Why Hyperbaric Oxygen Therapy

Every cell in your body needs oxygen to function, repair, and thrive. With HBOT, you're not just breathing in more oxygen - you're absorbing it deeper, faster, and more effectively.

THE SCIENCE BEHIND HBOT

Hyperbaric Oxygen Therapy works by increasing atmospheric pressure while delivering 100% pure oxygen. This unique combination forces oxygen to dissolve directly into your blood plasma, cerebrospinal fluid, and lymphatic system - reaching areas that oxygen-carrying red blood cells simply cannot access under normal conditions

THE RESULT?

Up to 20 times more oxygen reaching your tissues, where healing and optimisation happen at the cellular level.

HBOT IS ONE OF THE MOST POWERFUL TOOLS IN THE WORLD FOR:

- ✓ ENHANCING PERFORMANCE
- ✓ ACCELERATING RECOVERY
- ✓ SUPPORTING BRAIN HEALTH
- ✓ BOOSTING LONGEVITY
- ✓ PROMOTING CELLULAR REPAIR

The PVHO Certification Difference

Many chambers on the market may look similar - but without proper certification, they can put both users and businesses at serious risk.

LEGAL REQUIREMENTS

In Australia and New Zealand, any hyperbaric chamber that operates above 1.5 ATA must comply with AS/NZS 4774 and be certified as a Pressure Vessel for Human Occupancy (PVHO) under international ASME standards.

CRITICAL SAFETY WARNING

If it's not PVHO-certified and claims to run at 2.0 ATA - it's not just misleading. It's illegal, unsafe, and non-compliant.

Regulatory bodies, insurers, and medical guidelines all align on this point: PVHO is non-negotiable at higher pressures.

THESE UNCERTIFIED CHAMBERS:

- ✗ ARE NOT RATED TO SAFELY HOLD PRESSURE ABOVE 1.5 ATA
- ✗ DO NOT ALLOW PROPER GAS HANDLING, PUTTING USERS AT RISK OF CO2 BUILDUP
- ✗ VOID WARRANTIES, LIABILITY INSURANCE, AND COMPLIANCE UNDER ANZ LAWS
- ✗ CAN LEAD TO SERIOUS INJURY OR LITIGATION IF OPERATED IMPROPERLY

Breathe Smarter with BIBS

Oxygen delivery isn't just about purity - it's about how it's delivered. That's why we use Built-In Breathing Systems (BIBS) in all Prime Platinum chambers.

Many chambers rely on simple nasal cannulas or basic oxygen masks, but these systems fall short when it comes to high-pressure therapy. BIBS technology represents the gold standard in hyperbaric oxygen delivery - a sophisticated system that ensures you receive pure oxygen while safely removing the carbon dioxide you exhale.

	BIBS TECHNOLOGY	OTHER SYSTEMS
CO2 SAFELY EXITS CHAMBER	✔ ONLY WITH BIBS	✗ NO SAFE EXIT
PRECISE O2 CONTROL	✔ BIBS AND REBREATHING MASKS	✗ NOT NASAL CANNULAS
HIGH-PRESSURE COMPATIBLE	✔ ONLY BIBS AND REBREATHING MASKS	✗ LIMITED COMPATIBILITY
CLEAN, DRY O2	✔ BIBS PREFERRED	⚠ VARIABLE QUALITY

Only BIBS delivers pure oxygen in, while forcing carbon dioxide out

Preserving oxygen concentration and protecting the user from CO2 buildup. This system is non-negotiable at higher pressures and longer session times.

Pressure Matters. Here's Why.

Not all hyperbaric chambers are created equal. Many budget systems on the market operate only at 1.3-1.5 ATA, offering marginal benefits but falling short of clinical-grade outcomes.

At Prime Platinum, our chambers are certified to operate at 2.0 ATA as standard, with an optional upgrade to 2.4 ATA for advanced protocols - making them among the most powerful wellness-grade systems legally and safely available.

