

# Attributes™

## Trace and monetize your ESG data

**LNG qualities tracking solutions**

July 2025

---

The information contained in this document is confidential, privileged, and intended solely for the use of the intended recipient. It may not be used, published, or redistributed without the prior written consent of ATTRIBUTES SAS.

A trusted partner to **transition to differentiated natural gas markets.**

A **blockchain-based registry solution** that allows a secure tracking of ESG energy-related data from producers to end-users.

**Expert guidance** and **open framework web platform** for new gas supply solutions.

**Backed by 2  
strategic/commercial partners  
and 2 financial investors**

# Specialized in ESG traceability solutions

A flexible approach with a wide range of solutions

Attributes™

**Natural Gas**

**LNG**

**Green power**

**Hydrogen**

~70 TWh

**Track record of ~70 TWh of  
differentiated energy volumes**  
across EU and US markets managed  
on our live solutions.

# An Open Framework web platform suitable for different LNG trading business cases

---

**Track and Verify alignment with  
your internal sustainability  
commitments**

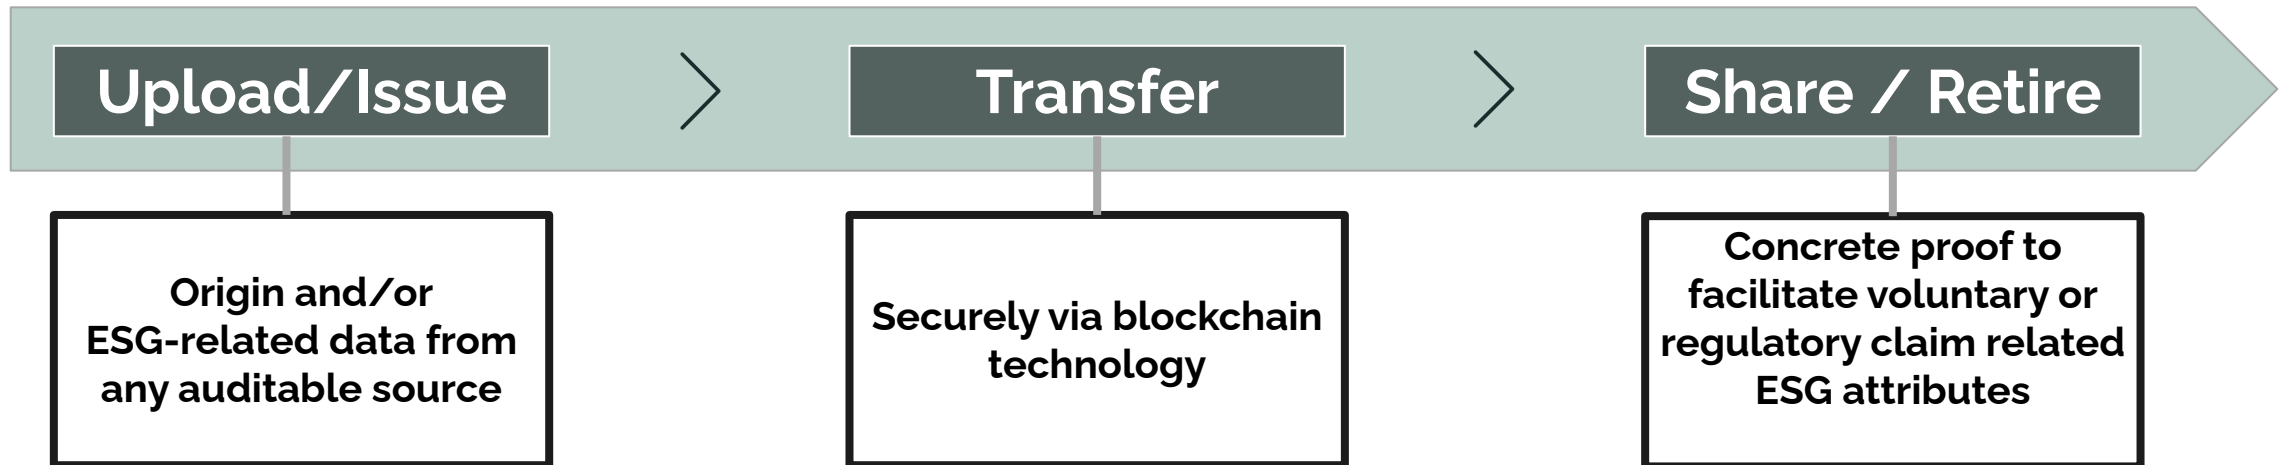

**Support regulatory  
compliance and reduce  
risk in your long-term  
LNG contracts**

**Differentiate your energy  
offering with verifiable  
low-carbon value and  
