

Mizuho Bank, Ltd. India Basel III Pillar 3 Disclosures As at September 30, 2025

## Contents

- 1. Scope of Application and Capital Adequacy
- 2. Risk exposure and assessment
- 3. Composition of Capital disclosure
- 4. Leverage Ratio
- 5. NSFR Disclosure

## Background:

Mizuho Bank, Ltd. (MHBK) is subsidiary of Mizuho Financial Group Inc. Mizuho Financial Group ("the Group") is composed of MHFG (holding company) and its subsidiaries and affiliates and provides banking, trust banking, securities and other financial services. Mizuho Group has broad global network with a focus on Asia, where economic growth is continuing. Currently group network is extended to 38 countries. It is listed on the Tokyo stock exchange and New York stock exchange.

MHBK has five on-shore branches in India, viz. Mumbai, Gurgaon, Bangalore - Devanhalli, Chennai and Ahmedabad. The operations of the bank in India are involved in two main business lines viz. Treasury Operations and Corporate Banking. In line with the business strategy of the Group, the bank is focused purely on the corporate segment with no presence in the retail segment.

#### Overview:

The RBI has implemented Basel III capital regulations in India with effect from April 1, 2013. Pillar 3 disclosure requirements were introduced under Basel III regulations effective from July 2013. The purpose of the Pillar 3 disclosure is to ensure comparability of the capital adequacy of banks across jurisdictions with details of regulatory capital and regulatory adjustments to it.

Banks are required to maintain a minimum Pillar 1 Capital to Risk-weighted Assets Ratio (CRAR) of 9% on an on-going basis. Banks are also required to maintain a capital conservation buffer of 2.5% of Common Equity Tier 1 capital. Additionally, the Financial Stability Board (FSB), in consultation with Basel Committee on Banking Supervision (BCBS) and national authorities, has identified the list of global systemically important banks (G-SIBs), which are required to maintain an additional Capital Buffers to an extent of 1%. As Mizuho Bank Ltd is designated as G-SIB, 1% additional Capital buffer is also required to be maintained by the Bank.

As at September 30, 2025, Mizuho Bank, Ltd. India ("MHBK India" or "the Bank") is required to maintain a minimum Total Capital to Risk Weighted Assets ratio (CRAR) of 12.50% comprising Tier 1 Capital ratio of 7%, Tier 2 ratio of 2%, Capital Conservation Buffer (CCB) of 2.50% and capital buffer as a Global Systematically Important Bank (G-SIB) of 1%.

The Basel III framework consists of three-mutually reinforcing pillars:

- Pillar 1: Minimum capital requirements for credit risk, market risk and operational risk
- Pillar 2: Supervisory review of capital adequacy
- Pillar 3: Market discipline

## Table DF-1: Scope of Application

Name of the entity to which the framework applies: Mizuho Bank, Ltd. India.

The Basel III Pillar 3 disclosures contained herein relate to Mizuho Bank, Ltd. Indian Branches for the period ended September 30, 2025. The Pillar 3 disclosures are compliant with Reserve Bank of India (the "RBI") Master circular DOR.CAP.REC.15/21.06.201/2023-24 dated May 12, 2023 and DOR.CAP.REC.2/21.06.201/2025-26 dated April 1, 2025 on BASEL III Capital Regulations along with the earlier circulars as amended from time to time.

MHBK's strategy for its India operations is to use its large capital buffers to support its future growth plans. While the bank displays a healthy risk appetite for growing its business, it is risk averse vis-à-vis regulatory requirements, and is likely to maintain more than adequate Capital to Risk weighted Assets Ratio (CRAR) even in scenario involving high NPAs.

#### I. Qualitative disclosures:

The provisions of Accounting Standard ("AS") 21 - Consolidated Financial statements, AS 23 Accounting for Investments in Associates in Consolidated Financial statements & AS 27 - Financial Reporting of Interest in Joint Ventures, issued by The Institute of Chartered Accountants of India ("ICAI") and notified by the Companies (Accounting Standards) Rules 2006 do not apply to the Bank. MHBK India has not invested its capital in any of the entities operating in India and owned by MHFG. Further, the Bank does not have any interest in insurance entities. Hence the qualitative disclosures are only made for MHBK India as a standalone entity.

