Concordium Roadmap

Updated November 2026 · concordium.com/roadmap

Payments · Identity · Security · Discovery & Adoption

COMING NEXT

Nov 2026

WDK V1.0
Any wallet built on the Wallet Development Kit can transact with Concordium ID.

AI Agent ID (Agent IDP)
Your agent proves selected details from your ID without interrupting you.

Human Consent Request
Merchants and agents ask a human to approve, with the approval anchored on-chain.

ID Deep-fake Detection
Identity providers reject AI-generated documents and selfies.

AI Agent Tool Kit
SDKs and examples for building with the new agentic features.

AI Developer Education Series
A programme showing developers how to build on Concordium.

AI Agent Hackathon
Developers use the tools to solve real problems with agents.

Dec 2026

WDK V2.0
Create and manage your Concordium ID inside the wallet, no separate app.

Domain Verification
Proves a payment request really comes from the merchant's domain.

Concordium MCP Server
Any agent can read and use the chain through MCP.

Concordium Agent ID Service
Gives agents a verified identity they can use on their own.

Jan 2027

Protocol Level Locks: Simple
Funds stay in your custody while locked for a set recipient.

AI Agent Assisted Verify & Pay
An agent verifies with your ID and pays from locked funds, with safeguards.

WDK V3.0
Full Concordium ID in the wallet: proofs, Verify & Access and consent.

PQC Attestation Layer
Quantum-safe validator signatures so no one can rewrite chain history.

Feb 2027

KYCaaS
Reuse your KYC across partner apps, only with your consent.

Concordium Signer
Secure signing that keeps keys away from the agent.

Mar 2027

Protocol Level Locks: Enhanced
Locked funds move only when a contract's business logic approves.

Liveness Check
Confirms the person making a proof is the account owner.

Dates are targets and may move.

FURTHER OUT & DELIVERED

2027+ Further out

Non-Fungible PLT
NFTs held at the protocol level.

Light Nodes
Lighter nodes that are quick to deploy.

Parallel Execution
Parallel block processing to grow past 2,000 TPS.

Privacy Preserving Transactions
Shielded balances with disclosure built into the protocol.

AML on Demand Checks
AML checks run only when a use case needs them.

ID Layer Enhancements
A quantum-safe identity layer.

Account-Level Allow/Deny Lists
Stop unwanted transfers into your account.

AI Security Framework
AI agents audit smart contracts and watch the chain.

Quantum Safe
Making the chain and tools quantum safe.

Security Agent
Always-on AI monitoring that escalates to human review.

Smart Contract Builder Agent
An agent that writes the smart contract you describe.

Delivered May to Oct 2026

AI Agent Registry
Identity and accountability for AI agents on any chain.

ERC-8004 + SOL agent identity
Ethereum and Solana agents linked to a verified human.

200+ Networks
Agents from 200+ networks can register and get the badge.

Verified by Concordium Badge
Shows a verified human stands behind an agent.

Enterprise LEI ID Onboarding
Simple onboarding for businesses.

ID App UX Improvements
Quicker identity creation and proof sharing.

CertiK audit + Bug Bounty
Full grey-box audit, plus rewards for finding issues.

AI Threat Resistance + Custody Framework
Hardened against AI attacks; safe key handling for agents.

Node patches 10.0.9 to 10.0.12
Faster finalization, network and contract-engine hardening.

Registry MCP + A2A verification
Agents check the registry and each other over MCP and A2A.

x402 Payment Flows
Agent-native payments settle on Concordium.