unlock premium pricing  
opportunities**

# Registry Key Principles for LNG ESG data tracking

---

# Source agnostic data at every stage

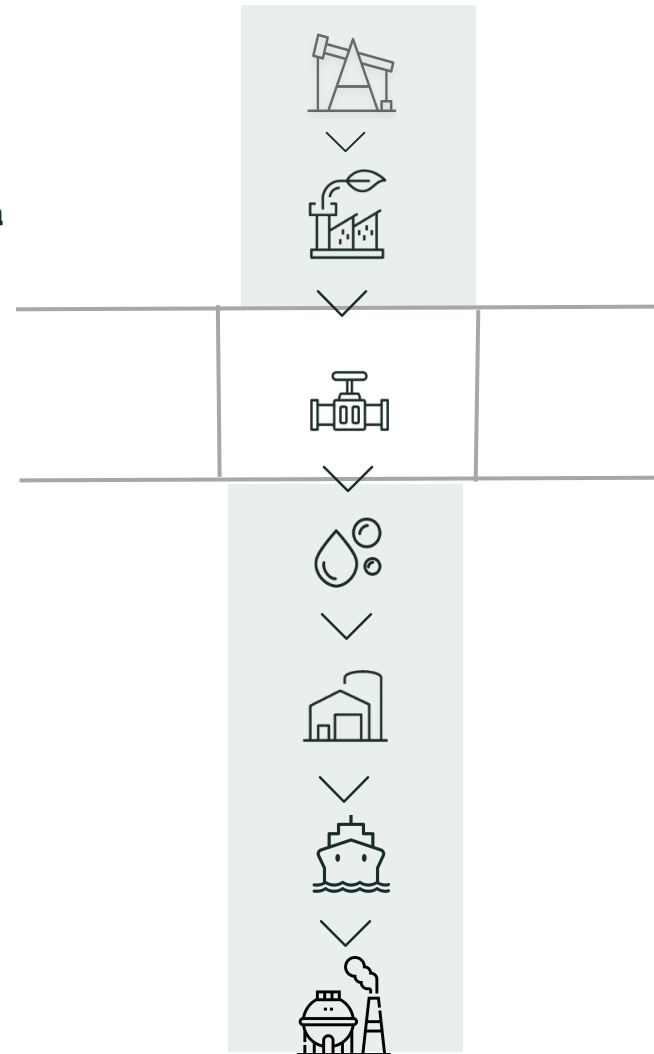

## Operator proprietary data

**Manual or automated upload of data and evidence documents**

Typical proprietary data sources:

- ❑ OGMP 2.0 Emissions Reports
- ❑ ESG certificates (Trustwell...)
- ❑ Audit & verification reports
- ❑ Bill of lading
- ❑ Discharge report

**Selected framework  
(eg. GIIGNL)**

## Default data

**Default values acquisition system  
from available data sources\*:**

Typical public / commercial data sources

- ❑ Government agencies (eg EPA, Thetis MRV..)
- ❑ Research publications
- ❑ Databases (eg Ecolnvent)
- ❑ Public sources

\*List of accepted sources to be validated with GIIGNL upon discussion

# ATTRIBUTES™ LNG value chain dashboard

## LNG Cargo GHG Dashboard for [Demo] G2-LNG US1

Monitor lifecycle greenhouse gas emissions from LNG cargo journeys.

## Emission Summary

Unloaded quantity (MMBtu)

**3,646,590**

Total (tCO<sub>2</sub>eq)

**23,739**

GHG Intensity (kgCO<sub>2</sub>e/MMBtu)

**13.5**

Offset (tCO<sub>2</sub>eq)

**23,000**

Methane Intensity (%)

**0.34**

Compliance

GIIGNL Framework

Verified by MyAuditor

# Aggregated emissions view

Detailed emissions  
view :  
from **various data  
sources** and  
**validation schemes**