#### a. List of group entities considered for consolidation

Name of the entity / Country of incorporation	acono of	Explain the method of consolidation	Whether the entity is included under regulatory scope of consolidation (yes / no)	Explain the method of consolidation	Explain the reasons for difference in the method of consolidation	Explain the reasons if consolidated under only one of the scopes of consolidation	
Not Applicable							

## b. List of group entities not considered for consolidation both under the accounting and regulatory scope of consolidation

Name of the entity / Country of incorporation	Principle activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity) INR million	% of bank's holding in the total equity	Regulatory treatment of bank's investments in the capital instruments of the entity	Total balance sheet assets (as stated in the accounting balance sheet of the legal entity) INR million*		
Not Applicable							

#### II. Quantitative disclosures: Not Applicable

c. List of group entities considered for consolidation

Name of the entity / country of incorporation (as indicated in (i)a. above)	Principle activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	Total balance sheet assets (as stated in the accounting balance sheet of the legal entity)			
Not Applicable						

d. The aggregate amount of capital deficiencies in all subsidiaries which are not included in the regulatory scope of consolidation i.e. that are deducted:

Name of the subsidiaries / country of incorporation	Principle activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	% of bank's holding in the total equity	Capital deficiencies		
Not Applicable						

e. The aggregate amounts (e.g. current book value) of the bank's total interests in insurance entities, which are risk-weighted:

Name of the insurance entities / country of incorporation	Principle activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	% of bank's holding in the total equity / proportion of voting power	Quantitative impact on regulatory capital of using risk weighting method versus using the full deduction method			
Not Applicable							

f. Any restrictions or impediments on transfer of funds or regulatory capital within the banking group:

Disclosures for MHBK India are given as a standalone entity and therefore this disclosure requirement is not applicable.

## Table DF-2: Capital Adequacy

#### I. Qualitative disclosures

The Bank is required to comply with all applicable laws and regulations in India including guidelines issued by RBI and other relevant regulatory bodies.

The Internal Capital Adequacy Assessment Process ("ICAAP") document assesses the capital adequacy for the Bank and details the process by which this assessment is made. It establishes a framework for banks to perform a comprehensive assessment of the risks they face and relate capital to those risks. The capital analysis performed by the Bank is expected to encompass all risks, not just the risks captured by the Basel III Pillar 1 minimum regulatory capital calculation. Successful risk identification and measurement requires having a comprehensive process to quantify, measure and aggregate these various risks to ensure that the Bank's capital resources are sufficient to cushion volatility in earnings due to unexpected losses.

The ICAAP document is presented to the Executive Management Committee ("EXCO") for final review and approval on an annual basis.

ICAAP is an integral management tool for determining the adequacy of the Bank's capital resources throughout the ICAAP planning horizon. It is also utilized to assess the risks being faced by the Bank and assess the adequacy of MHBK India's capital under Baseline as well as Stress Scenarios over the ICAAP Planning Horizon. EXCO of the Bank is responsible for acting at an early stage to prevent capital from falling below the minimum levels required to support risk characteristics.

#### Capital Requirements for Pillar 1 risks (i.e., Credit Risk, Market Risk and Operational Risk)

The Bank has assessed its capital requirement taking into account the three main risks as defined in Pillar 1 of the Basel III norms viz: Credit Risk, Market Risk and Operational Risk. The Credit Risk is computed using the Standardized Approach, the Market Risk is calculated using the standardized Duration Approach and the Operational Risk is calculated using the Basic Indicator Approach. The risk computation under each of these 3 Categories is adequately covered by the Capital of the Bank.

The Bank has assessed its future capital requirement and the same has been documented in the ICAAP document. The existing level of Capital is adequate to meet the Bank's current and future business requirements and the CRAR ratio of the Bank is significantly higher than that prescribed by the regulators.

The regulatory capital consists of Tier 1 Capital (Common Equity Tier 1 + Additional Tier 1) and Tier 2 Capital. The Capital instruments eligible for inclusion in Tier 1 Capital comprise interest free capital received from head office, statutory reserves, remittable surplus retained (non-repatriable) and Capital reserves. The regulatory deductions in relation to Tier 1 Capital include Intangible Assets (INR 1,700 million) i.e.

Deferred Tax Assets (INR 1,252 million) and software (INR 448 million).

The Tier 2 Capital consists of provisions made against standard assets, floating provisions, country risk provision, investment fluctuation reserve, investment reserve account, unhedged foreign currency exposure provision, excess provisions which arise on account of sale of NPAs and countercyclical provisioning buffer. The items under Tier 2 capital are reckoned up to a maximum of 1.25% of the total credit risk-weighted assets under the standardized approach. The CRAR as per Basel III as at September 30, 2025 is at 18.02%. The existing level of capital is adequate to meet the Bank's current and future business requirements and the CRAR of the Bank is significantly higher than that prescribed by the regulators i.e. 12.50%.

#### II. Quantitative disclosures

Tier 2 capital ratio	1.15%	1.24%
Total Capital ratio	18.02%	21.95%

## **Risk Exposure and Assessment**

Risk management is a disciplined approach to identify, analyze, assess, and control unacceptable risk to minimize the volatility of financial results, drive sustainable earnings and protect the Bank's brand and reputation. The Bank takes a comprehensive approach to risk management, integrating it with strategic, capital, and financial operating plans. Risk management and capital utilization are integral parts of the strategic planning process and are considered throughout the process to align the Business strategies with capital considerations and risk appetite of the bank.

