

# Home Performance Plus

## Get your rebates while you can.

### Introducing SCE's Home Performance Plus Program

The Home Performance Plus program is offered to Southern California Edison residential electric customers in a California state defined disadvantaged or hard to reach community. Through this program, customers can receive a no-cost energy assessment of their home, enhanced rebates for energy-saving upgrades and free, one-on-one guidance on improving their home's energy efficiency. Contractors can also offer incentives direct to customers without an energy assessment.

## What can Home Performance Plus offer me?

Through the Home Performance Plus program, you can offer your customers enhanced rebates. These may be combined with incentives from the TECH Clean California initiative and other locally funded programs. Below are a few examples of the rebates available:

Get up to \$1,350 off  
your HPWH installations  
(3.30 UEF or greater)

Get up to \$667/ton  
for split/package Heat  
Pump Replacements

\$424 when replacing a  
range with an  
induction cooktop

\$1.07/sq. ft for home  
insulation

Cannot be layered with Comfortably CA, Golden State Rebates, CA Smart Homes, or SoCal REN projects.\*

## Start saving today.

Scan the code to sign up for your free Home Energy Assessment, visit [HomePerformancePlusCA.com](http://HomePerformancePlusCA.com) or call 888-662-1637.
