INTRODUCTION

Spekter Games is a new kind of game publisher, one that blends the best of Web2 and Web3 to supercharge the gaming experience for mainstream players.

Our mission is simple: bring the benefits of Web3 to the next billion gamers, without the friction or complexity that has limited adoption so far.

To achieve this, we separate what makes games great from what makes Web3 powerful:

- **The game experience remains fully Web2** — high-quality, free-to-play, and accessible to anyone with no wallets, tokens, or crypto onboarding required.
- **The reward experience leverages Web3** — players can seamlessly earn digital collectibles and tokens as they play, share, and compete.

This separation enables us to deliver games that feel native to mainstream players while introducing the value and ownership of Web3 in a way that feels effortless.

We believe the next wave of gaming will happen on superapps like Telegram and LINE, platforms with massive reach, built-in social graphs, and payment features that can onboard millions instantly. Our strategy is to build and publish great games on these platforms and reward players directly with on-chain assets that they earn, not buy.

This requires both world-class game development and publishing expertise, and the seamless integration of on-chain reward systems. Our team has done this before and now we're doing it again with Spekter.

SUSTAINABLE, FUN, AND FAIR. That's how we're redefining game publishing for the next generation.

SPARK, COLLECTIBLES, AND \$SPEK

SPARK IS THE HEART OF THE SPEKTER ECOSYSTEM: **A LOYALTY SYSTEM** THAT REWARDS PLAYERS FOR THEIR ENGAGEMENT AND CONTRIBUTIONS.

Earn Sparks by playing our games, completing missions, and helping grow the community. Sparks can only be earned and not bought, ensuring a fair and level playing field.