The Risk Appetite is in alignment with the Bank's business strategy and is also integrated with the annual MHBK India ICAAP which is a key document to review strategic plans.

This holistic approach promotes the risk versus reward analysis needed to make informed strategic and business decisions.

MHBK India's Risk Framework requires that strong risk management practices are integrated in key strategic, capital and financial planning processes and in day-to-day business processes, thereby ensuring risks are appropriately considered, evaluated and responded to in a timely manner. The front-line units have primary responsibility for managing risks inherent in their businesses.

Some of the risks that the Bank is exposed to are described below:

- Credit risk is the risk of loss arising from the inability or failure of a borrower or counterparty to meet
  its obligations. MHBK India manages credit risk to a borrower or counterparty based on its risk profile,
  which includes assessing repayment sources, underlying collateral, if any, and the expected effects
  of the current and forward-looking economic environment on the borrowers or counterparties.
  Underwriting, credit management and credit risk limits are proactively reassessed as a borrower's or
  counterparty's risk profile changes. Credit risk appetite metrics are included as part of the MHBK
  India risk appetite metrics.
- Market risk is the risk of loss due to changes in the market values of the Bank's assets and liabilities
  caused by changing interest rates, currency exchange rates, and security prices. Market risk is
  inherent in the Bank's operations and arises from both trading and non-trading positions. Trading
  exposures represent positions taken in a wide range of financial instruments and markets which

expose the Bank to various risks, such as interest rate risk, foreign exchange risk, etc. The Bank manages these risks by using trading strategies and other hedging actions which encompass a variety of financial instruments in both the cash and derivatives markets. Key market risk exposures are assessed at both specific and aggregate levels. At the specific level, market risk sensitivities are assessed by evaluating the impact of individual risk factors such as interest rates and foreign exchange. At the aggregate level, market risk is assessed using two key measures, which are Value-at-Risk ("VaR") and 10 Day Stressed Value at Risk ("SVaR"). Both these measures are monitored as a part of the MHBK India Risk Appetite Metrics.

- Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, and systems or from external events. MHBK India manages the operational risks of its business activities using the enterprise-wide Operational Risk Framework. Enterprise Operational Risk policies, processes, tools, and standards are implemented by the Businesses/ECFs with Oversight from the Independent Business/ECF Risk Teams (Regional Function). Each have a quality assurance role and through direct action or Oversight, these stakeholders are collectively responsible for execution of the Operational Risk Program requirements, achievement of risk management objectives, and ensuring timely action is taken in response to concerns and issues. MHBK India Operational Risk tolerance threshold is also included as part of MHBK India Risk Appetite Metric.
- Strategic risk is the risk resulting from incorrect assumptions about external or internal factors, inappropriate business plans (e.g. too aggressive, wrong focus, ambiguous); ineffective business strategy execution; or failure to respond in a timely manner to changes in the regulatory, macroeconomic, or competitive environments in the geographic locations in which we operate (such as competitor actions, changing customer preferences, product obsolescence and technology developments).
- Liquidity risk is the inability to meet expected or unexpected cash flow and collateral needs while continuing to support our businesses and customers under a range of economic conditions. The primary objective of liquidity risk management is to ensure that MHBK India can meet expected or unexpected cash flow and collateral needs while continuing to support our businesses and customers with the appropriate funding sources, under a range of economic conditions. The Branch uses Liquidity Risk Limits and Risk Indicators such as Liquidity Coverage Ratio, Leverage Ratio, Statutory Liquidity Ratio, Cash Reserve Ratio, Net Stable Funding Ratio, Loans to Deposit Ratio etc. to manage liquidity risk within risk appetite, identify a potential change in the Branch's risk profile, and ensure the amount of liquidity maintained at the Branch remains prudently sized under baseline and stressed conditions.
- Reputational risk is the risk that negative perceptions regarding MHBK India's conduct or business
  practices may adversely impact its profitability or operations. Reputational risk may result from many
  of the bank's activities, including those related to the management of strategic, operational,
  compliance and credit risks. As a result, the potential impact to the bank's reputation of all our
  activities and all risks we face is evaluated. Reputational risk may arise from negative perception on

the part of key stakeholders (e.g., customers, counterparties, investors, regulators, rating agencies), scrutiny from external parties (e.g., politicians, consumer groups, media organizations) and the ongoing threat of litigation. These reputational risk events could adversely impact the bank's financial standing through an inability to maintain or establish business relationships.

