LockThreat *for*

Professional Services and Consulting

The professional services and consulting sector handles sensitive client data, requiring robust compliance and cybersecurity measures to maintain trust and operational excellence. Lockthreat provides intelligent GRC and resilient cybersecurity solutions tailored to meet the specific needs of professional service organizations and their key stakeholders.

Industry Challenges

Ensuring compliance with standards like ISO 27001, SOC 2, and GDPR.

Protecting sensitive client and organizational data from breaches.

Managing risks across client engagements and vendor relationships.

Demonstrating audit readiness and compliance to clients.

Addressing cybersecurity gaps in digital tools and platforms.

LockThreat Solutions for Professional Services and Consulting

Comprehensive Compliance Frameworks:

- Access to authoritative documents such as ISO 27001, SOC 2, and GDPR.

- Tools for creating and monitoring compliance policies tailored to client requirements.

LockThreat Genius:

- AI-powered policy and control generation specific to compliance needs of professional services.

- Automated updates for evolving regulatory and client requirements.

Third-Party Risk Management:

- Tools to evaluate and mitigate risks from vendors, subcontractors, and partners.

GRC Engineering Hub:

- Integration with client engagement tools, CRM platforms, and IT systems for real-time compliance monitoring.

- Dashboards providing a unified view of compliance and risks.

Incident Response Management:

- Pre-built workflows to handle data breaches and compliance incidents efficiently.

- Reporting tools for internal audits and client oversight.

LockThreat
