

Beyond Glow.

The Solution to Inner Dryness.

Soft Aging™ begins here

The global pursuit of a superficial glow has left skin chronically dehydrated.

QFORET introduces Soft Aging™ — a new philosophy to restore deep, lasting hydration from within.

Soft Aging™: Re-Harmonizing the Skin

We are leading the new era.

Soft Aging™ is not anti-aging; it's re-harmonizing.

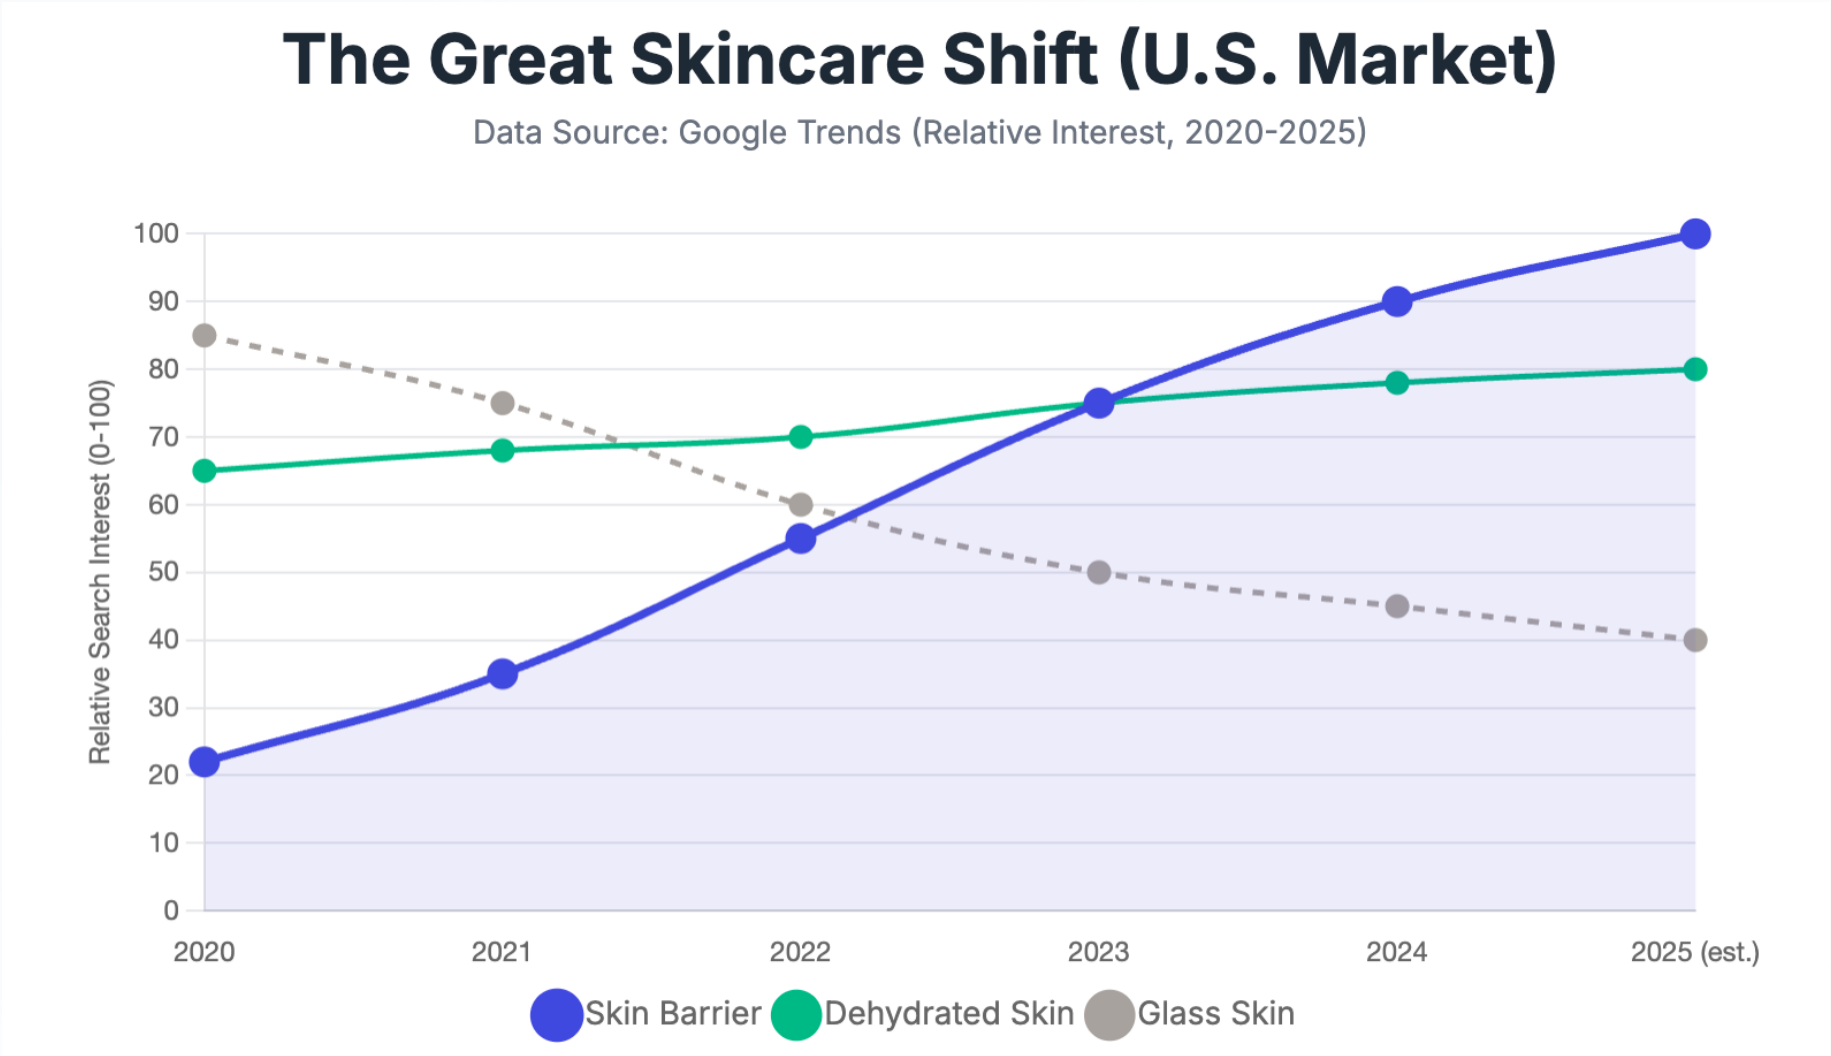

It's a return to the skin's purest state:
untouched by stress and environmental damage,
like the skin of early childhood.

The goal isn't a fleeting glow,
but a lasting feeling of calm and comfort.

From "Glass Skin" to "Compromised Barriers."

