We evaluated your image and cropped it to fill the placement when we think it may perform better. You can edit these crops for each placement.

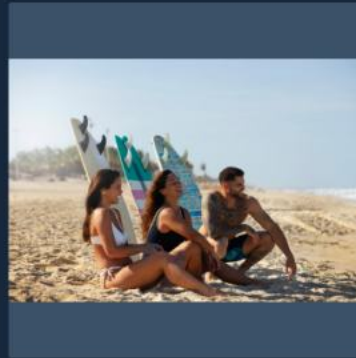

- ✓ **Turn on flexible media to show media that you chose for a specific aspect ratio across all placements.** Media may be cropped to fit certain placements and will be shown when likely to improve performance. You can turn this off at any time.

⚠ Customized Assets Limitation

Creatives with customized assets are not compatible with the Instant Form you selected in the first step. Therefore, the 'Replace' button is disabled.

Recommendations

- **Keep ad copy short:** Primary text should span 1-3 lines at most.
- **Communicate what you want people to do:** Communicating what you want people to do at a glance is the most important goal of your ad. All of your text should be developed with this goal in mind. A range of call-to-action buttons are available, depending on your business goals.
- Text in your ad may be truncated if it exceeds the character limitation. The recommended text length for most placements is 125 characters for the Primary text field, 40 characters for the Headline field and 25 characters for the Description field. However, your text may be further truncated across various placements and devices. We recommend keeping your text as short as possible to limit truncation.