- Compliance risk is the risk of legal or regulatory sanctions, material financial loss or damage to the reputation of the Bank arising from the failure of the Bank to comply with the requirements of applicable laws, rules, regulations, related self-regulatory organizations' standards and codes of conduct. Mizuho Bank, Ltd. India is committed to complying with applicable laws, rules and regulations governing the processes and activities of our front-line units and control functions in the jurisdictions in which we operate. Mizuho Bank, Ltd. India has no appetite for accepting compliance risk.
- Interest Rate Risk in Banking Book (IRRBB) refers to the potential adverse financial impact on the Bank's net interest income from changes in interest rates. Due to the fundamental nature of its business, the Bank carries various interest sensitive assets and liabilities in its balance sheet. This exposes the Bank to risk on from changes in interest rates. These assets and liabilities essentially reside in the banking book. In other words, IRRBB refers to the risk associated with interest rate sensitive instruments that are not held in the trading book of the Bank. Interest rate risk in the trading book is covered in the market risk section.
- Credit concentration risk arises due to imperfect diversification of credit exposures in two ways. One, by having very large exposures to a small set of obligors due to which, default by a big customer could result in a huge loss. This is known as name (single/group) concentration risk. Second type of concentration is due to excessive exposure to a particular industry sector. It is observed that defaults in a particular industry sector are generally correlated. Hence, if an industry is under a severe recession, it could result in multiple defaults leading to huge losses.

#### Other Risks

#### - Securitization Risk

It is not one of the primary business activities of MHBK India to enter transactions either to securitize and sell its loans or to buy securitized loans from any other bank. The Bank, as of September 30, 2025, does not have any such investments nor has it securitized any of its assets.

- Settlement Risk arises out of exposures on counterparties during the settlement of a deal when the Bank has performed its obligation in the contract and the counterparty is yet to perform its part (either delivery or payment). It is of transient nature; and may arise from counterparty default, operational problems, market liquidity constraints and other factors.
- Pension obligation risk is the risk of a shortfall of pension funds available in the future to meet pension obligations for its eligible employees. The Bank provides for its pension liability, which is a defined contribution scheme, for all its eligible employees.
- Model Risk is the potential for adverse consequences from decisions based on incorrect or

misused model output and reports. The Enterprise Model Risk Policy ("EMRP") provides comprehensive guidance for understanding monitoring and managing model risk at Mizuho Bank, Ltd. India. The EMRP is consistent with applicable rules and regulations and establishes a framework of corporate responsibilities and standards for effectively managing model risk across the enterprise.

#### - Risk of Under-estimation of Credit Risk under the Standardized Approach

The use of standardized approach for calculating the Pillar 1 capital requirement in respect of credit risk is a conservative approach given the portfolio primarily consists of corporate customers with strong credit profiles and the credit risk in the portfolio is well managed by the credit risk management processes in place.

The Bank computes credit exposure for market related off balance sheet products using the Current Exposure Method (CEM) and it captures the risk contained in the transactions that give rise to Counterparty Credit Risk (CCR) appropriately and satisfactorily.

#### - People risk assessment:

Considering the business profile and activities of the bank, the risk that business objectives will not be met due to human resource deficiencies is considered low. The bank has a strong focus on talent acquisition and succession planning as also on ensuring effective backups, which mitigates the impact on business due to changes in key positions. The annualized turnover rate and the capacity utilization (# Open positions/Total headcount) indicates a good level of stability and very limited bandwidth constraints. The number of conduct risk violations have been low and there has not been any history of internal frauds within the bank. There is a thrust on training and development which also ensures staff awareness and understanding on key policies, laws and regulations related to information privacy and protection, anti-money laundering, the risk framework, emergency preparedness, among others.

#### - Technology risk assessment:

The bank is reliant on global systems that are time tested and robust and the risk that arises from systems and/or tools that are deficient, unstable and/or overly complex is low. The client interface is automated and the processing capabilities with underneath reporting functionalities are well established. The bank's loss history is not material and there haven't been too many significant events over the last 3 years that are attributable to system failures.

### **Risk Governance**

MHBK India has the following senior management level local committees or groups for risk governance.

#### **Executive Management Committee ("EXCO")**

The EXCO is chaired by the General Manager & Chief Executive Officer of the Bank. It is the primary body which provides strategic direction to the Bank and ensures compliance with regulatory

requirements and the internal policies of the Bank. It is responsible for branch governance and oversight of branch operations. It is also responsible for reviewing and approving new business and products. It reviews the country performance with respect to strategic objectives. The EXCO meets at least on a quarterly basis or more frequently if required. The EXCO reviews and approves the ICAAP on an annual basis or upon any revision in the interim.