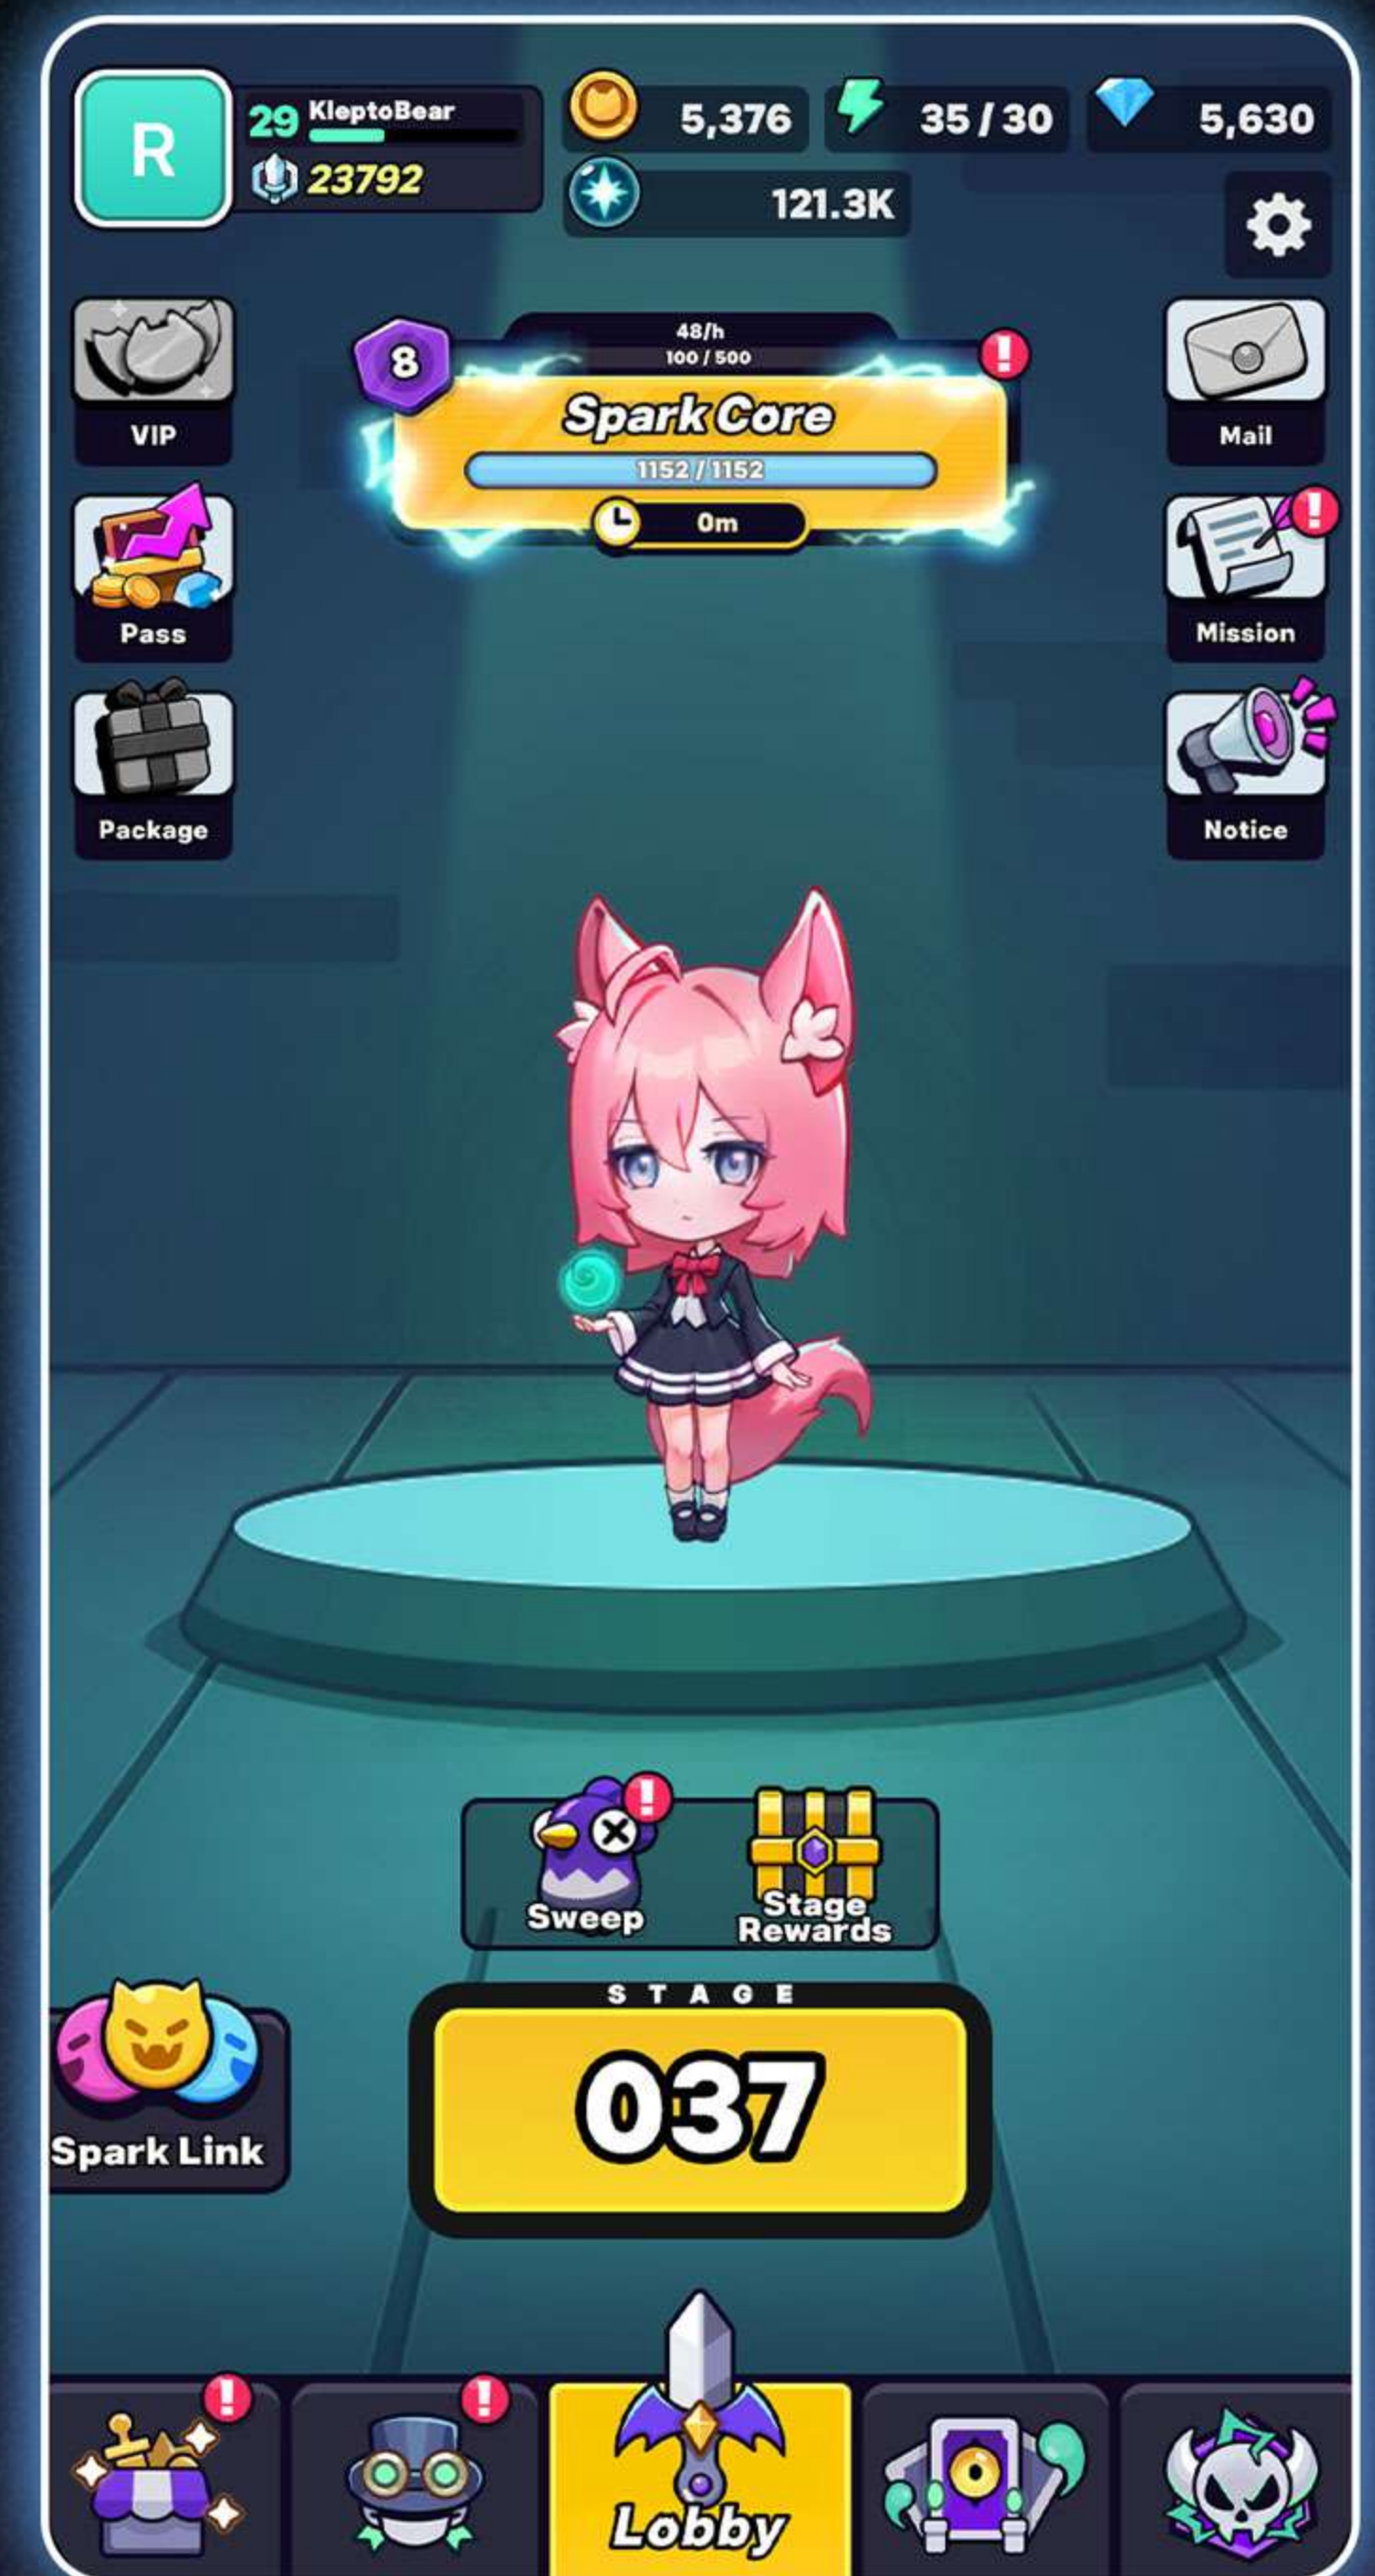

At the end of each Season, top Spark earners receive Spek Vaults, digital collectibles that unlock ecosystem benefits through a Collector Score system. These benefits include:

- Early access to new games
- Premium currency bonuses
- Spark multipliers
- Exclusive cosmetics
- Access to special tournaments

At Spekter Games, we envision a community that is rewarded for their play and their contributions to the growth of the ecosystem. The core of this belief is manifested in our native token: **\$SPEK**. This is a **loyalty token**, designed for the community and for the players.

We want to reward our most dedicated players with \$SPEK as a way to say thank you, while improving key growth metrics. But unlike the typical airdrops seen in many Web3 games, we are taking a different approach. One that is more innovative, engaging, and sustainable. By tying \$SPEK to meaningful progression and social actions, we leverage token incentives to increase long-term retention, boost community activity, and encourage social sharing.

Read on to find out more.

EARNING SPARK

Sparks cannot be purchased, it can only be earned. Every Spark earned reflects your effort, your consistency, and your impact across the ecosystem. This is how we keep the field even and the community fair: everyone starts with the same opportunity, but how far you go depends on you!

You can earn Sparks through multiple ways:

PLAY

Play Spekter Agency (and our future games) to passively earn Sparks from Spark Core, your always-on Spark generator. Spark Core continues producing Spark even when you're offline, and its earning rate increases as you clear higher stages in the game.

MISSIONS

Complete special missions in the game to earn Spark.