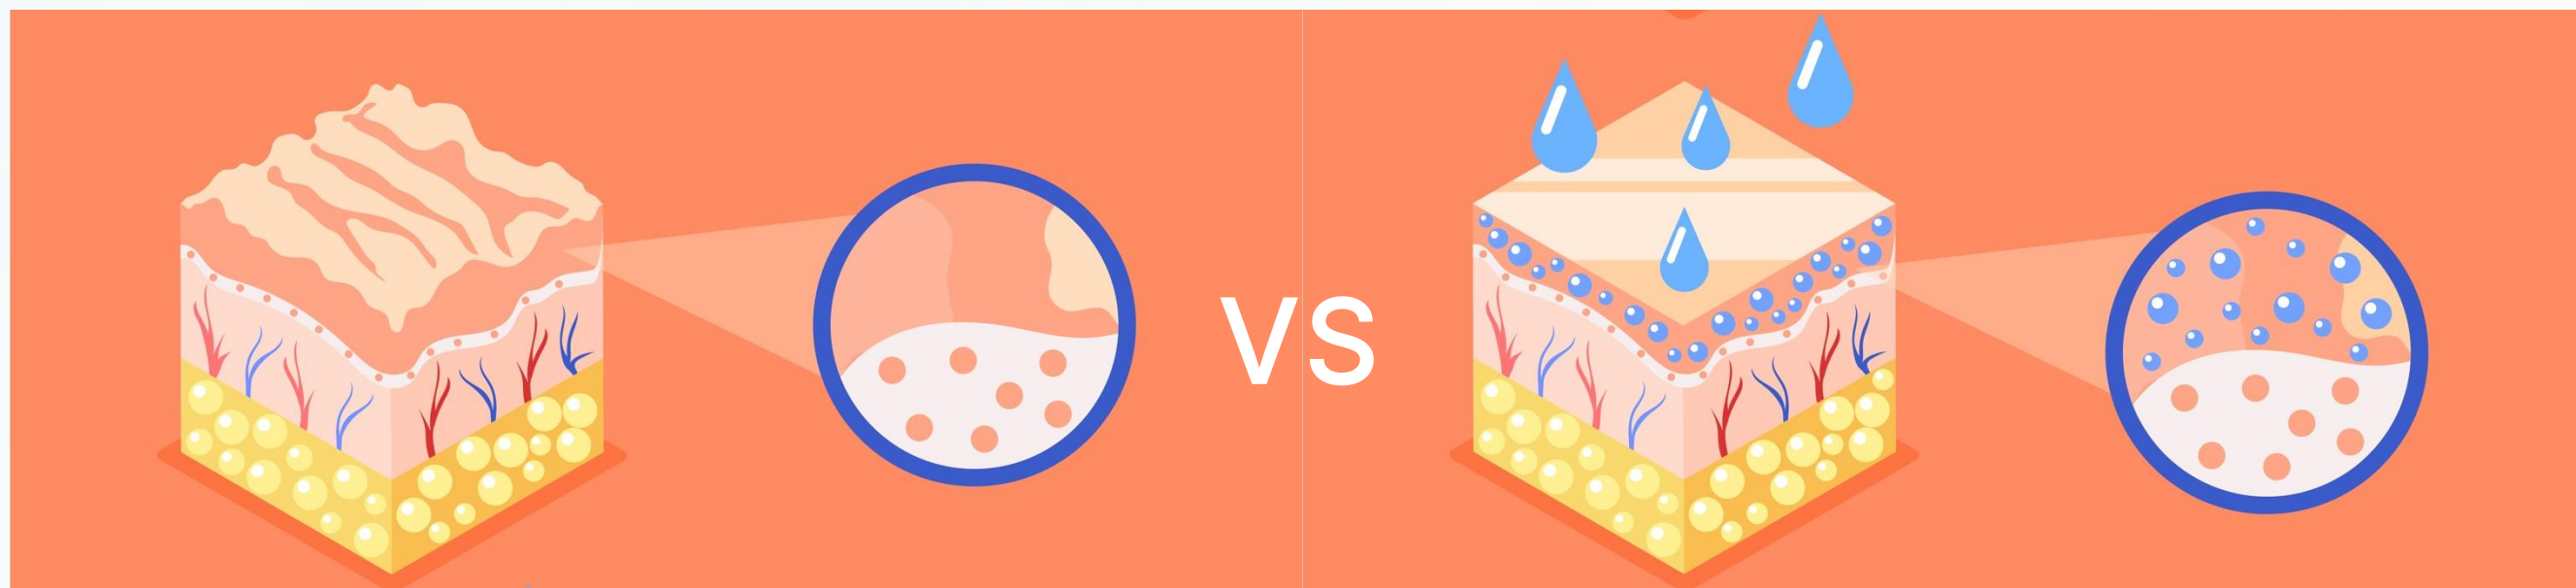

While the industry was chasing 'Glass Skin', consumers started searching for a real solution. The data shows a clear pivot from a temporary look to a fundamental need: **barrier repair** and **deep hydration**.

The True Cost of the Glow: The Inner Dryness Epidemic.

The pursuit of 'Glass Skin' came at a cost.

The aggressive exfoliation and harsh ingredients required for a temporary glow have created the #1 hidden concern:
a compromised barrier and chronic inner dryness.

Unlocking Ancient Wisdom Through Modern Science

QFORET's 'Soft Aging' philosophy is not just a marketing concept.

It is the first public-facing expression of our deep biotech R&D engine, QGENETICS.

While we perfect skincare solutions, our parent lab is focused on fundamental science, including new drug development.

This scientific foundation is our ultimate, defensible differentiator.

Patents

1. Composition for preventing hair loss and promoting hair growth comprising a herbal medicine complex extract(Hair Care)
2. Compositions for Enhancing Proliferation and Differentiation of Stem Cell(Skin care)
3. Skin care compositions and method for manufacturing the same (Skin Care)
4. Pharmaceutical compositions for prevention or treatment of oral mucositis induced by 5-fluorouracil comprising an extract of *Salviae Miltiorrhizae Radix* (Oral Care)

PhytoMucin Complex : Nature's Answer to Inner Dryness.

