FOR IMMEDIATE RELEASE

BioDot Opens New Irvine Headquarters

IRVINE Calif. — March 5, 2026

BioDot, a leader in precision liquid dispensing technologies for life sciences and diagnostics, today announced the relocation of its headquarters to a new facility in Irvine, California.

The new location is minutes from the company's previous site and reflects BioDot's continued growth and commitment to supporting innovation in genomics, proteomics, and diagnostic development.

"This move marks an exciting milestone for BioDot," said Brian Kirk, general manager of BioDot. "Our new headquarters provides the space and infrastructure to support our expanding team while maintaining the high level of service our customers expect."

Operations and customer support will continue without interruption during this transition. Customers and partners should update their records with BioDot's new address.

New BioDot Inc. Headquarters Address

14450 Myford Rd.
Irvine, CA 92606

About BioDot, Inc.:

Founded in 1994, BioDot manufactures precision quantitative fluid dispensing systems. Today with more than 5,500 instruments installed globally, BioDot is one of the largest suppliers of equipment in the diagnostic test market. Specializing in low-volume dispensing, BioDot's wide range of platforms serves customers from R&D through high-volume manufacturing in the industrial, diagnostic, life science, and medical product markets. A portfolio of proprietary dispensing technologies provides precision, non-contact dispensing from picoliter to microliter volumes. Today BioDot holds over 27 global patents in low-volume dispensing and novel applications that rely on its proprietary dispensing technology. BioDot is a worldwide company with international offices in China and the United Kingdom. BioDot's long-lasting relationships with customers are built on precision products and quality service around the world.