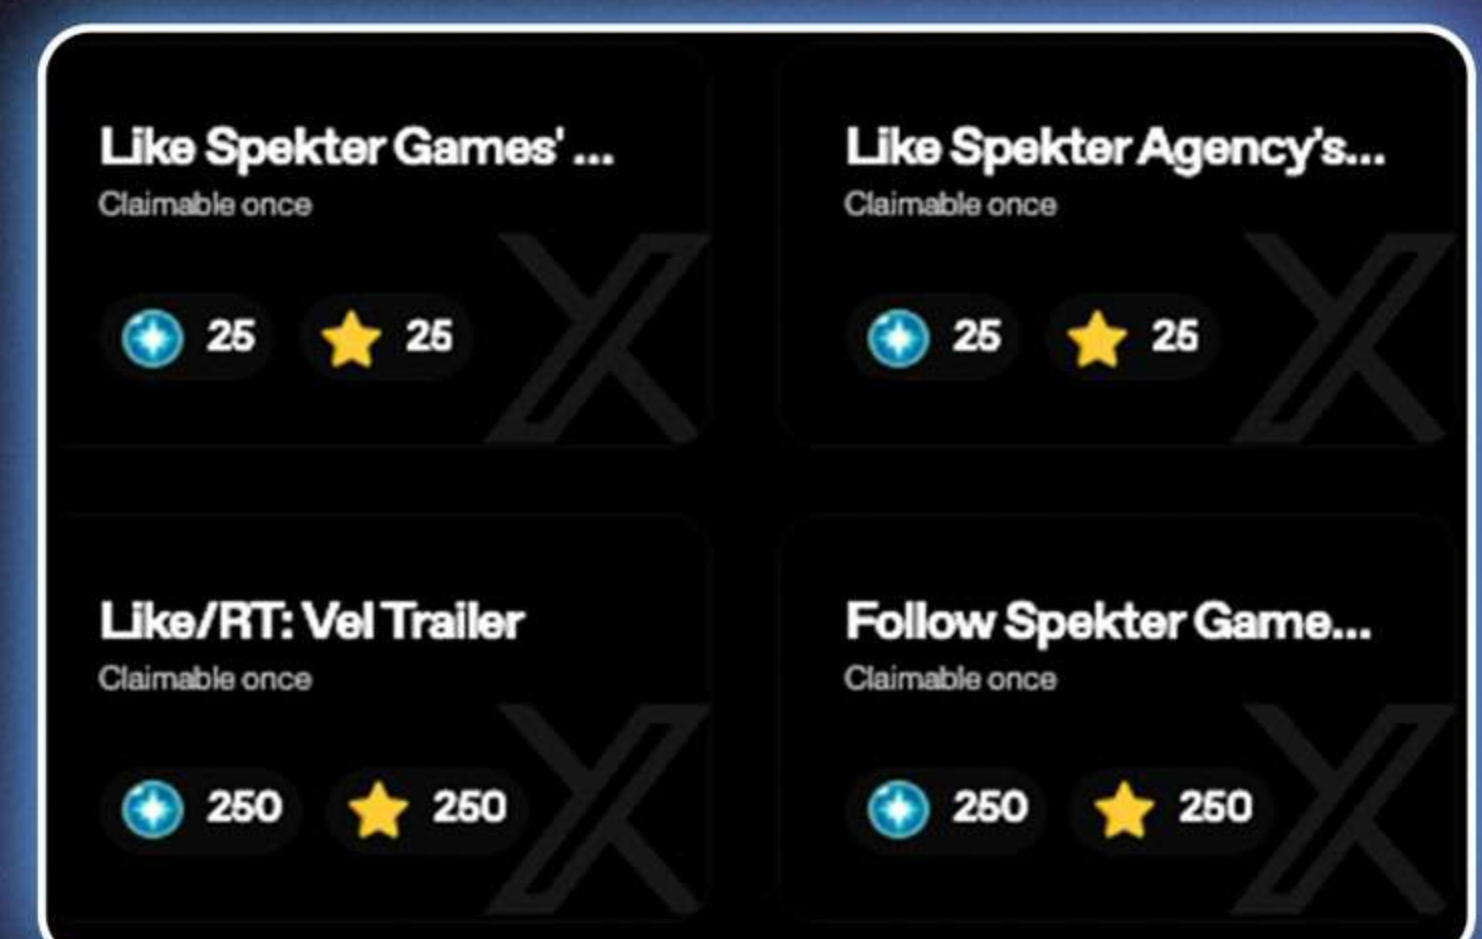

INVITE FRIENDS

You'll earn Spark instantly for every new recruit. But it doesn't stop there. As your recruits progress and reach higher stages, your Spark flow amplifies alongside theirs.

DISPATCH

Join the Dispatch Program and become a voice for the community. By spreading the word about Spekter Agency and our future titles across the community and beyond, you'll earn Spark for every ripple you create.

