

Welcome to MY Future

Welcome to MY Future, JEP Youth Engagement's dedicated enrichment and mentoring programme, empowering young people to define and build their next chapter.

Our MY Future Enrichment Pathway strives to provide every young person with the opportunity and purpose they deserve, through mentoring support and enriching experiences that take place beyond the classroom.

Our key drivers to engagement are:

- **Inspiring Aspiration and Hope:** Helping young people to look beyond their current challenges and re-engage at a pace that is right for them
- **Building Life Skills:** Encouraging our young people to develop the practical, social and emotional tools required for their next steps in education, employment, training and beyond
- **Targeted Progression:** Each young person's programme is specific to their ILP/EHCP targets, ensuring progress is specific, measurable and achievable for their level of need.
- **Championing Inclusion:** Our team have extensive experience working with those that present with special educational needs, complex lives and barriers to engagement.
- **Relational Support:** One-to-one guidance, mentoring, goal setting and consistent encouragement from our team of MY Future Learning Support Mentors.

Each young person who joins the MY Future Pathway is met with respect, belief, and a tailored plan. Our My Future Learning Support Mentors work closely with families, schools and external partners to ensure that every placement is cohesive, supportive, and specific to the individual needs and developmental targets of each young person that we work with.

We know that success looks very different for each of our young people – For some it may be building the confidence to leave home and engage in their community, for others it may be writing their CV. No matter where our young people are in their education journey, we're here to provide close support, because "**MY Future is where potential meets possibility.**"

We look forward to working with you!

Gary Smith

Care, Respite & MY Future Manager
