

ACSUS ACTIVE HEAD

Gyro-stabilized head ACSUS Active Head

The design of this head supports all common types of film and digital cameras. The 4th axis enhances stabilization performance and provides greater control flexibility. High levels of stabilization can be achieved even when using the longest and heaviest lenses.

The head can be equipped with an external digital lens control system, offering additional functionality and flexibility.

It is available with a variety of control options, including hand wheels, joystick, and pan bar.

FEATURES

- Improved stabilization level which allows to achieve a balanced picture even under extremely rough and difficult operating conditions
- High angular velocity on all axes
- Fast and effective rebalancing and calibration
- 360 degree PAN, TILT and ROLL function
- Axis position indication
- Solid and reliable construction
- Quick Assembly
- Remote controlled handling of lens Parameters (Focus, Iris, Zoom) with external Lens Control System
- Auto horizon
- Control capability by cable or wireless
- 4th axis for improved stabilization and control