LEADERBOARDS AND SPEK VAULTS

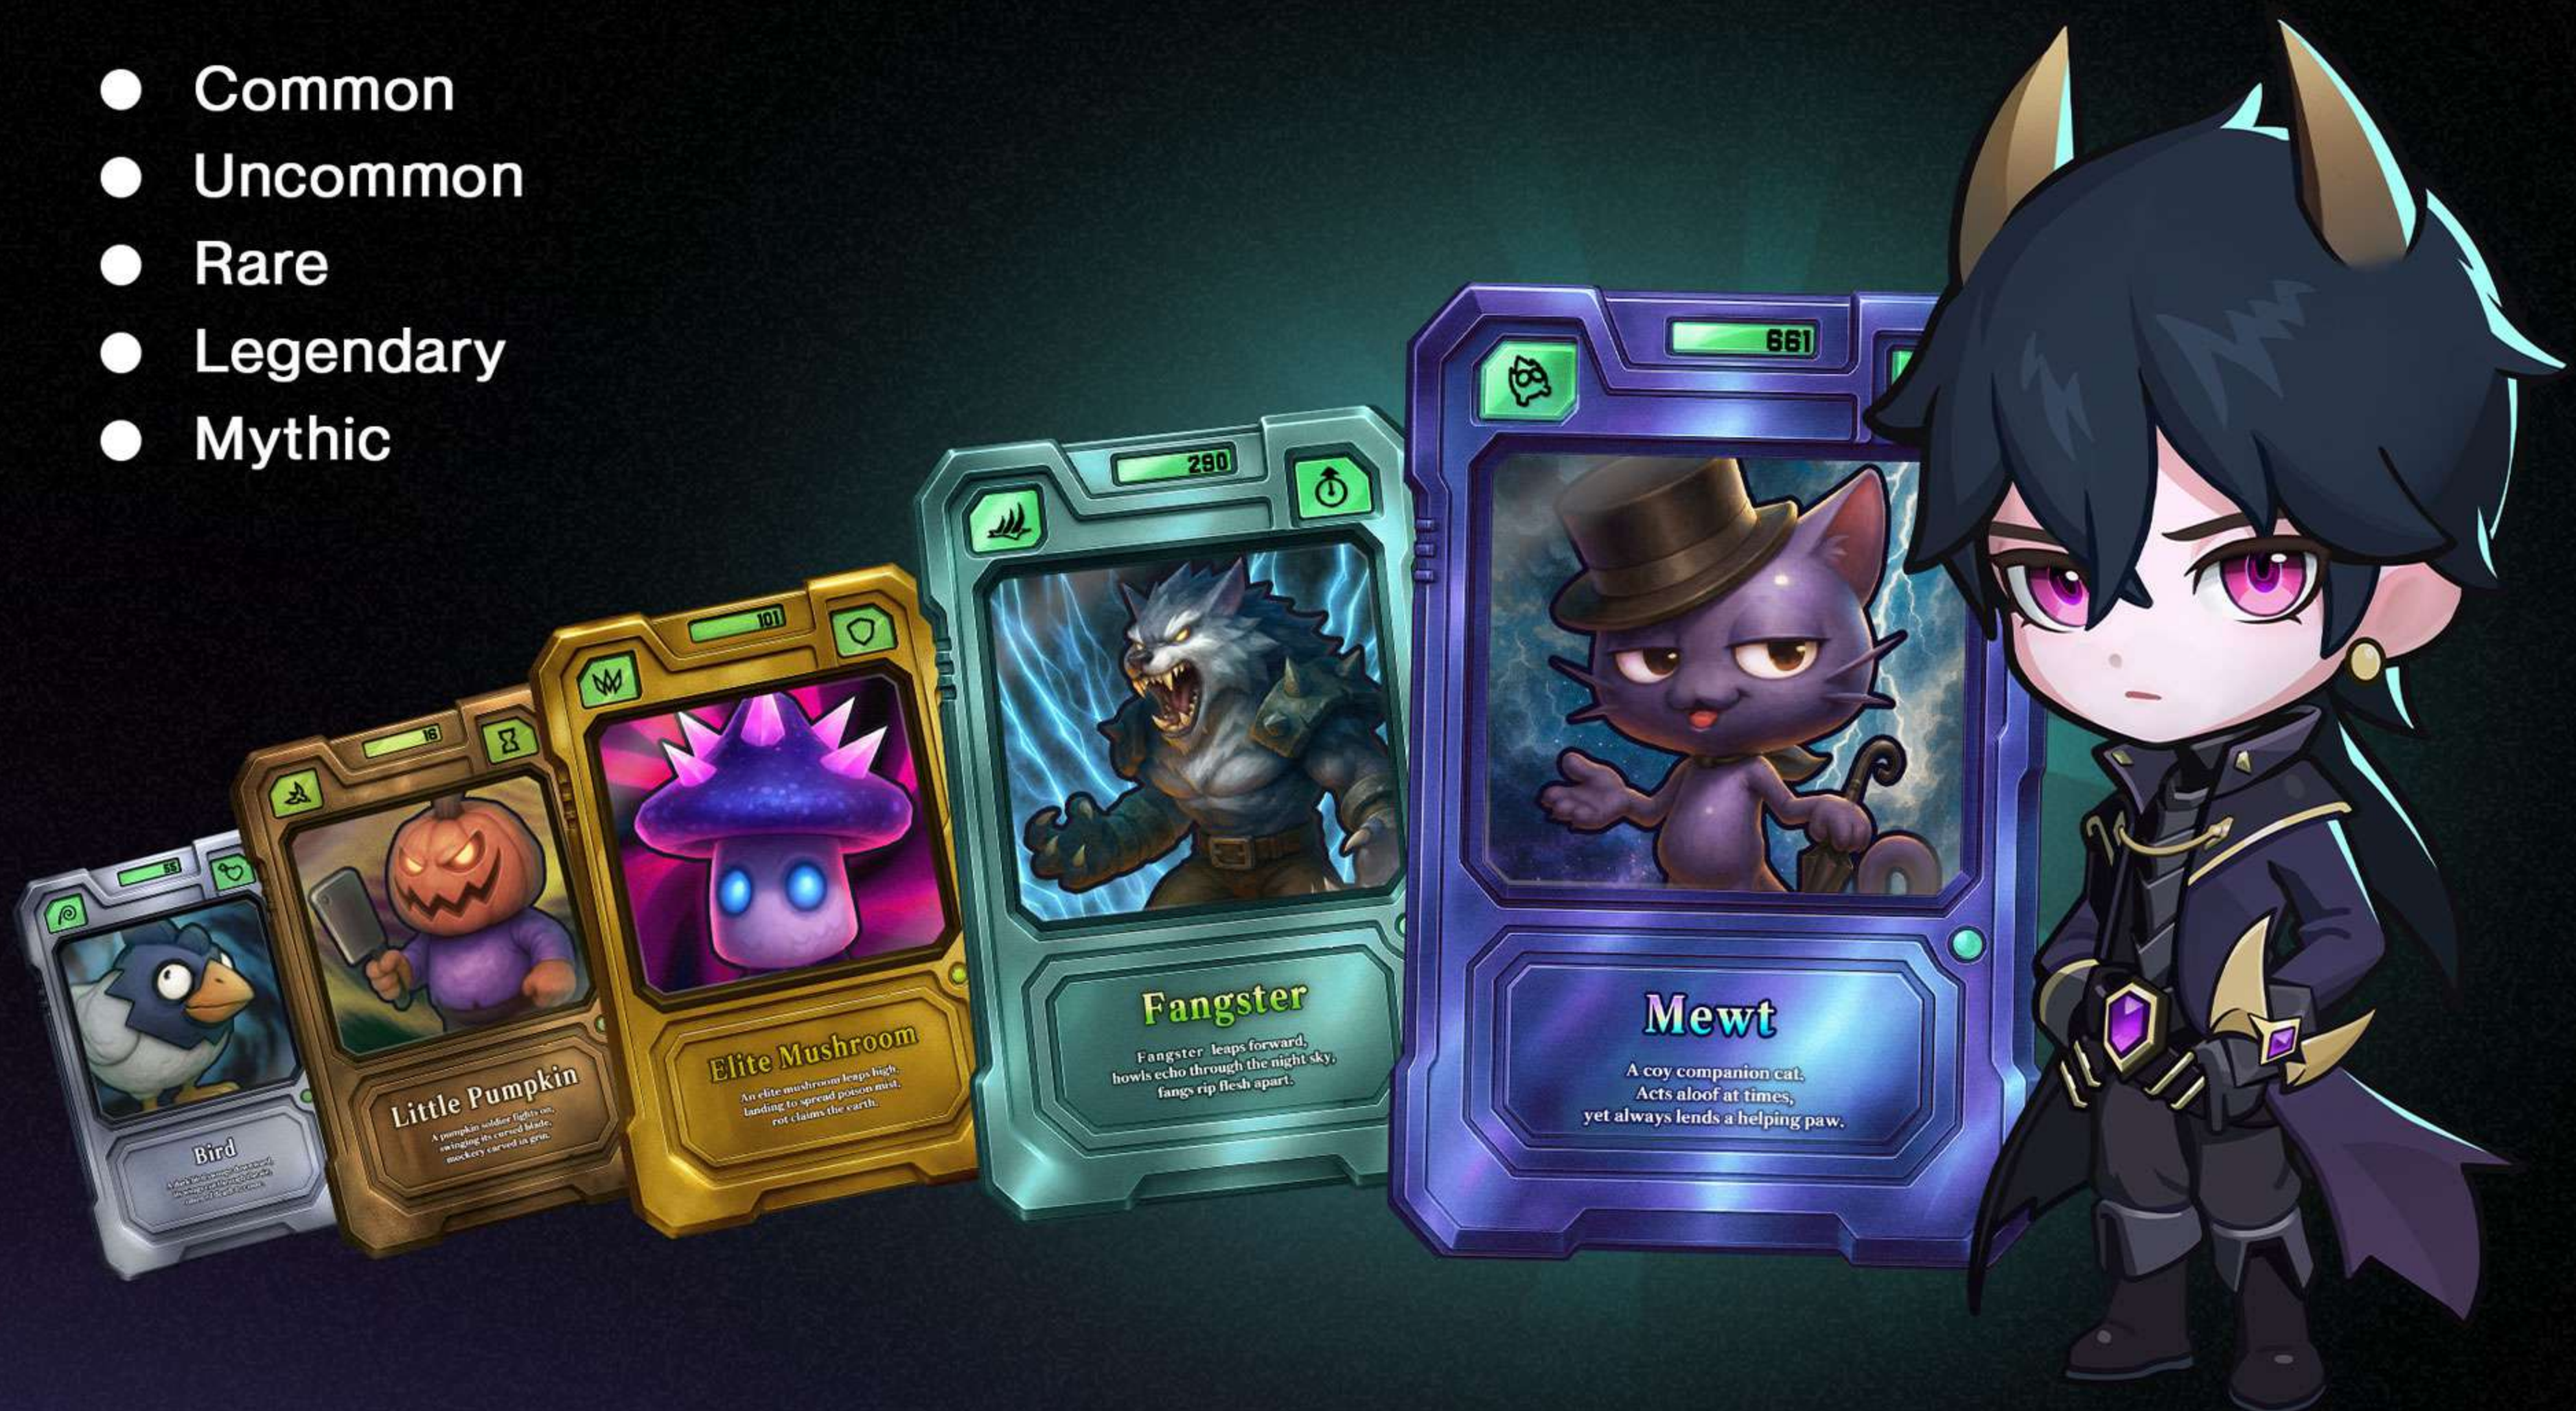

Every single Spark you earn contributes to your position on the global Spark leaderboard. At the end of every season, players are rewarded for their dedication with Spek Vaults – digital collectibles that unlock powerful ecosystem benefits. These Vaults open the door to exclusive perks, priority access, and enhanced rewards across the Spekter universe.

