

How to turn every player interaction **into a revenue opportunity**

Daylight PMS for Casinos,
Clubs & Integrated Resorts

Every player interaction creates value

The more integrated and complete the view of that journey, the greater the opportunity to reward loyalty and increase total resort spend.

Each segment contributes to:
Total Resort Spend

From player rewards to resort experiences

Gaming rewards can be converted into reservations, experiences, and complimentary entitlements.

Gaming Blocks help properties allocate inventory for gaming programs.

Complimentary Accounting automates approvals, settlement, and financial control.

Less Manual Work

The power of comp accounting starts with the player profile

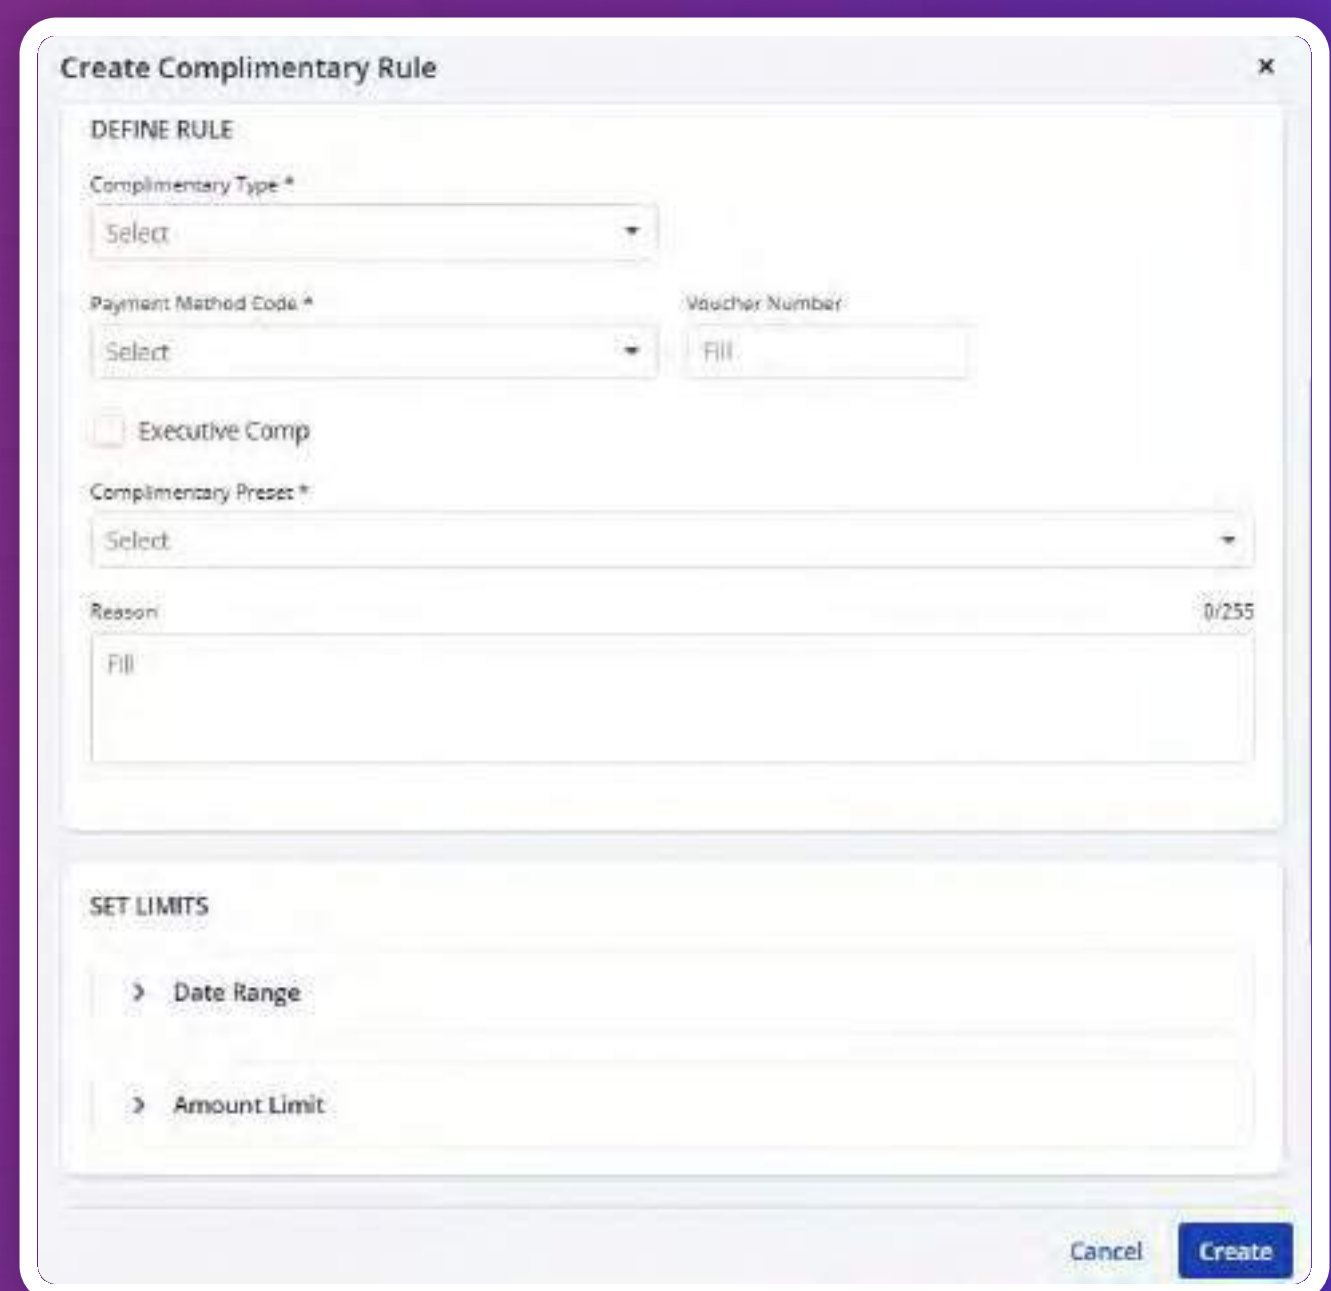

Profile synchronization keeps player preferences, loyalty data, and lifetime value up to date.

The screenshot shows a player profile for 'Yao, Roxanne' with address 'No 5 Janguo Road, 10000 Beijing, China'. The 'Comp. Type' is 'Managements Comp', 'Requestor' is 'Anthony Hunt', 'Approver' is 'Chen Ling', 'Comp. Preset' is 'Accommodation Only', and 'Payment Method' is '888 - Payment Gaming'. Below this is a table of comp items:

Date	Code	Description	Unit Price	Qty	Amount	Comments	Reference	User
05/03/2025	100-01	Accommodation Comp Rate	333.00 GBP	1	333.00 GBP			AS-AUTO
05/03/2025	888	Payment Gaming	-333.00 GBP	1	-333.00 GBP			AS-AUTO

Complimentary Accounting automates approvals and settlements, helping deliver a seamless checkout experience with minimal operational intervention.

The 'Create Complimentary Rule' form is divided into two main sections: 'DEFINE RULE' and 'SET LIMITS'. The 'DEFINE RULE' section includes fields for 'Complimentary Type *' (a dropdown menu), 'Payment Method Code *' (a dropdown menu), 'Voucher Number' (a text field), 'Executive Comp' (a checkbox), 'Complimentary Preset *' (a dropdown menu), and 'Reason' (a text field with a character count of 0/255). The 'SET LIMITS' section includes expandable sections for 'Date Range' and 'Amount Limit'. At the bottom right, there are 'Cancel' and 'Create' buttons.

Flexible rules for every comp scenario

Configure

- Comp types
- Requesters
- Approvers
- Comp presets
- Consumption limits
- Shared limits across rules
- Automated approvals

Casino Comp Process
