

SIGNAL SPACE

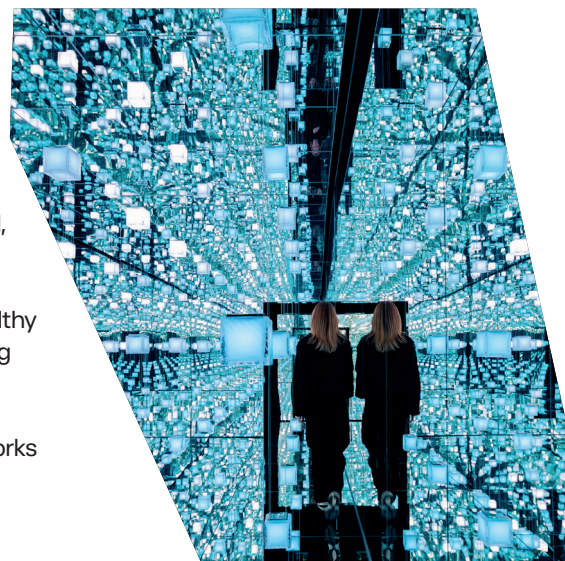

DIGITAL ART GALLERY

STAROMĚSTSKÁ TRŽNICE
RYTÍŘSKÁ 10, PRAGUE 1
OPEN DAILY
10:00 AM–8:00 PM

We are the largest digital art gallery in the Czech Republic. We strive to be open to everyone—from connoisseurs to the curious, young and old, families, culture lovers, and complete novices.

We help our young visitors discover new worlds. We aim to spark their healthy curiosity and open windows into new dimensions of our digital future using the latest technologies and artificial intelligence.

Every day, we offer unforgettable visual experiences. We bring together works by the finest Czech and international artists. In our gallery, art permeates the entire space and captivates all the senses.

WHAT YOU CAN LOOK FORWARD TO:

- The largest 360° projection in the Czech Republic – you'll find yourself in the middle of a digital world that will sweep you away
- The Infinity Room, inspired by Yayoi Kusama – a mirrored universe with no end and no beginning.
- A digital drawing born from your movement – become part of the art.
- Breathtaking installations by leading international artists from New York, Tokyo, and London.
- And much more—a space where light, sound, and imagination come to life.
- Signal Playground – an interactive zone for children that bridges the digital and analog worlds. Movement, light, sound, and surprises come to life here thanks to principles of physics

For organized groups of schoolchildren and students, we offer guided tours designed to engage their interest in the program. Worksheets for various age groups are available for download.
