

Mobil-O-Graph

Portable, accurate
blood pressure
monitoring

Interval measurement over 24hrs for a full diagnostic assessment to identify and manage white coat or masked hypertension.

Available with
Cardiac Monitoring Service

Our easy set up process provides your clinic with everything you need to begin ambulatory blood pressure monitoring right away.

- All devices
- All reporting software
- Staff training and set up
- 24/7 ongoing customer support
- All ongoing device maintenance
- One flat monthly fee

Auto feedback logic ensures gentler, faster adjustments to individual blood pressure response for less patient disturbance at night.

Key benefits

New revenue

Diagnostic grade BP assessment is provided for CPT code reimbursements.

Diagnostic quality BP tests

Interval tests over 24hrs allows for diagnostic monitoring, including those with suspected secondary/comorbidity hypertension.

Adjustable & accurate

Day/night function ensures accurate results and interval measurements can be adjusted to suit.

Patient comfort & compliance

Available in multiple sizes, the patient responsive pumping cuff provides greater comfort and ability to sleep through the night.

5 Cuff sizes available

Extra Large

Large

Medium

Small

Extra Small

Measurement range

Systolic (SYS): 60 - 290 mmHg

Diastolic (DIA): 30 - 195 mmHg

Accuracy: ± 3 mmHg

Pressure range: 0 to 300 mmHg

Pulse range: 30 to 240 bpm

Measurement method: Oscillometric

Specifications

Memory: 300 measurements

Battery capacity: > 300 measurements

Dimensions: 128 x 75 x 30 mm

Weight: approx. 240 g including batteries

Power supply: 2 IEM rechargeable batteries Ni-MH (AA)

Interfaces: Serial port (cable) compat

Bluetooth (Class 1/100 m)
