Methodology

*The rankings of the best networks were drawn up on the basis of 433,775 reviews left by Chargemap users on the various charging networks, from 1st January 2025 to 31st December 2025 inclusive. They take into account the overall charging experience.

To avoid excessive statistical discrepancies and ensure a consistent average rating:

- the ranking in France is based on a minimum of 1000 ratings collected over this period for a charging network.
- the rankings in Belgium, Switzerland, Germany, the Netherlands and Italy are based on a minimum of 100 ratings collected over this period for a charging network.
- the ranking in Spain is based on a minimum of 50 ratings collected over this period for a charging network.
- the ranking in Portugal is based on a minimum of 30 ratings collected over this period for a charging network.