### Production

MyProducer, Permian Basin, TX, USA

CH<sub>4</sub> intensity %: 0.03 %

CO<sub>2</sub>eq intensity: 0.45 kgCO<sub>2</sub>/MMBtu

✓ Trustwell

CH<sub>4</sub> intensity: 0.41 kgCO<sub>2</sub>eq/MMBtu

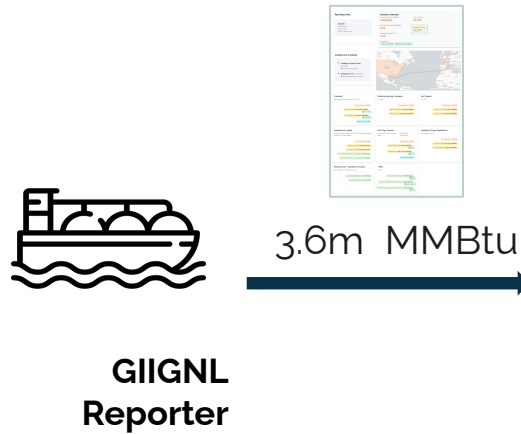

✓ Trustwell

Primary data: >75 %

# ATTRIBUTES™ generic Workflow

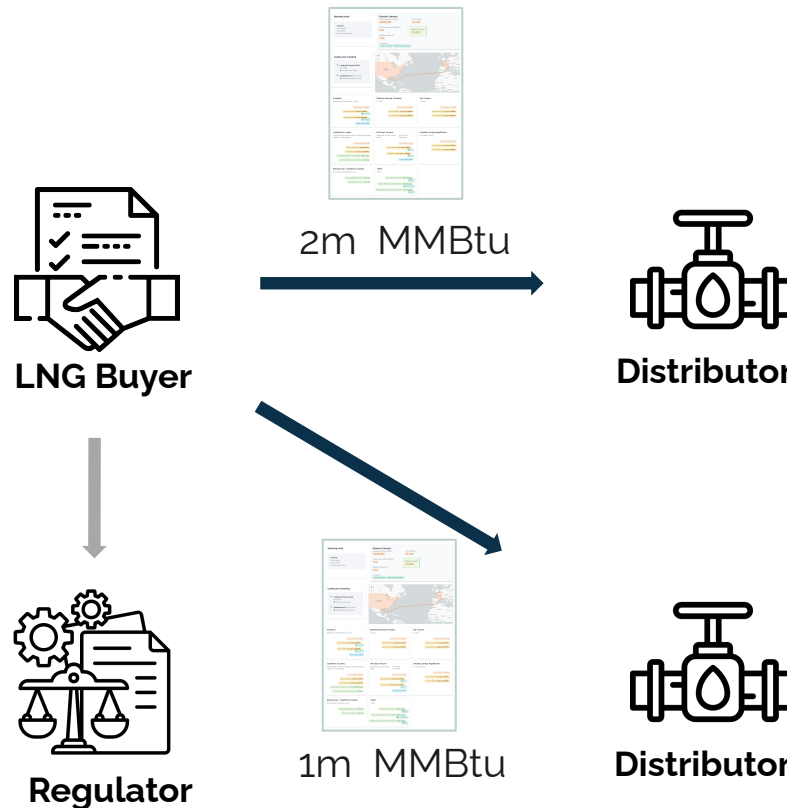

## ISSUANCE

of certificates for each cargo delivered and equal to the volumes regasified. Each cargo is fungible

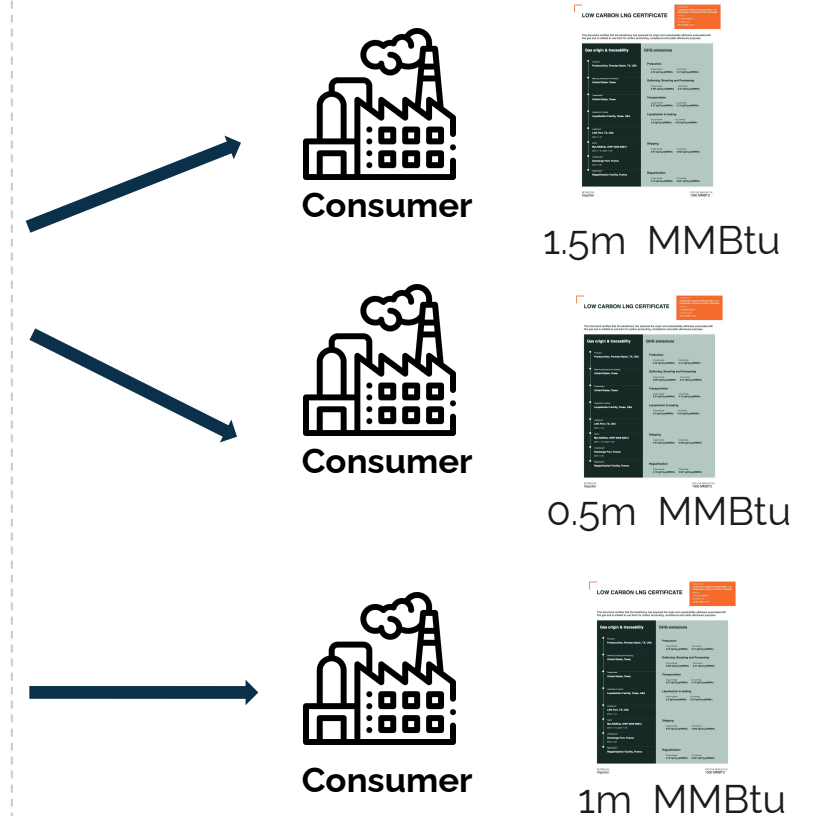

## TRANSFER

certificates along the chain based on commercial agreements

## RETIRE

certificates to claim associated data.