ATMOSPHERIC PRESSURE VS O2 IN PLASMA:

PRESSURE LEVEL	OXYGEN IN BLOOD	PERFORMANCE IMPACT
1.0 ATA (NORMAL AIR)	~0.3 ML O2/100 ML BLOOD	BASELINE FUNCTION
1.3 ATA + 21% O2	~0.6 ML O2/100 ML BLOOD	MINIMAL IMPROVEMENT
2.0 ATA + ENRICHED O2 (STANDARD)	~4.4 ML O2/100 ML BLOOD	CLINICAL-GRADE RESULTS
2.4 ATA + ENRICHED O2 (UPGRADE)	~6.0 ML O2/100 ML BLOOD	ADVANCED PROTOCOLS

THIS ENHANCED PLASMA SATURATION DRIVES:

Up to 20 times more oxygen reaching your tissues, where healing and optimisation happen at the cellular level.

- ✓ FASTER RECOVERY FROM INJURY AND SURGERY
- ✓ IMPROVED BRAIN FUNCTION AND MOOD
- ✓ GREATER ENERGY, ENDURANCE, AND PERFORMANCE
- ✓ CELLULAR REPAIR AND ANTI-INFLAMMATORY EFFECTS

Who's Using Our Chambers?

Bryan Johnson used our chamber for 60 sessions over 90 days as part of his performance and longevity protocol.

Professional Applications

HIGH-END CLINICS

High-end clinics across Australia and NZ use our systems for recovery, brain health, and performance

ELITE ATHLETES

Elite athletes and sports teams for competitive advantage

MEDICAL PRACTITIONERS

Medical practitioners integrating HBOT into treatment protocols

Personal Wellness

PRIVATE HOMES

Private homes are installing our chambers to integrate HBOT into their wellness routine

EXECUTIVES & PROFESSIONALS

Executives and professionals seeking cognitive enhancement

WELLNESS ENTHUSIASTS

Wellness enthusiasts focused on longevity and optimization

The Prime Platinum Difference

PRIME
P L A T I N U M

Medical-Grade Excellence

MEDICAL-GRADE CERTIFICATION

Medical-grade certification (ASME-PVHO, CE, ISO, AS/NZS 4774 compliant)

BUILT-IN BREATHING SYSTEMS

Built-In Breathing Systems (BIBS) for safe, efficient oxygen therapy

2.0 ATA STANDARD

2.0 ATA standard, 2.4 ATA optional pressure capabilities

Premium Quality & Support

MODULAR, LUXURY FINISH

Modular, luxury finish suitable for clinics or homes

LOCAL SERVICE

Local service, support, and training throughout ANZ and Asia

PROVEN TRACK RECORD

Proven track record with leading wellness facilities

Investment Protection

COMPREHENSIVE WARRANTY

Comprehensive warranty and service programs

REGULATORY COMPLIANCE

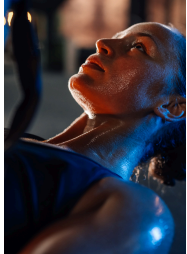

Regulatory compliance ensuring legal operation

INSURANCE COMPATIBILITY

Insurance compatibility for peace of mind

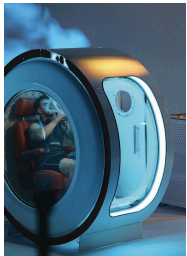

Health Benefits & Applications

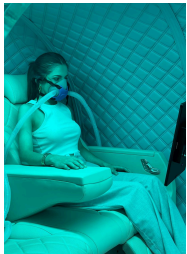

Performance Enhancement

- ✓ INCREASED ENERGY AND ENDURANCE
- ✓ FASTER WORKOUT RECOVERY
- ✓ ENHANCED ATHLETIC PERFORMANCE
- ✓ IMPROVED PHYSICAL RESILIENCE

Cognitive & Mental Health

- ✓ BETTER BRAIN FUNCTION AND CLARITY
- ✓ IMPROVED MOOD AND MENTAL WELLBEING
- ✓ ENHANCED FOCUS AND CONCENTRATION
- ✓ SUPPORT FOR NEUROLOGICAL HEALTH

Recovery & Healing

- ✓ ACCELERATED INJURY RECOVERY
- ✓ POST-SURGICAL HEALING SUPPORT
- ✓ REDUCED INFLAMMATION
- ✓ ENHANCED CIRCULATION

Longevity & Wellness

- ✓ CELLULAR REPAIR AND REGENERATION
- ✓ ANTI-AGING BENEFITS
- ✓ IMMUNE SYSTEM SUPPORT
- ✓ OVERALL VITALITY ENHANCEMENT

Technical Specifications

Chamber Performance

OPERATING PRESSURE:

2.0 ATA standard (2.4 ATA optional)

OXYGEN DELIVERY:

100% pure oxygen via BIBS

SAFETY SYSTEMS:

Emergency depressurization protocols

SESSION DURATION:

Typically 60-90 minutes

Certification & Compliance

ASME-PVHO CERTIFIED

ASME-PVHO Certified for pressure vessel safety

AS/NZS 4774 COMPLIANT

AS/NZS 4774 Compliant for Australian/NZ regulations

CE, ISO STANDARDS

CE, ISO Standards for international quality

MEDICAL-GRADE

Medical-grade construction for clinical applications

Installation & Support

INSTALLATION

Professional installation included

TRAINING

Comprehensive training for operators

SUPPORT

Ongoing technical support available

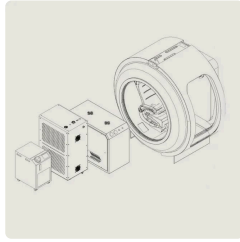

LOCAL SERVICE

Local service network throughout ANZ

Our Range of HBOT Chambers

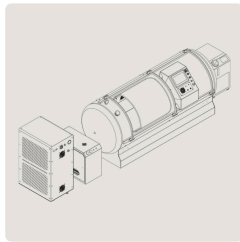

We offer a variety of HBOT chambers designed to meet different needs, from individual therapy to group sessions. Each chamber is engineered with advanced technology and safety features to ensure optimal results.

ZEUGMA

ONE PERSON

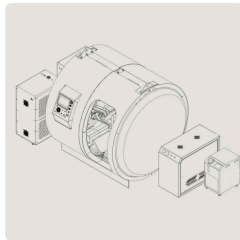

Discover Zeugma - the hyperbaric chamber designed with a central focus on user experience, personal space, visibility, and interior comfort. Built with medical-grade technology, for safe and effective wellness sessions, the soul of APEX is centered on ergonomics and aesthetics.

TROJAN

ONE PERSON

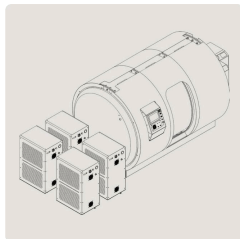

Lie back inside the chamber and breathe pure, revitalising oxygen under controlled high-pressure conditions. The Trojan hyperbaric chamber, certified for medical applications, is designed for user comfort and provides the optimal hyperbaric oxygen therapy (HBOT) environment.

ATLANTIS

TWO PERSON

Experience the profound health benefits of breathing pure oxygen through the Built-In Breathing System (BIBS) - regulated by the tempo of your breath. This system helps both people receive the optimal level of oxygen for the most effective results with hyperbaric oxygen therapy.

MEDITERRANEAN

FOUR PERSON

The 4-seater Mediterranean hyperbaric chamber system has transparent double acrylic windows to enhance interior comfort and promote a relaxing oxygen breathing session, including human connection, and team spirit during therapy.

Customise your chamber with any colour combo you like.

Your Investment in a Better Future

When you choose a hyperbaric chamber, you're not simply buying a metal tube - you're making a profound investment in your future self. You're investing in:

✓ PEACE OF MIND THROUGH PROPER CERTIFICATION AND SAFETY

✓ SCIENTIFIC OUTCOMES BACKED BY MEDICAL-GRADE TECHNOLOGY

✓ A LONGER, HIGHER-PERFORMING LIFE THROUGH PROVEN THERAPY

This decision will impact every aspect of your wellness journey for years to come. Choose a partner who understands that your health deserves nothing less than the highest standards of safety, efficacy, and support.

We've done the research, partnered with the best, and built the safest, most effective HBOT systems in Australia and New Zealand.

**Live Better for Longer.
With Confidence.**

Ready to Experience HBOT?

Whether you're a clinic looking to expand services, an athlete seeking competitive advantage, or an individual investing in long-term wellness, Prime Platinum has the right solution.