#### Asset Liability Committee ("ALCO")

The ALCO is chaired by the General Manager & Chief Executive Officer of the Bank. It provides management oversight of the branch's balance sheet, capital, liquidity management and stress testing activities, consistent with the Bank's overall risk appetite for balance sheet, capital, liquidity management and stress testing. It also provides review and, as appropriate, approval of the branch-specific policies, processes, and contingency funding plans, as requested by the Council or required by regulation. The ALCO holds meetings on monthly basis in a financial year.

#### **Risk Management Committee ("RMC")**

RMC is independently chaired by the Chief Risk Officer. RMC serves as an oversight body to provide strategic direction for a progressive risk management system and policies & strategy to be followed to mitigate the risks associated with the business. RMC comprises senior management of the Bank and representatives from front line units and relevant control & support functions. RMC meets at least on a quarterly basis.

#### **Apex Committee on Customer Service ("CSC")**

Apex Committee on Customer Service ("CSC") is responsible for activities relating to customer service and client services issues. CSC meets four times in a year.

#### Information Technology Strategy Committee ("ITSC")

The ITSC is chaired by the Chief Information Officer ("CIO"). The Information Technology Strategy Committee (ITSC) oversees projects in partnership with the Regional / Global Technology and other Functional teams across the Bank including common infrastructure or other projects cutting across businesses or support groups. The TSC conducts meetings at least once every quarter or more frequently if required.

The ITSC is mainly responsible for:

- To assist the Executive Management in implementing Information technology ("IT") Strategy that has been approved by the by global/regional and local management forums,
- Setting project priorities, assessing strategic fit for Information Technology ('IT') proposals and reviewing critical project status and milestones,
- · Monitoring IT Governance, project risk, technology operational risks and control processes,
- Providing regular updates to the India EXCO on significant Technology matter.

#### **Compliance Committee ("CC")**

It aims to create awareness of key regulatory changes & promote compliance in India operations. The detailed terms of references of CC are captured in Bank's Compliance Risk Policy.

#### **New Product Committee ("NPC")**

It aims to discuss new products and business being introduced and also ensures risk and concern areas, system related controls and compliance to local laws and Head Office procedures are adhered to and responsibility allocations are being conducted.

#### **Business Continuity Planning Committee ("BCP")**

BCP is mainly responsible to discuss and ensure implementation of Business Continuity Plan to ensure continuity of operations in critical disruptive scenarios.

#### Table DF-3: Credit Risk: General Disclosures

#### I. Qualitative disclosures

#### Overview of policies and procedures

The key objectives of Bank's Credit Policy are as follows:

- Establish an appropriate credit risk environment and control system for credit risk management.
- Adhere to the Reserve Bank of India (RBI) prudential requirements with respect to lending norms and ensure correcting any breaches to such prudential guidelines.
- De-risk the Corporate Banking and Trade Finance business by mobilizing self-securing, self-liquidating credit products.
- The bank deploy credit across various sectors with the twin objectives of increased profitability and reduce exposure to unforeseen risks.
- The bank identifies and regularly review loan target segment, thrust areas, low priority loans and priority sector lending keeping the overall objectives of Bank and RBI guidelines.
- The bank has established prudential limits like borrower/group, industry, sensitive sectors, substantial exposure limits etc. and adheres strictly to them.
- Credit facilities are reviewed / renewed at least on an annual basis as defined by policy framework.
- The bank is guided by its Head Office Policies and will continue to follow the same in addition to guidelines given by RBI.

#### **Credit Risk Management Framework**

- The bank believes that Risk Identification is a continuous and pro-active process. It covers all the current activities of the Bank as well as new products and initiatives.
- The Executive Management Committee (EXCO) approved policy documents for Credit Risk, framed in line with the policy of Head Office, comprehensively addresses various aspects of risk management and monitoring. The Bank Loan Policy covers all aspects with respect to underwriting of exposures, capital charge, IRAC norms and others in line with RBI circular and guidelines.
- The Bank continually monitors and validates risk parameters affecting the course of normal business, and ensures a thorough compliance with RBI regulatory requirements.
- The Bank has a HO stipulated control environment to monitor and enforce approved policies and procedures and various operational aspects with regard to implementation of the same.
- The Bank applies methodical and well-organized risk reporting structure at all levels of the organization, which culminates in HO approval.
- In line with the extant RBI guidelines on UFCE, MHBK India has put in place a process to ascertain the amount of UFCE, estimate the extent of likely loss and riskiness due to UFCE, and provide for incremental capital & make incremental provision, as warranted.
- In order to address concentration risk in banking industry the RBI has issued 'Guidelines of Enhancing Credit Supply' requiring banks to create additional provision and also apply additional risk weights on specified borrowers effective April 01, 2018. MHBK India has put in place a process to ensure compliance with requirements of the said guidelines/directions.
- The bank follows the extant guidelines with regard to classification of account as overdue/ SMA/NPA.
- The bank has well established process for identification of stress in account and to take corrective measures.
- Non-Performing Loans are tracked by various methods like:
- Rating Analysis.
- Industry wise Analysis.
- Reviews.
- Time Schedule for renewal of limits.
- The bank follows extent RBI guidelines for provisioning of non-performing assets.

