

Commercial Study Group

INTERNATIONAL GROUP
OF LIQUEFIED NATURAL GAS IMPORTERS

What have we been up to since Hiroshima?

3 Separate workstreams launched

Decarbonization pathways

- Knowledge sharing sessions held to date (40-50pax):
 - January: How bio-LNG can be setup in European terminals (presented by GATE/Edison).
 - March: LNG Terminals and CCS initiatives in France (presented by Elengy/Dunkerque LNG).

New Gases Study

- January: Meeting held to gather feedback on the study provided by Guidehouse and review assumptions and parameters (20pax).

EU Methane Emission Regulation

- February: Presentation from Eurogas and MiQ. Well attended (40 pax).

What we plan to do going forward:

3 Separate workstreams launched

Decarbonization pathways

- Knowledge sharing sessions held to date (40-50pax):
 - January: How bio-LNG can be setup in European terminals (presented by GATE/Edison).
 - March: LNG Terminals and CCS initiatives in France (presented by Elengy/Dunkerque LNG).
- 3 more sessions planned later this year (E-methane, LCA on GHG emission, GHG Offset).

New Gases Study

- January: Meeting held to gather feedback on the study provided by Guidehouse and review assumptions and parameters (20pax).
- Benchmark with other studies.
- Update key parameters.
- Study on current regulation (Europe).
- Enlarge geographical scope.

EU Methane Emission Regulation

- February: Presentation from Eurogas and MiQ. Well attended (40 pax).
- Adapt GIIGNL GHG MRV Framework to ease the reporting required by EUMER.
- Define a GIIGNL Questionnaire / to be included in the GIIGNL GHG MRV Framework.

Upcoming F2F joint CSG/TSG meetings

We would like to thank the members who have volunteered to host the meetings.

2025	2026
5 – 7 May 2025 – Izmir, Turkey 	Dates / Location – TBC 
29 Sep – 1 Oct 2025 – Osaka, Japan 	Looking for volunteers