OKRA

LOTUS ROOT

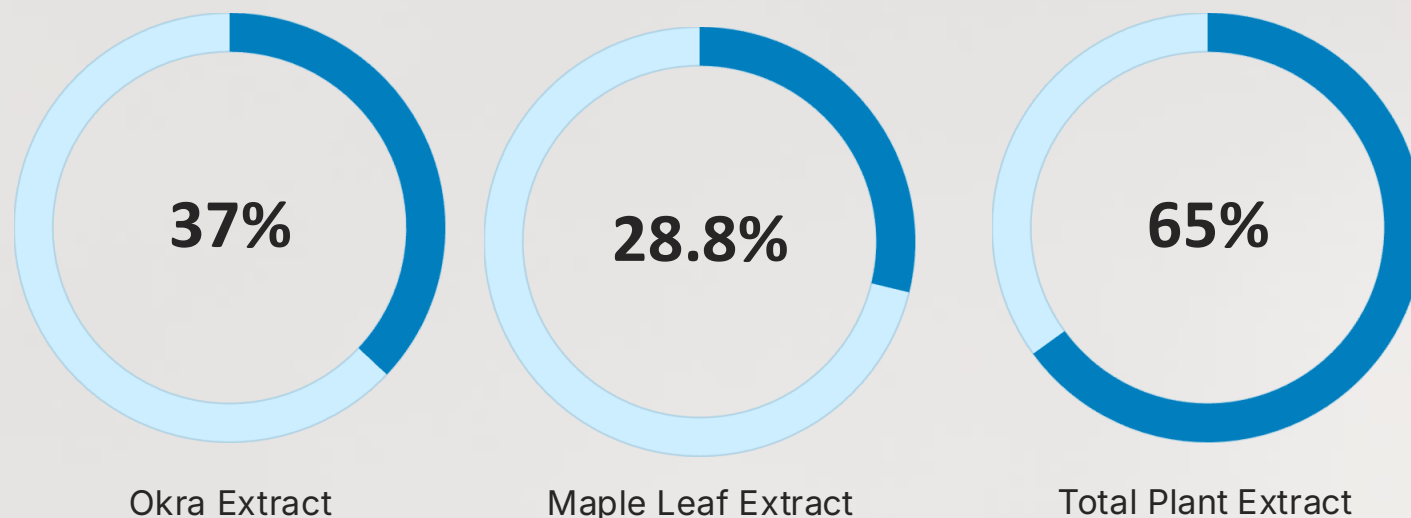

YAM ROOT

This is not just another hydrating ingredient. Our proprietary complex is engineered to solve inner dryness at its source. We took the wisdom of using plant mucin for deep hydration—a practice rooted in Korean tradition—and perfected it with biotechnology to rebuild the skin's "moisture reservoir."

65.8% Plant Extracts: Where Others Start with Water, We Start with Nature

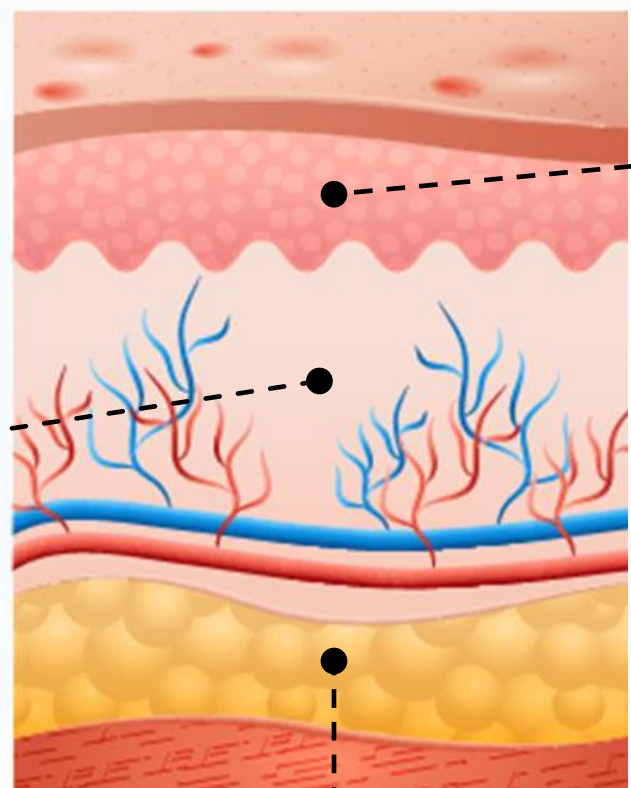

We don't believe in "fairy dusting."
While other formulas start with water, ours starts with nature.
This isn't skincare with a drop of plant extract;
this is a potent plant concentrate, engineered to deliver clinically-proven results.

