GMC Lifting Solutions

GMC High Capacity Buoys for surface or subsea

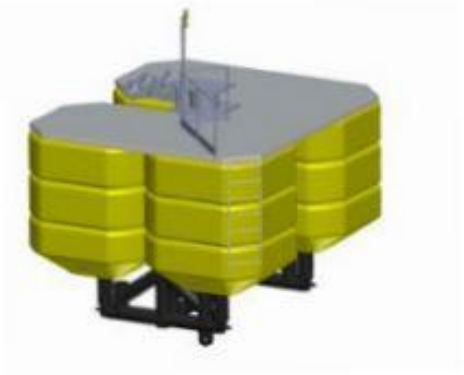

In addition to our wide range of standard modular configurated buoys we can also deliver parallel (Duo) and double parallel (Quad) buoy configurations. This will double or quadruple the buoyancy.

In Duo configuration buoyancy can come up to approx. 40 ton and a Quad configuration can come up to approx. 80 ton.

The Quad configuration can as option come with platform.

Standard configuration

Quad configuration
With optional plattform

Duo configuration