In addition to these benefits, each Spek Vault is powered by **\$SPEK**. They come pre-loaded with \$SPEK, granting top players with real, on-chain rewards that tie directly into the wider Spekter ecosystem. Players can retrieve the \$SPEK inside by burning their Spek Vaults.

RARITY TIERS

Your final leaderboard position at the end of every season determines the rarity of the Spek Vaults you can claim. Spek Vaults come in five rarity tiers:

- Common
- Uncommon
- Rare
- Legendary
- Mythic

Higher-rarity Spek Vaults contain larger amounts of \$SPEK and grant higher Collector Scores, making them significantly more desirable.

COLLECTOR SCORE

Each Spek Vault comes with a Collector Score, and the amount varies based on its rarity. Your total Collector Score is the sum of all the Spek Vaults you hold in your wallet.

This total score is an important metric, as it determines your Membership Tier, which we'll cover in the next section. As you collect more Vaults or earn higher-rarity ones, your Collector Score grows, unlocking deeper ecosystem benefits.

SEASONS

Each season lasts three months and introduces a new Collector of Spek Vaults with refreshed artwork and designs. If you don't qualify for the top of the leaderboard, don't fret! Most players will have a chance to win Spek Vaults regardless of where they place - but the amount of Spark you have is your odds of winning the digital collectible. The more Spark you earn, the more likely you are to win Spek Vaults at the end of the season!

In the Spekter ecosystem every Spark matters, every season is a fresh start, and every player has the opportunity to earn real rewards.

LEADERBOARD ENDS IN

SEASON 1 29d 23:57:30

Top 5,000 players receive a Spekter Badge NFT, containing redeemable tokens and gameplay boosts.

Distribution: Mythic x125 Legendary x375

RANK	PLAYER	SPARKS
#256	blinc	123,456
#1	whirlwind	10,000
#1	star_gazer	10,000
#1	steel_falcon	10,000
#1	lone_wolf	10,000
#1	shadow_dancer	10,000
#1	night_hawk	10,000

[Rank](#) [Badges](#) [Profile](#)

ECOSYSTEM REWARDS

The higher your Collector Score, the more ecosystem rewards you'll earn. To qualify for increasingly valuable ecosystem rewards, you'll need to increase your Collector Score: the combined value of all of Spek Vaults in your Collector. Think of it like airline status: from **Bronze** → **Silver** → **Gold** → **Platinum** → **Opalescent**, each tier of membership unlocks exponentially greater benefits.

Only members receive ecosystem rewards, and higher-tier members receive significantly enhanced perks, bonuses, and opportunities. The more you play and the more collectibles you earn, the higher your tier climbs, and the more the ecosystem opens to you.

Play well, collect well, and rise through the ranks to unlock:

SPARK MULTIPLIERS

High-ranking members get bonus multipliers on Spark gained from daily and various missions, accelerating your Spark Collector.

PREMIUM CURRENCY BONUSES

Your dedication pays off. Members receive bonus premium currency on every purchase within the Spekter ecosystem, with increasing bonuses at higher membership tiers.

EXCLUSIVE COSMETICS

Unlock exclusive morphs, cosmetics, and style upgrades reserved for members only, with top-tier members receiving the rarest drops and earliest access.

PREMIUM TOURNAMENTS

Compete in exclusive, high-stakes tournaments reserved for members only. Higher tier members get priority entry, exclusive brackets, and bigger reward pools.

EARLY ACCESS

Members gain early access to upcoming Spekter titles like *Spekter City* and future releases. Higher tiers enter earlier, giving them a head start in new worlds and new Spark-earning opportunities.

HOLD OR BURN – YOUR STRATEGIC CHOICE

To qualify for all the Spekter Games' ecosystem rewards, you'll need a high Collector Score, gained by having Spek Vaults in your account. These Vaults are powered by the \$SPEK contained inside, which can only be retrieved by burning the Vaults.

Thus, the players have the ultimate choice:

- **Hold Spek Vaults** to boost your Collector Score, climb into higher Membership Tiers, and unlock stronger ecosystem rewards.

- **Burn Spek Vaults** to unlock the \$SPEK inside, but reduce the Collector Score and lose the ecosystem rewards.

\$SPEK TOKEN

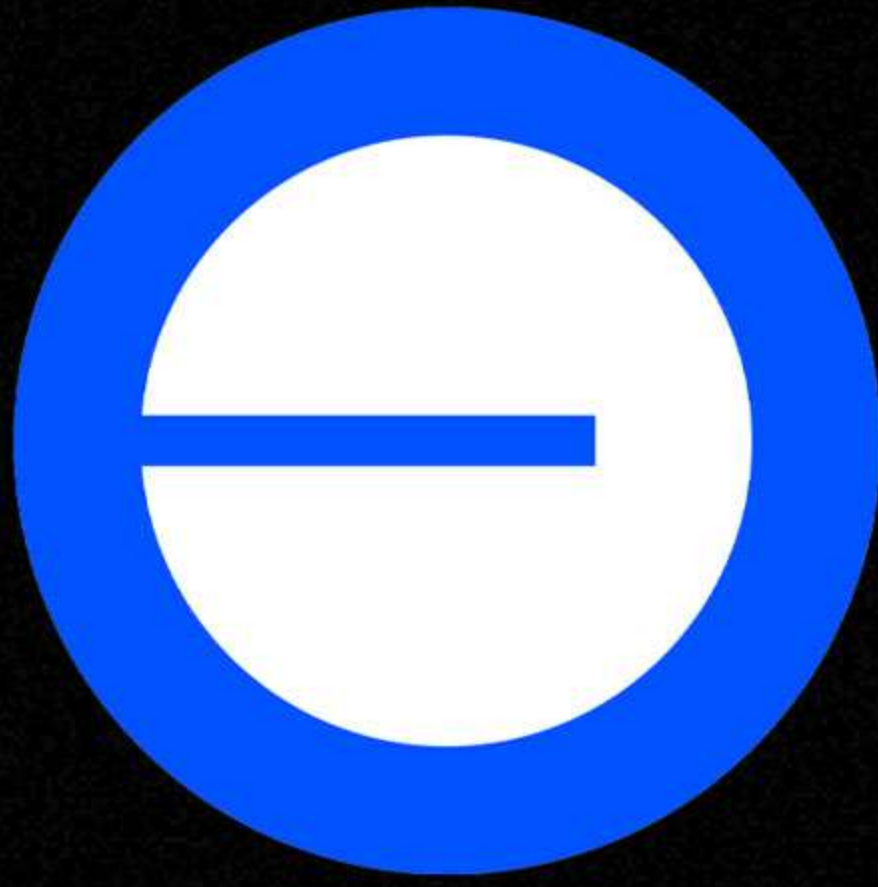

\$SPEK is the community loyalty token that powers the Spekter ecosystem. Its primary utility comes from the Membership system, where players must hold Spek Vaults, each containing locked \$SPEK, to access powerful in-game and ecosystem benefits. Because burning a Spek Vault to retrieve the \$SPEK inside reduces Membership Tiers, players are incentivized to hold Vaults and maintain or grow their Membership Tier over time.