The Scientific Matrix: Engineered for a Perfect Barrier.

 We know that deep hydration is useless if it isn't protected. That's why we built a scientific matrix around our PhytoMucin Complex™ to lock in moisture and fundamentally strengthen the skin barrier.

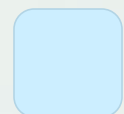

Sprout Complex & 7 Peptides (Reinforce Structure):
Reinforce the skin's structural integrity and elasticity.

Ceramide & Hyaluronic Acid (Lock & Defend):
Seal the outer barrier and **lock in** moisture to prevent evaporation.

PhytoMucin Complex™ (Generate Moisture): Creates the "moisture reservoir" deep within the skin.

Our Philosophy: Elegant Efficiency.

our skincare routine should be a joy, not a chore.
We believe a complicated routine is a sign of an unfocused brand,
not ineffective products.

Our vision is a complete, harmonious ritual built on a few perfected essentials.
We started with the most critical step: the Born to Glow Moisture Gel Cream,
a multi-action formula engineered to deliver the results of
multiple products in one.

Every new product we launch will follow this same principle.
We don't sell steps; we deliver solutions.

They Finally Found the Solution

Our focus on solving inner dryness resonates deeply.
High ratings and 'Amazon's Choice' prove that customers are finding the lasting comfort and deep hydration they've been searching for.

Natural ingredients and no fragrance. I was not sure about this at first but after using it my face is so much more hydrated. I usually don't care for creams that leave a film on your face cause after a while your skin just feels dry again. This one did not do that. My face felt hydrated most of the day. So now my face feels softer and I can smile without worrying about those smile lines. Lol The cream is effective and I like it a lot.

★★★★★ **BEST moisturizer!**

Reviewed in the United States on December 10, 2024

Glass skin is all the rage right now and I've been trying so many moisturizers on top of being very diligent with my skincare. I have some others I like but I decided for the price since it was a prime day deal I would try this moisturizer out. Oh my god, best decision I've ever made. My face is moisturized all evening and into the morning. I notoriously have patchy skin around my eyebrows (mainly after shaping them or when the weather is colder) and this kicks the flaking out after just one use. My skin has never felt so hydrated and it looks so glowy and healthy. I have very acne prone skin along with rosacea and this is one of the very few moisturizers that has NOT broken me out! This is now going to be on subscribe and save. I can't ever run out!!! If you're on the fence please try it I promise you won't regret, even my oily skin girlies!

Ready for Your Shelves. Today.

We built QFORET for global scale from day one.

Our operations and compliance are not a future goal; they are a current reality.

Compliance

Own the "Inner Dryness" Category.

The market is saturated with "glow" products.

Partner with us to capture the massive, underserved market of consumers seeking a real, science-backed solution to chronic skin dehydration.

The Feeling of True Hydration Sells Itself.

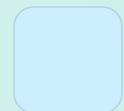

When skin is finally free from inner dryness,
it feels safe and comfortable.

That feeling is addictive. It builds trust, fierce loyalty,
and guaranteed repeat business.

QFORET. Return to Comfort.

Stop selling a temporary look.

Start offering a permanent solution.

Let's give your customers the deep, lasting hydration they've been searching for.

Marketing Soft Aging™: How We Build a Movement

- We don't just advertise a product; we communicate a new philosophy.

Our marketing builds a deep connection with consumers tired of irritation, resonating with a message of "returning to comfort."

The proof is in the results: authentic reviews and high ratings show that the market is embracing the Soft Aging™ movement.

I don't want glass skin.
I want my childhood cheek back.

The Soft Aging™ Ecosystem: Beyond the Face

Sharon Toothpaste

As fresh and clear as a forest at dawn.

A burst of cool peppermint fills your mouth,
and the power of herbs gently soothes
the dryness left from the night.

The foam is rich, the freshness lingers—
and your day begins
as clean and clear as the forest itself.

- 🌿 Triple care: relieves dry mouth, reduces bad breath, and supports gum health
- 🌿 Formulated with naturally derived surfactants — ultra-gentle on the mouth
- 🌿 Infused with 13 plant-based ingredients
(Ginseng, Centella, Peppermint, Mastic, Myrrh, Green Tea, Licorice, etc.)
- 🌿 Contains Hydroxyapatite to help restore tooth enamel
- 🌿 Vegan moisturizing base to hydrate the oral cavity
- 🌿 Certified vegan / Contains fluoride (1,000 ppm)