The investments mainly comprise of Treasury Bills of Government of India and investments in Government Securities. The investments in Treasury Bills of Government of India are held for SLR purpose and these are valued at carrying cost as per Reserve Bank of India guidelines.

# Table DF-4 - Credit Risk: Disclosures for Portfolios Subject to the Standardized Approach

#### I. Qualitative disclosures

#### **Rating Agency Used:**

In line with the RBI guidelines, the bank has identified CARE, CRISIL, ICRA, Acuite, and Informatics as domestic credit rating agencies and Fitch, Moody's and S & P as international rating agencies for rating the domestic and overseas exposures respectively for RWA computation purpose. Currently external ratings are used for computation of RWA for rated exposures and other credit exposures are treated as unrated.

#### Types of exposures for which each agency will be used

- For exposures with a contractual maturity of less than or equal to one year (except cash credit, overdraft and other revolving credits), short-term ratings given by approved rating agencies to be used.
- For domestic cash credit, overdraft and other revolving credits (irrespective of the period) and for Term Loan exposures of over one year, long term ratings to be used.
- For overseas exposures, irrespective of the contractual maturity, long term ratings given by approved rating agencies to be used.

#### Process used to transfer public issue ratings onto comparable assets in the Banking Book:

The above is not applicable to our bank.

# Table DF-5: Credit Risk Mitigation: Disclosures for Standardized Approaches

#### I. Qualitative disclosures

Types of Credit Risk Mitigation

MHBK uses an assortment of financial and non-financial collaterals and guarantees to mitigate the underlying credit risk in its regular lending operations.

#### - Financial Collateral

• Lien / Pledge of Fixed Deposits, Term Deposits

#### - Non-financial collateral

- Hypothecation of Stocks / Book Debts / Accounts Receivables.
- Mortgage of real estate / property / factory land & building etc.

#### - Guarantees

- Bank Guarantees
- Corporate Guarantees

#### - Others

• Assignment of employment lien, retirement benefits and mortgage in case of loans to staff.

Key highlights of the Bank's risk mitigation strategies and procedures for acceptance and monitoring of effectiveness of mitigation are as follows:

- Acceptance criteria for collateral are preceded by a thorough analysis on a case to case basis prior to granting a facility.
- Comprehensive analysis of collaterals is performed for assessing the liquidity and the legal aspects.
- Creation of minimum stipulations and conditions for acceptance and valuation of collaterals.
- Appropriate analysis of guarantees received, in terms of its coverage of exposure amount and associated legal documentation.
- · Regular monitoring and valuation of collaterals.

#### **Valuation**

The bank has local board approved policy (Executive Management Committee) with regard to valuation of collateral security, title search report and forms of charge etc. The bank accepts immovable assets such as land and building as collateral and ensure, independent market valuation, title clearance etc. before creation of security in its favour. For property valuations, the bank empanels registered and government approved valuers. Further, for credit facilities that are secured by hypothecation of stock, the stock audits are conducted annually by external agencies.

#### II. Quantitative disclosures

Bank has not considered any eligible financial collateral for netting for calculation of risk weighted asset for capital adequacy purpose.

# Table DF-6: Securitization Exposures: Disclosure for Standardized Approach

- Aggregate amount of on-balance sheet securitization exposures retained or purchased: Nil (March 31, 2025: Nil)
- Aggregate amount of off-balance sheet securitization exposures: Nil (March 31, 2025: Nil)
- Aggregate amount of securitization exposures retained or purchased subject to Comprehensive Risk Measure for specific risk: Nil (March 31, 2025: Nil)
- Aggregate amount of securitization exposures retained or purchased subject to securitization framework for specific risk broken into different risk weight bands: Nil (March 31, 2025: Nil)
- Aggregate amount of capital requirements for the securitization exposures subject to securitization framework: Nil (March 31, 2025: Nil)

## Table DF-7: Market Risk in Trading Book

#### I. Qualitative disclosures

#### **Overview of Policies and Procedures**

MHBK has a Board approved Investment Policy and it lays down the broad investment objectives; prudential and internal exposures limit norms, set up for considering investments, methods of follow up, accounting / auditing / review / reporting systems and authority structure to put through the deal transaction. The Bank has put in place an Asset Liability Management Policy, Risk Management Policy, Derivative Policy and Stress Test Policy with defined roles, authorizations, limits, etc. governing the bank's market activities.