- ✓ User-friendly aggregated value chain view for final consumer
- ✓ Blockchain ID proof
- ✓ Full audit trail
- ✓ No double counting

# Demo

---

# A one stop shop solution

---

## Flexible

- No imposed standards, methodologies, or specific verifiers
- Custom products aggregating ESG data from various sources

## Trust and Security

- Blockchain technology ensures data integrity throughout the chain
- Strong guidelines boost customer trust in environmental claim

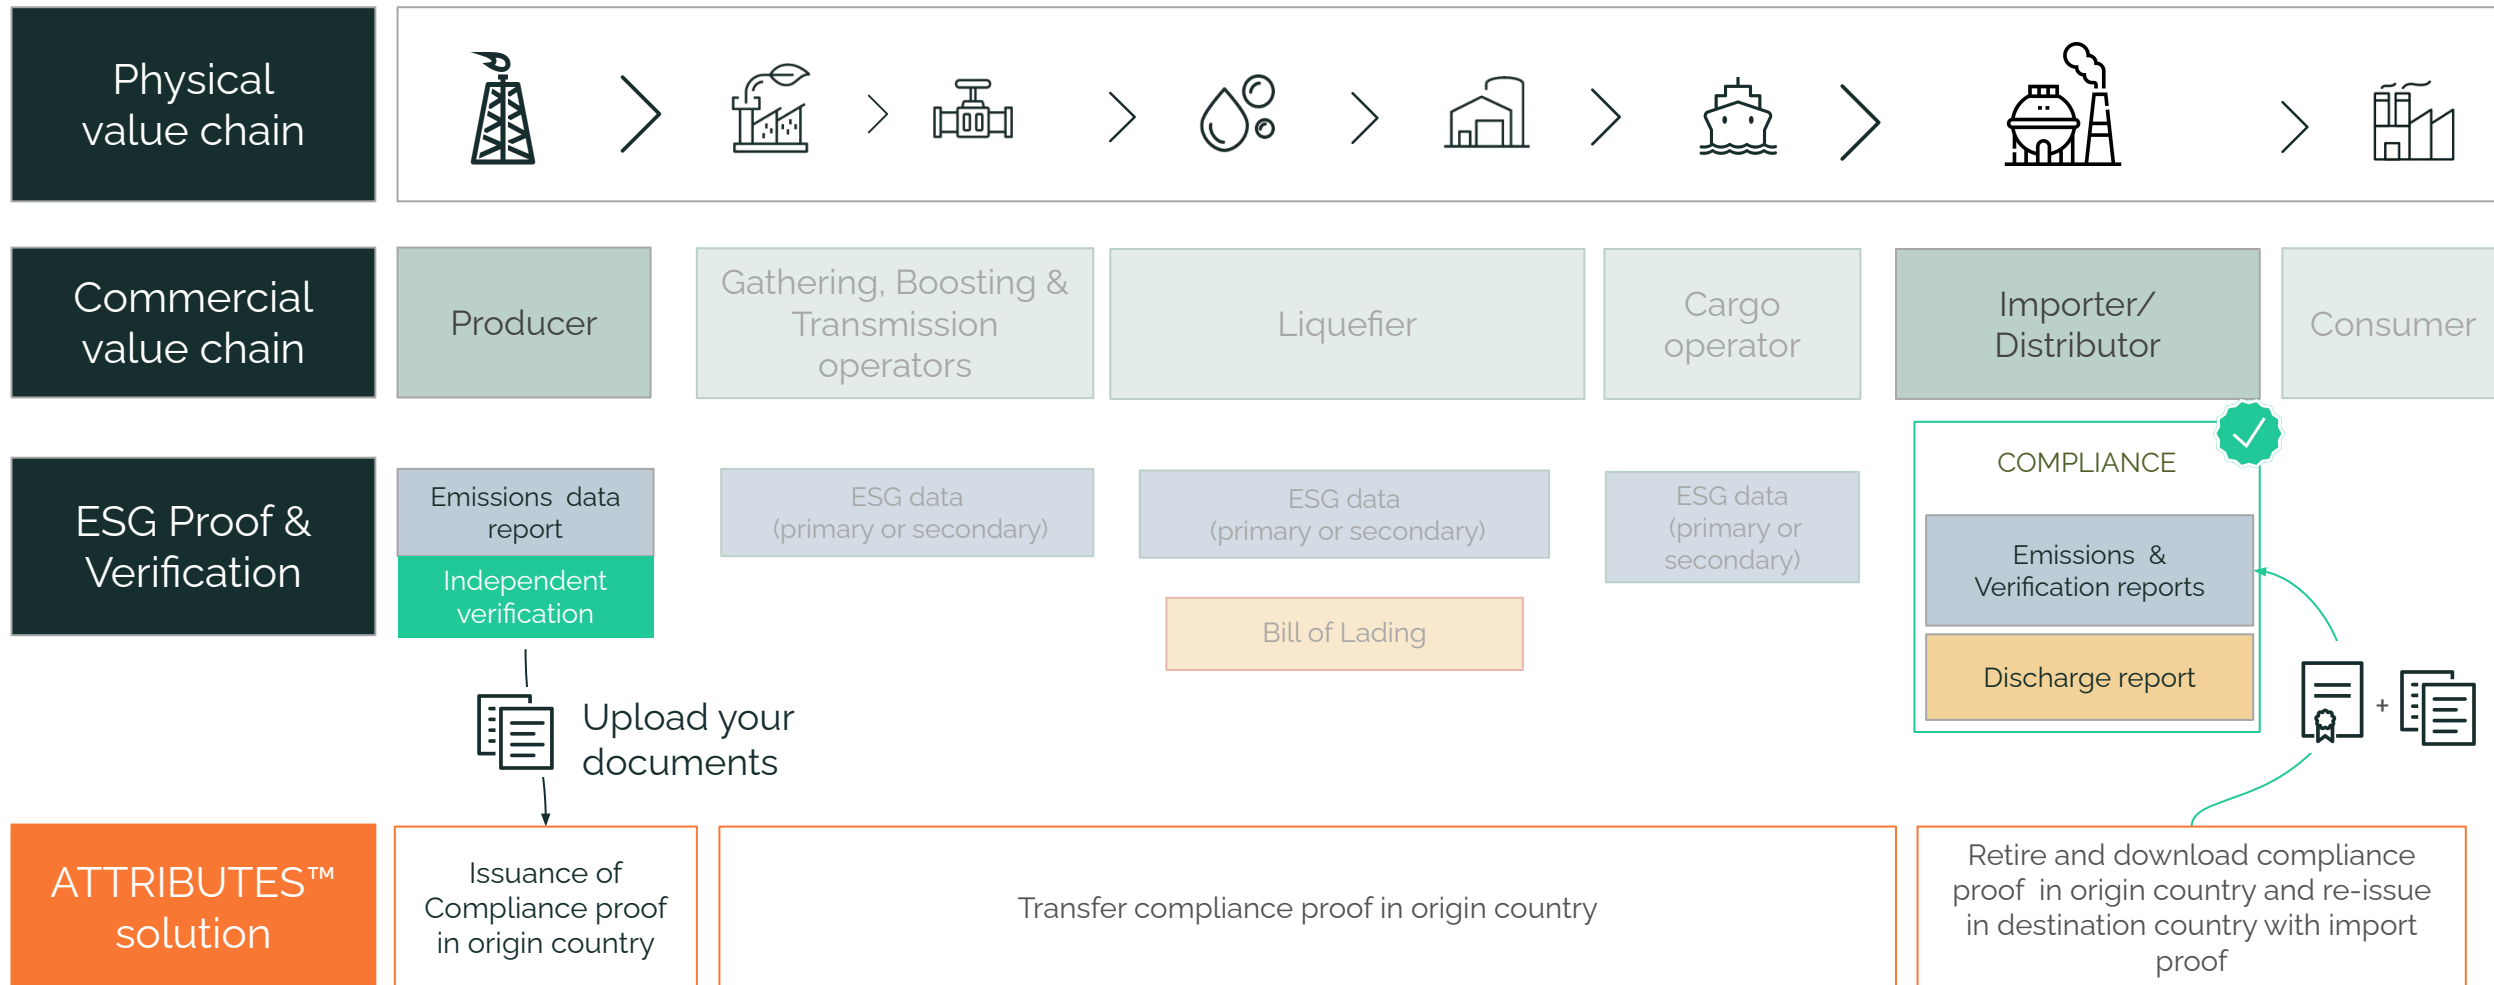

## Easy, Quick deployment

- Easy to deploy and fully interoperable
- New products structured and launched in days
