Primary Offer:

New Omnia customers receive the Rainmaker low-volume dispensing upgrade at no additional cost.

Estimated savings: \$15K+

What is Rainmaker?

Rainmaker is BioDot's piezo-based low-volume dispensing technology designed for high-precision, high-speed assay and microarray workflows.

Key Capabilities

- Pico to Nanoliter dispensing in a single drop.
- High-frequency dispensing performance.
- Dispense on-the-fly and step-and-repeat modes.
- Multi-tip dispensing to discrete locations.
- Ideal for high-speed array production.
- Critical for precision R&D and assay development.

Why This Bundle Works

- Save \$15K+ on Rainmaker upgrade.
- Gain high-precision dispensing capability.
- Improve throughput and repeatability.
- Future ready Omnia platform for automation.

Why It Matters

- Accelerates workflow performance from day one.
- Enables advanced precision dispensing.
- Supports scalable assay development.
- Eliminates cost barrier to adopting Rainmaker technology.

Who Should Consider This?

- New Omnia buyers.
- Diagnostics startups.
- R&D labs scaling into production.
