

Welcome to Aspire & Achieve

At JEP Youth Engagement, we have meticulously developed a dynamic and engaging enrichment curriculum designed to equip young people with essential life skills, foster creativity, boost knowledge of cultural capital, and enhance personal development. Through a diverse range of activities covering life skills, sports, creativity, outdoor pursuits, and practical craft, we offer a holistic pathway to empowerment and personal growth. Our approach is built on a foundation of careful planning, commitment to excellence, and a deep understanding of the unique needs of our students.

Young people are referred to JEP because our provision offers an appropriate and personalised approach. While academic progress is important for all young people, it is just one part of our wider vision. We focus on improving attendance, increasing engagement, and encouraging better behaviour choices, believing that once these are in place, academic success will naturally follow in the correct provision for each learner.

Our staff team in the Aspire and Achieve pathway are a dedicated and enthusiastic group, with a wide variety of life experiences and a passion for improving the life chances of all young people. Our team have experience in juvenile secure facilities, social care, community coaching and content development (to name but a few) and create individualised sessions to inspire and engage young people.

Our work in the Aspire and Achieve team centers around relationships and fostering a positive environment for everyone to thrive and progress. Working closely with families, schools and the Local Authority JEP works collaboratively to build a platform for better life choices.

We warmly welcome you to our community.

Andrew Caunce

Head of Aspire & Achieve
