

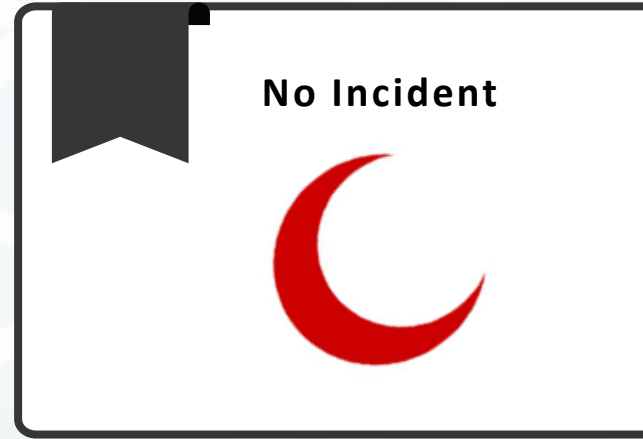

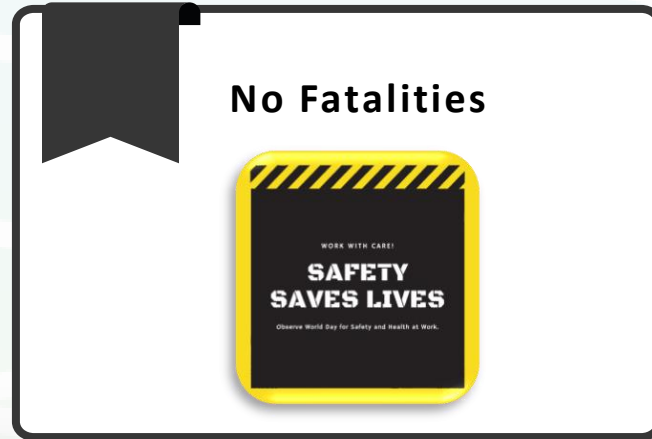

- Overall Length – 2500 m
- Overall Width – 1000 m
- SW Intake Pipeline Length – 1750 m
- SW Outfall Pipeline Length – 350 m

AL ZOUR LNGI PERFORMANCE

- **HSSE Commitment**

- **Up to the June of 2024**

- **Development and Improvement**

- A major development In the LNGI terminal that cut cost of production and reduced the Co2 emissions more than 8,000 Metric Tons per year through utilizing nitrogen instead of natural gas in the flare.

Thank you
