PURCHASING OPTIONS

Affordable | Flexible

RG Robotix offers a variety of buying options designed to give our customers the purchasing solution that makes the most sense for them. From buying outright, to leasing, we have an option that will fit your needs, and at a price lower than our competitors.

Type

Details

Traditional Purchase

Buying outright from RG Robot's follows the traditional model of purchasing an item. Included in your purchase of an AGV(s)/AGF(s) are the following:

- All hardware (Robot(s) and additional parts)
- Installation, set-up and commission
- Software Suite
- Employee training

Rental (Try and Buy)

A try and buy is essentially a rental program where RG provides you with 1, base model AGV fulfilling a simple materials handling movement plan from A to B. The customer can utilize the rental AGV for 3 to 6 months, at which point the AGV must be returned or purchased outright.

Rental costs are applied to the buyout, should you choose to purchase.

RAAS (Robot As A Service)

*A buying
option unique
in the
automated
device industry*

RG's RAAS is essentially a standard leasing program. The lease is handled fully by RG Robotics - there are no third parties or leasing agencies involved. The general terms of the lease are as follows:

- The lease itself is 36 months
- The cost is simply an aggregate of the total buy out cost, divided by the 36 months
- This option includes all hardware and software needed
- This option does NOT include the cost for track installation or AGV(s)/AGF(s) set up, which will be quoted separately
- At the end of the 36 months, the customer either:
 - Owns the AGV(s)/AGF(s) outright
 - Or can turn the existing AGV(s)/(AGF(s) back to RG, at Blue Book Value, and receive an equal amount of brand-new ones
- NOTE: This option requires the purchase of the comprehensive Preventative Maintenance Program and the Extended Warranty, for insurance purposes.