The Bank has Risk Management Committee (RMC) as well as Asset Liability Committee (ALCO), which are responsible for giving guidelines on market risk management. The Bank has set up a Market

risk Monitoring Department, to supervise the day to day monitoring requirements of various Market Related Risk parameters.

MHBK has established a very comprehensive delegation of authority across various functionaries. Policy prescribes monitoring counterparty Derivative exposure on daily basis by capturing daily exposure details and reporting of any breaches to Senior Management for taking necessary steps. MHBK policy covers regular internal audit, periodic review and reporting as per RBI guidelines and Policy guidelines.

#### Interest rate risk

The investments in AFS book are mostly Treasury-bills and coupon bearing Government Securities which do not have general market risk as Capital charge only compute on trading book not on Banking book as per RBI circular. The bank runs a matched position in derivative instruments (except INR OIS/IRS), the market risk from OTC derivative positions is very low. Therefore, the interest rate risk comprises general market risk on account of any unmatched derivative contracts and investment in HFT category Government Securities due to Bond FRA. As of September 30, 2025, Bank had an exposure to Non-SLR securities representing INR 15,024 million of investments in Non-Convertible Debentures. The interest rate risk calculations and mark to market workings including related capital computations are carried out by Market Risk Monitoring department.

#### Equity & commodity risk

As per the present Policy of the Bank, Bank cannot invest in these segments.

#### Foreign Exchange Risk

MHBK has an aggregate net open position limit of INR 9,000 million in all currencies. The daily open positions are monitored by Market Risk Monitoring department as per the Regulatory guidelines.

The Capital assessment required for market risk is computed using the Standardized Duration Method. Forex VaR on gaps is calculated and maintained on a daily basis as per FEDAI declared rates. Bank has prescribed Forex VaR limit of USD 7 million (INR 58.10 million). The Aggregate gap limit for all Forex positions has been fixed at USD 1,200 million as approved by Executive Management Committee and intimated to RBI. This limit is also monitored by Market Risk Department on a daily basis.

## Table DF-8: Operational Risk

#### **Qualitative Disclosures**

#### **Overview of Policies and Procedures**

- MHBK India has put in place separate Operational Risk Management Policy and also follows Head
  Office policies for Operational Risk Management. Issues Relating to Operational Risk Management
  (ORM) for India operations are dealt with by the Operations Planning department and Risk
  Management Committee.
- The Bank follows the Basic Indicator Approach for calculating Operational Risk capital charge as per Basel III / RBI guidelines.
- The operational risk management practice is governed by well-defined IT / Operations polices and Compliance manual.
- MHBK India follows HO issued policy/procedures for Operational Risk management. HO also issues periodic circulars to cover specific areas like self-assessment etc. which is comprehensively developed according to the parent bank's Advanced Measurement requirements.
- MHBK India exhibits sufficient responsiveness to account for underlying risks and has a defined process for tackling the same.
- The Bank has a robust IT security framework and a comprehensive Disaster Recovery Plan, which incorporates elements of Business Continuity Planning. Bank systems are well equipped to account

for system failure, internet fraud, hacking attacks, etc.

Mizuho India has adopted the Basic Indicator Approach for Operational Risk. As on September 30, 2025, the operational risk capital charge for the Bank is INR 1,998 million based on previous 3 years' average gross income.

## Table DF-9: Interest Rate Risk in the Banking Book (IRRBB)

#### I. Qualitative disclosures

#### **Overview of Policies and Procedures**

The Bank has prescribed limits for Interest Rate Risk as per the ALM policy. The Gap limits were fixed for INR as well as all currencies combined. Suitable limits are also in place for the impact on Net Worth for interest Rate shock based on Modified Duration method. The Standardized duration gap methodology as prescribed by RBI has been adopted for computing interest rate risk in the banking book. Based on interest rate sensitivity, Interest rate risk in banking book is assessed on monthly basis as per RBI guidelines. Both on balance sheet and off balance sheet items are slotted to respective maturity buckets for assessing the interest rate sensitivity. On-balance sheet items are taken at book value.

Interest Rate Risk in Banking Book is derived under following two approaches:

- Traditional Gap Analysis Earnings perspective
- Duration Gap Analysis Economic value perspective

Earning at risk is computed based on Gap analysis.

Liquidity Ratios as per RBI guidelines are monitored periodically and reported to ALCO.

Derivatives are converted into positions in the relevant underlying. The amounts considered are the principal amount of the underlying or of the notional underlying. Swaps are treated as two notional positions with relevant maturities.

