BANK TRIPS AVOIDED

Santosh Sekar is a single-family investor managing 35 properties across 14 states, each held in its own LLC — a structure that requires separate accounts, logins, and applications that turned traditional banking into a bottleneck.

He needed a system that eliminated manual steps and scattered cash flow getting in the way of growing his portfolio.

> "Baselane's account opening and virtual account structure are a game-changer for my business. For investors serious about scaling, it's a no-brainer — no banking platform comes close."

INVESTOR CHALLENGE

Multi-property banking bottlenecks

Traditional banks (TD and Citi) required branch visits, long applications, and account minimums as high as $5,000 per LLC.

Online neo-banks frequently flagged new LLCs for fraud review, delaying account openings and property purchases.

Slow transfers and manual reconciliation created significant challenges for cash flow optimization.

BASELANE SOLUTION

Banking built for big portfolios

Santosh opened checking and savings accounts for all his entities online in minutes, eliminating hours of branch visits and paperwork.

Automated transfers between accounts and entities helped Santosh maximize cash flow and keep his portfolio growing.

High APY and no monthly account maintenance fees or minimums put more money in Santosh's pockets (not the bank's).

Finances managed. Mind free.

See how easy it is to centralize and automate your banking and bookkeeping for 10+ doors.