To support ongoing gameplay and maintain a baseline economic role for \$SPEK as a loyalty and rewards asset, a portion of player spend from in-game purchases (IAP) will be allocated in ways intended to support a more stable reference price of \$SPEK. Another portion of player spend will be used to repurchase \$SPEK for the purpose of replenishing future Spek Vault reward pools and ensuring availability of long-term rewards, while reducing the circulating supply in the meantime. This creates a sustainable gameplay loop: Web2 players generate spend through normal gameplay, and those in-game economics help maintain rewards flows and long term participation opportunities for players who choose to interact with the reward layer. Importantly, Web2 players are never forced into Web3; they can enjoy the full game experience without touching tokens, but can opt into the reward layer whenever they choose.

MULTI-CHAIN DEPLOYMENT

To deliver the best experience for both mainstream gamers and Web3-native users, we've intentionally separated the token layer from the collectible layer, deploying each on the chain that is best suited for its purpose.

\$SPEK ON BASE

\$SPEK is deployed on Base, chosen for its:

- Deep liquidity and strong on-chain economy
- Fast, low-cost transactions
- Security and reliability backed by the broader Ethereum ecosystem
- Developer-friendly infrastructure and strong support for composability
- Rapidly growing user base and ecosystem alignment with gaming and consumer apps
- Plan to make all Base tokens tradable on Coinbase

Base provides the most robust environment for the \$SPEK token itself, ensuring liquidity, accessibility, and long-term stability as the central asset of the Spekter ecosystem.

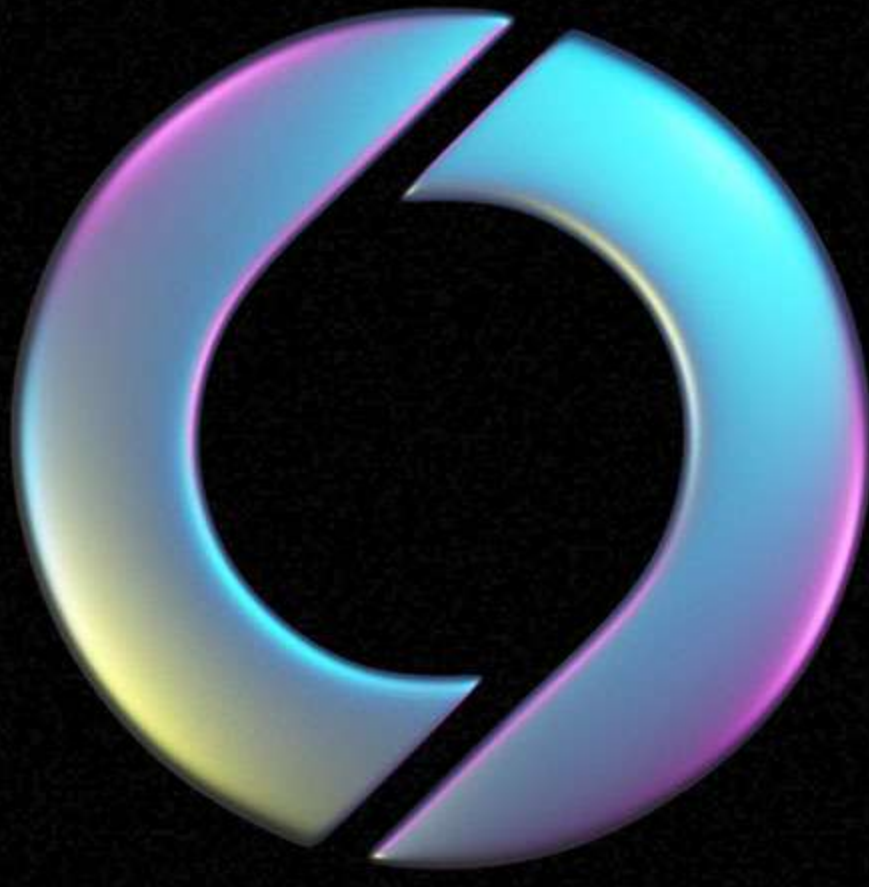

SPEK VAULTS ON TON (TELEGRAM)

For players on Telegram, Spek Vaults are minted on TON, the native blockchain integrated into the Telegram app. This enables a frictionless experience for players on Telegram:

- Telegram's built-in TON Wallet allows players to receive digital collectibles instantly, without the friction of setting up and connecting external wallets.
- The game on Telegram can directly and seamlessly read a player's wallet to determine their Spek Vaults, Collector Score, and Membership Tier, enabling smooth in-game benefits.
- TON is optimized for high-volume, lightweight digital assets, making it ideal for mobile-first gaming targeting mass market gamers.

This ensures that mainstream Telegram users, and Web2 gamers — who may be new to Web3 — can receive on-chain and in-game rewards effortlessly and safely.

