Why Chose Titan Door Systems?

At Titan Door Systems, we don't just manufacture doors we engineer custom solutions that redefine excellence. Proudly Australian owned and founded on decades of industry experience, we combine precision craftsmanship, innovative design, and superior materials to deliver high performance doors that elevate any space. Whether it's a sleek architectural feature or a robust industrial installation, every Titan door is built for durability, functionality, and style. Our commitment to transparency, client first values, and tailored engineering has earned us the trust of developers, architects, and builders nationwide. When you choose Titan, you're choosing a partner dedicated to quality, integrity, and innovation every step of the way.

Proudly Australian Made

Why Choose Australian Made Doors?

Built to Last

Our doors are proudly manufactured here in Australia, using high quality materials and built to meet strict Australian standards ensuring long lasting performance, durability, and safety.

Support Australian Expertise

Every Titan door supports skilled Australian jobs from design and manufacturing to customer service and installation. Whether you're local or international, choosing Titan means investing in proven Australian craftsmanship.

Tested for Safety & Strength

Our Australian made doors are engineered to meet strict national building codes and safety standards. This ensures peace of mind, knowing your door is built to perform reliably in demanding environments from cyclonic regions and extreme desert heat to harsh coastal conditions where salt resistance is essential.

Choose Titan Door Systems
Australian made, built to perform.

Overview

No other color exudes brilliance and class like black does. Porta Nero, meaning black door in Italian, is the new must-have statement piece for the home. It can be an exceptional choice if you are looking for bespoke steel-framed doors but don't want the traditionally popular French doors in white.

These stunning doors are custom designed and manufactured to meet each client's needs and can be fitted to bathrooms, kitchens, major feature windows or doors, as well as commercial premises such as offices or restaurants.

The frames exude elegance and refinement. They are on trend with the latest in modern design while also oozing old-world charm and class thanks to their timeless style.

While Porta Nero is big on style and class, rest assured that it is equally durable and functional. Special attention has been given to the quality of the steel frames used in the door to ensure that it can deliver in the most challenging environments.

Custom designed to fit the most unique of spaces, the black steel contrasts the home's interior with dramatic effect. They create clean lines and offer a contemporary feel while maintaining an elegant charm that captivates.

In a kitchen environment, even key statement cupboards can add to the overall look and feel especially against white cabinets and stainless-steel appliances.

Because the steel on the doors and windows have slender sight lines, it ensures the view outside is not obscured unnecessarily. In fact, huge expanses of glass capture the light setting off the black beautifully creating a high-impact look.

And for commercial applications, the frames can also add a creative industrial flair to the showroom.

The options are endless with every client's whim able to be catered for whether single or double folding doors, sliding doors, bifolds, or stacking and pivoting doors.

The steel frames are much less maintenance than wood and three times stronger than aluminum. The texture of steel is also less smooth than that of aluminum which serves to add to its character.

In addition, because steel-framed doors and windows are welded, unlike aluminum and timber, security to the premises is greater.

Porta Nero's bespoke offerings offer a fresh, modern look, custom-made for those who want their friends and clients to gasp in admiration when entering their premises.

As every installation project involves a lot of consultation with the clients, know that the final outcome is sure to exceed your expectations, and meet your requirements in every possible way.

Applications

Suitable for many commercial applications including:

- Clubs
- Bar Tops
- Arcades
- Shopping Centres
- Sports Complexes

How It Works

The product can be operated by the following:
Hand operated

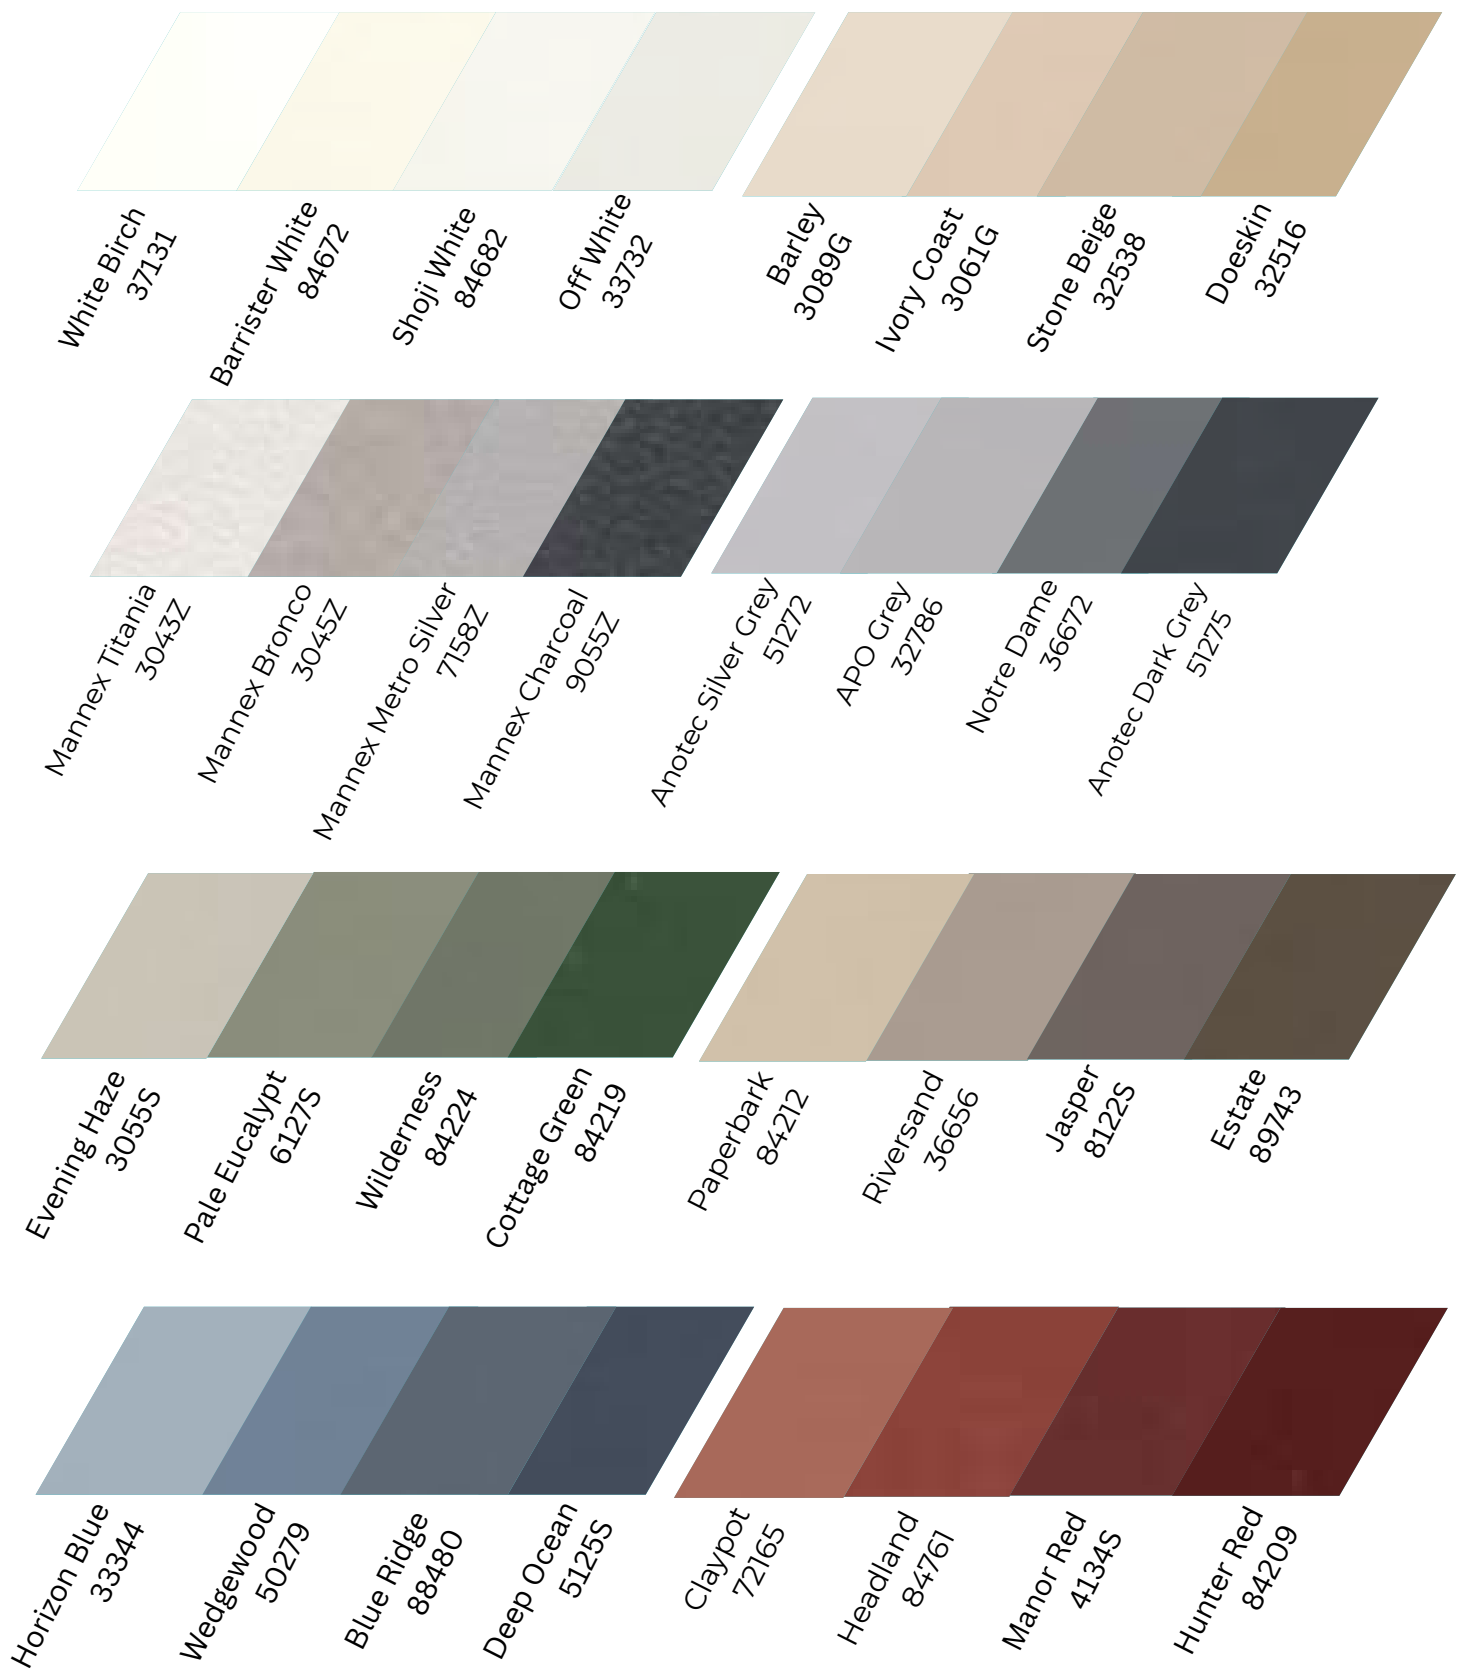

Duralloy Powder Coating Range

Long-lasting Dulux® colours trusted by professionals for style and strength.

At Titan Door Systems, we proudly offer a premium selection of powder coating finishes from the Dulux® Duralloy® range an advanced collection designed specifically for residential and light commercial projects. Duralloy® powder coatings incorporate the latest in coating technology, offering excellent durability, colour retention, and resistance to weathering. This versatile range features a carefully curated palette, blending long-standing favourites with cutting-edge international colour trends, all arranged to make harmonious colour selection simple and effective. The Dulux® name and Duralloy® colour range are used under licence and remain the property of DuluxGroup (Australia) Pty Ltd. All colours shown are for illustrative purposes only and may differ from actual finishes.

The Dulux logo is displayed in white, italicized, sans-serif font on a dark blue rectangular background. A thin red horizontal line is positioned directly beneath the blue rectangle.

Bringing Spaces to Life with Color

The next steps

1. Consultation and Quoting

It all begins with a conversation. We listen closely, offer expert advice, and provide clear, tailored quoting to ensure your goals are understood and aligned from the outset.

2. Design and Engineering

Our design and engineering teams bring creative insight and technical precision to each project, delivering solutions that are as structurally sound as they are visually refined.

3. The Manufacturing Stage

Our fabrication process reflects a commitment to excellence, with every component crafted using trusted materials and exacting standards.

4. Installation and Tutorial

Our skilled installers ensure every system is fitted with care, followed by a detailed handover to empower your team with full understanding and ease of use.

5. Ongoing Support and Maintenance

Our commitment doesn't end at installation. We provide continued support and maintenance to ensure optimal performance, long-term reliability, and lasting peace of mind.