#### II. Quantitative disclosures

The increase / (decline) in earnings and economic value (on a pre-tax basis) for an upward / downward rate shock broken down by currency is as below:

#### a. Impact on net interest income over the next 12 months (earnings perspective)

	Septem	ber 30, 2025	March 31, 2025		
	If interest	If interest rate	If interest	If interest rate	
INR million	rate were to	were to go down	rate were to	were to go down	
	go up by 100	by 100 basis	go up by 100	by 100 basis	
	basis points	points	basis points	points	
Currency					
INR ( Consolidated for all currency)	189	(189)	161	(161)	

#### b. Impact on market value of equity (economic value perspective):

	Septem	ber 30, 2025	March 31, 2025		
INR million	If interest rate were to go up by 200 basis points	If interest rate were to go down by 200 basis points	If interest rate were to go up by 200 basis points	If interest rate were to go down by 200 basis points	
Currency					
INR ( Consolidated for all currency)	(2,314)	2,314	(3,680)	3,680	

#### **III. Other Reporting**

In reference to RBI circular no. RBI/2022-23/180, DOR.MRG.REC.102/00-00-009/2022-23 dated February 17, 2023, the Reserve Bank of India has issued final guidelines on Interest Rate Risk in Banking Book (IRRBB), whereby banks must measure, monitor, and disclose their exposure to IRRBB in terms of potential change in the economic value of equity and net interest income based on a set of prescribed interest rate shock scenarios. The date for implementation of the guidelines for Domestic Systemically Important Banks is March 31, 2023 and for Other Banks is June 30, 2023.

Interest Rate Risk in Banking Book refers to the current or prospective risk to banks' capital and earnings arising from adverse movements in interest rates that affect its banking book positions. Excessive IRRBB can pose a significant risk to banks' current capital base and / or future earnings. IRRBB require banks to measure, monitor, and disclose their exposure to IRRBB in terms of potential change in Economic Value of Equity ( $\Delta$ EVE) and Net Interest Income ( $\Delta$ NII), computed based on a set of prescribed interest rate shock scenarios.

Mizuho bank calculated EVE and NII for the quarter ended June 30, 2025, the results were within the regulatory threshold of 15% of Tier 1 Capital of the bank.

INID maillion	ΔΕ۷	'E	ΔNII		
INR million	June 30, 2025	March 31, 2025	June 30, 2025	March 31, 2025	
Parallel up	5,810	4,229	(1,637)	(488)	
Parallel down	569	490	1,637	488	
Steepener	191	129			
Flattener	2,289	1,727			
Short rate up	4,243	3,129			
Short rate down	524	418			
Maximum	5,810	4,229	1,637	488	
Tier 1 capital	102,746	98,479	102,746	98,479	
Maximum as % of Tier 1 Capital	5.65	4.29	1.59	0.50	

The maximum impact on EVE, out of the prescribed 6 scenarios is in "Parallel Up" scenario at 5.65% on Tier I capital for quarter ended June 30, 2025 as compared to 4.29% for the quarter ended March 31, 2025.

The maximum impact on NII is in "Parallel Up" scenario at 1.59% of Tier I capital for quarter ended

June 30, 2025 as compared to 0.50% for the quarter ended March 31, 2025. The Tier I capital amount considered in above table is as of March 31, 2025.

## Table DF-10: General Disclosure for Exposures Related to Counterparty Credit Risk

#### I. Qualitative disclosures

The Bank process for managing and monitoring derivative and counterparty credit risk is based on its assessment of the potential future credit risk as per HO/RBI guidelines.

Counterparty limits are monitored and reported on periodical basis and internal triggers have been put in place to guard against breach in limits. Credit exposures to investments, advances, etc. are monitored separately under the large exposure framework norms for exposure to a single borrower and group borrower and as per Bank's Loan policy or Investment policy as applicable.

#### II. Quantitative disclosures

#### As at September 30, 2025

## Net Stable Funding Disclosure as at September 30, 2025

The Basel Committee on Banking Supervision (BCBS) had introduced the Net Stable Funding Ratio (NSFR) in order to ensure resilience over a longer- term time horizon by requiring banks to fund their activities with more stable sources of funding. NSFR is defined as the amount of available stable funding relative to the amount of required stable funding. "Available stable funding" (ASF) is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to one year. The amount of stable funding required ("Required stable funding") (RSF) of a specific institution is a function of the liquidity characteristics and residual maturities of the various assets held by that institution as well as those of its off - balance sheet (OBS) exposures.

The NSFR guidelines became effective Oct 1, 2021, and the bank has been monitoring the ratio at daily frequency starting Oct 1 and reporting to RBI on a quarterly basis. The minimum regulatory requirement as set out in the extant RBI guidelines is 100%.

The following tables sets out the un-weighted and weighted value of NSFR components as of September 30, 2025, June 30, 2025, March 31, 2025, December 31, 2024, and September 30, 2024. As of September 30, 2025