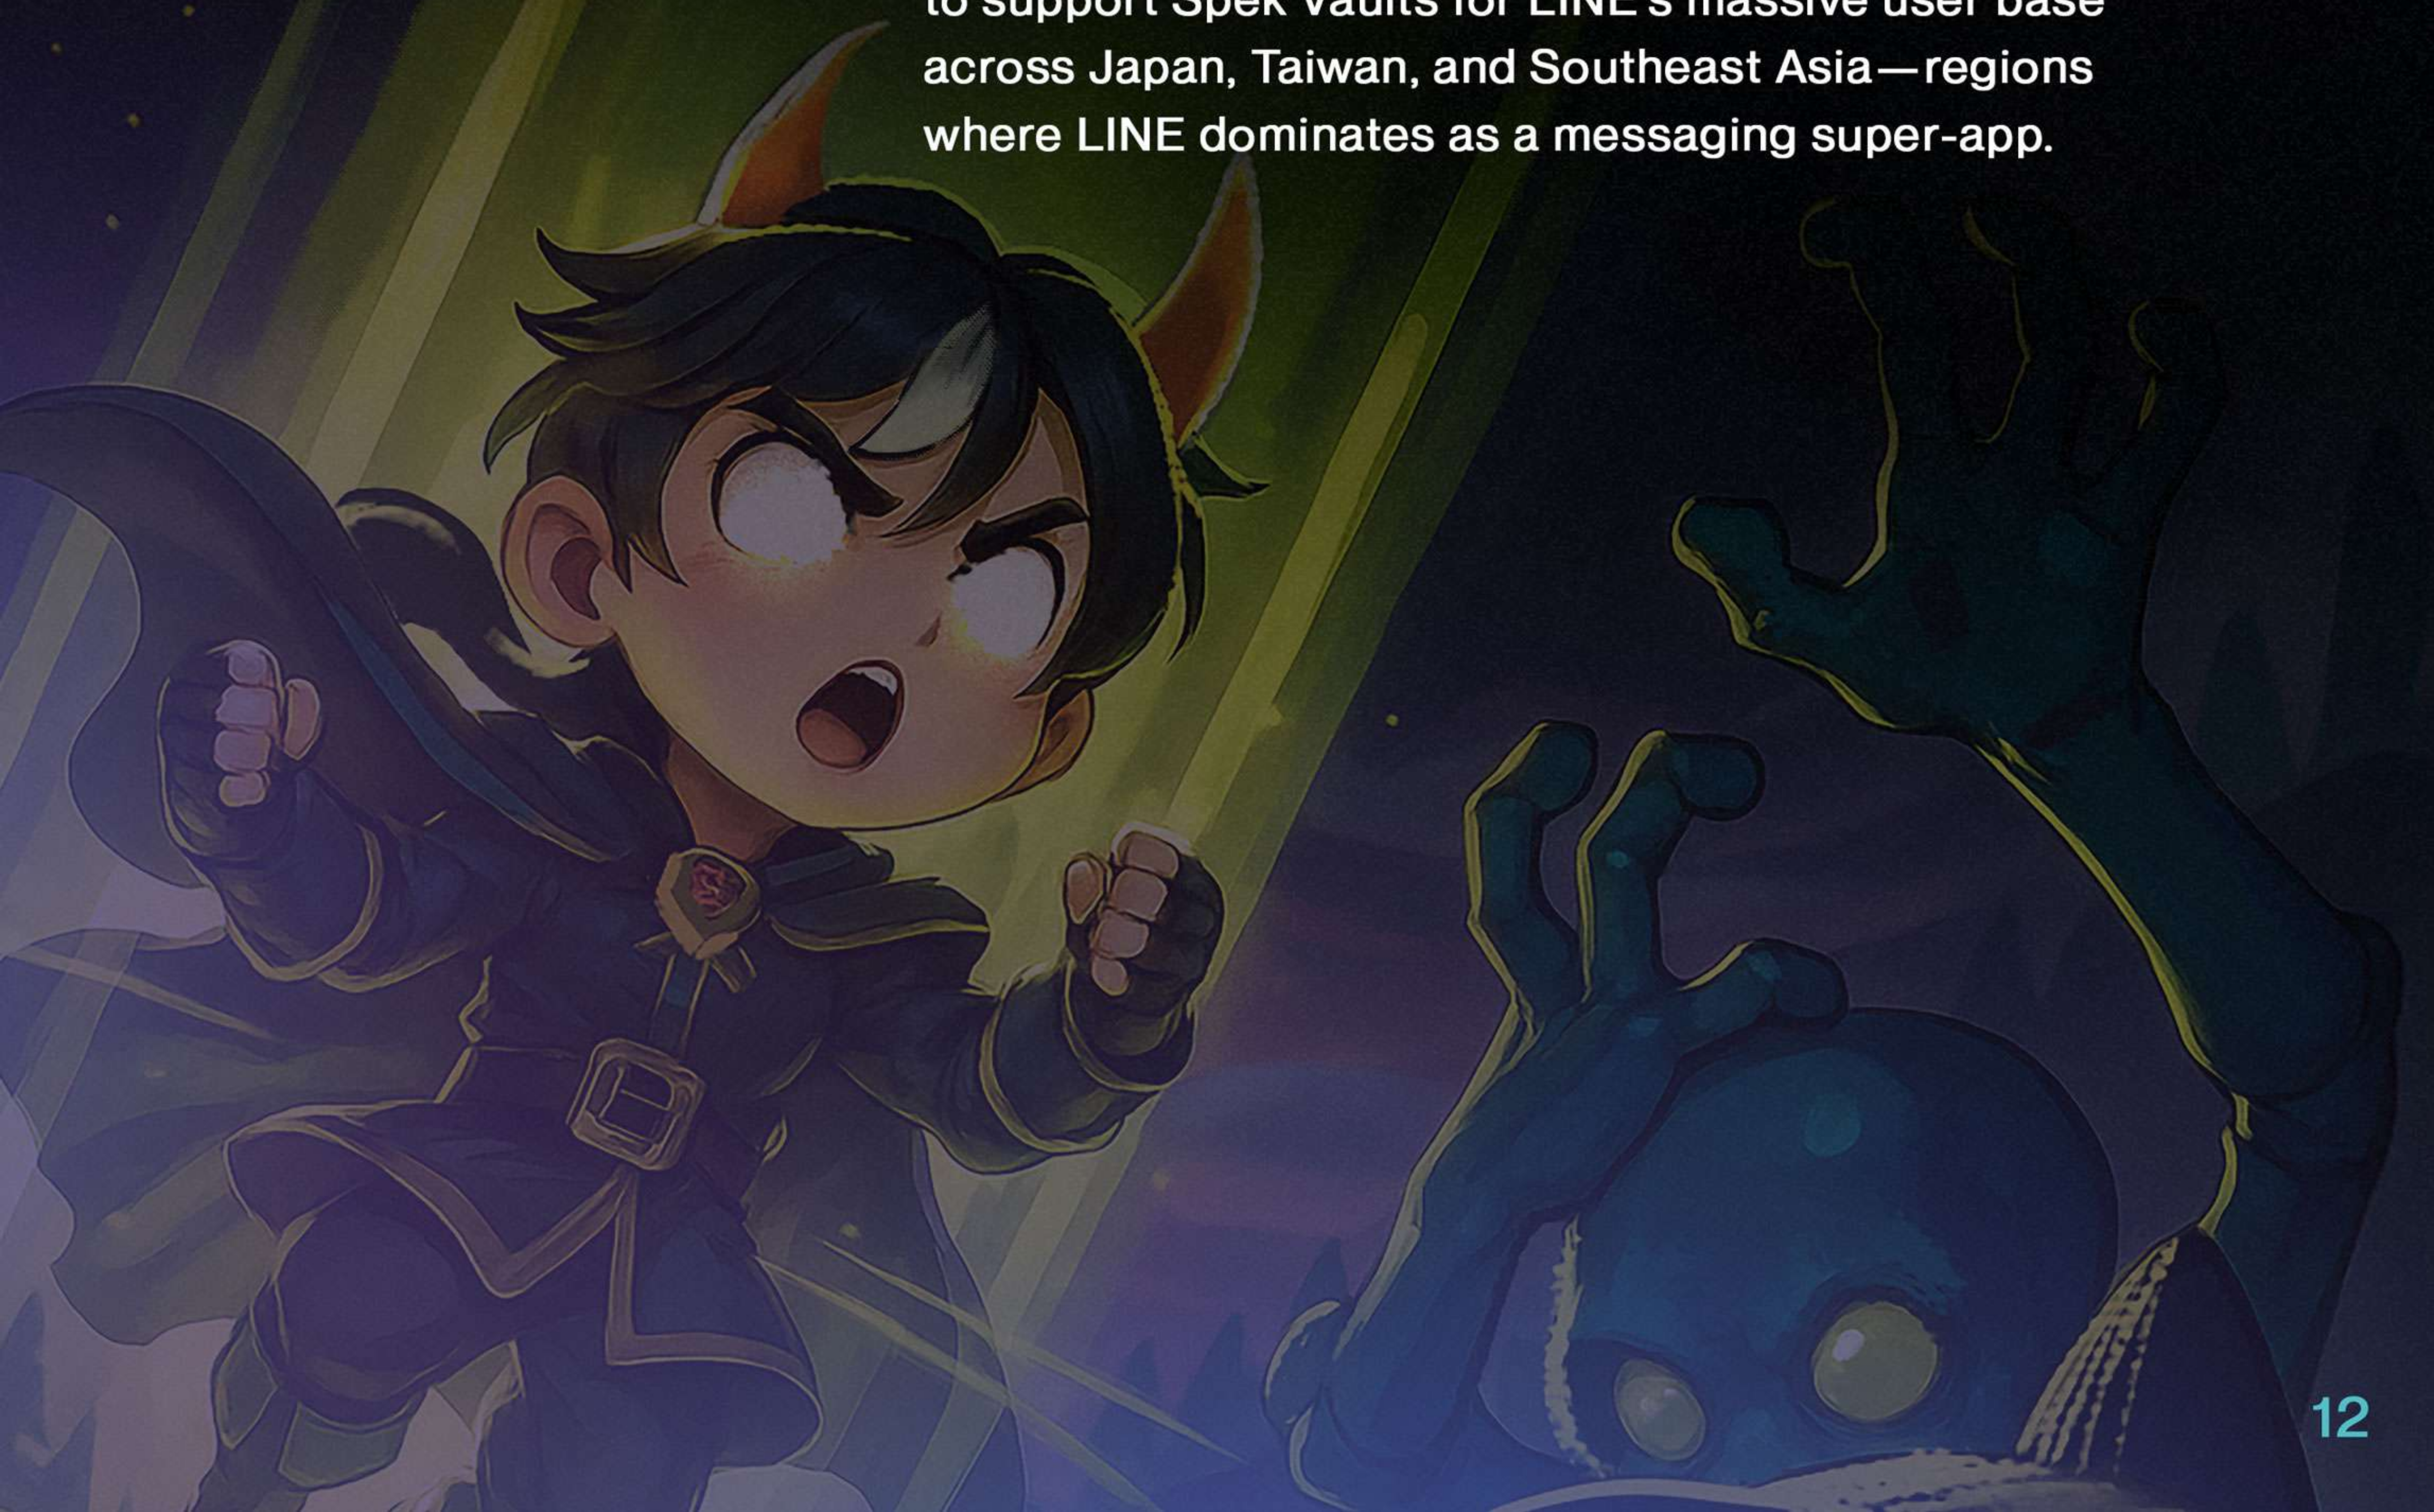

SPEK VAULTS ON SONEIUM (LINE)

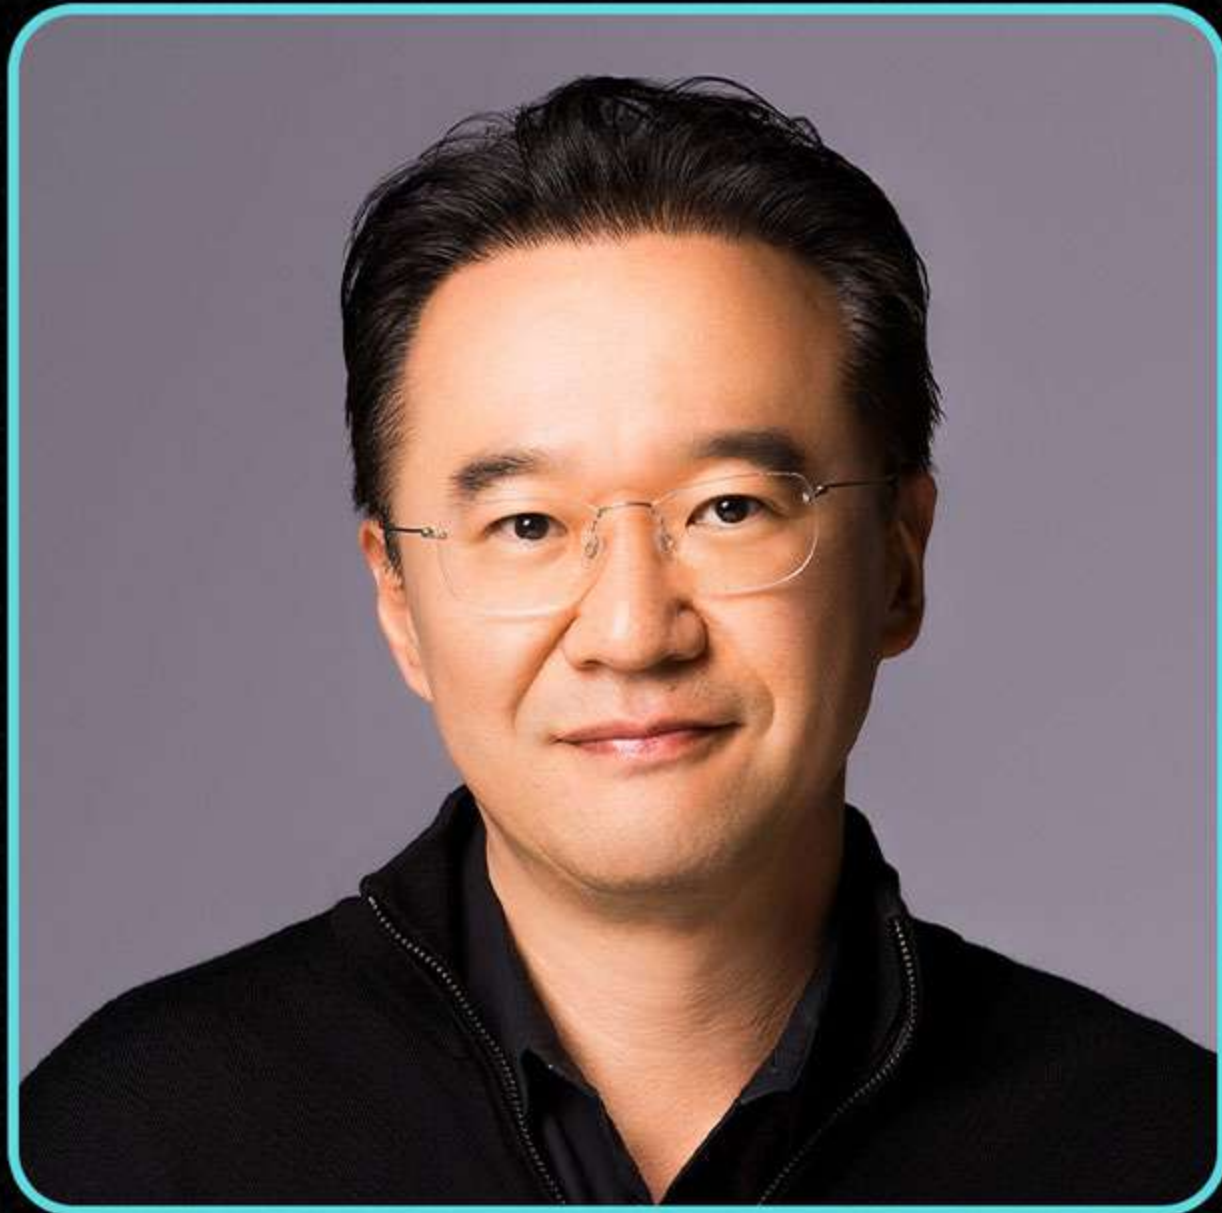

For players on LINE, Spek Vaults are deployed on Soneium, a next-generation Layer 2 blockchain developed by Sony and Startale. Built on the Optimism (OP) Stack, Soneium is designed to make Web3 applications accessible, scalable, and user-friendly—with a particular focus on gaming, entertainment, and creator-driven experiences.

We selected Soneium for LINE players for several key reasons:

- **Mass-market focus:** Soneium’s core mission aligns with ours—bringing Web3 to *ordinary mainstream users*, not just crypto-native audiences.
- **Sony’s ecosystem vision:** As a Sony-backed L2, Soneium is engineered specifically for entertainment-scale applications like gaming, IP, and digital rewards systems
- **Strategic partnership with LINE:** Soneium’s collaboration with LINE to integrate LINE’s mini-apps into the Soneium ecosystem, makes it the natural chain to support Spek Vaults for LINE’s massive user base across Japan, Taiwan, and Southeast Asia—regions where LINE dominates as a messaging super-app.

TEAM

TAEHOON KIM “TK”

Spekter Games is founded by TaeHoon Kim “TK”, a serial entrepreneur and 20-year veteran of the game industry.

nWay

TK has raised over \$100M from top-tier venture firms and built multiple studios with successful exits. As co-founder and CEO of nWay, he led the development of real-time, cross-platform multiplayer hits such as Power Rangers: Legacy Wars, Battle for the Grid, and ChronoBlade—games that together amassed 100M+ downloads worldwide.

After nWay’s acquisition by Animoca Brands in 2020, TK spent three years driving the company’s Web3 gaming initiatives and expanding its portfolio of blockchain-enabled titles. His experience across both Web2 free-to-play and Web3 on-chain ecosystems forms the foundation of Spekter’s hybrid publishing vision.

The Spekter team consists of proven veterans from nWay, Netmarble, NCSoft, Bandai Namco, NetEase, Nexon, and other top global studios. Our developers, product leads, and live-ops specialists bring 10–20 years of experience building and scaling successful games across mobile, PC, console, and Web3.

Together, we combine world-class Web2 craftsmanship with deep Web3 technical expertise, uniquely positioning Spekter Games to bring the next generation of hybrid games to mainstream audiences.
