

C500 ELEVATOR ENTRANCE

Built by elevator experts for elevator experts.

Exclusive to Niagara Belco, this double swing freight elevator entrance was developed in 1993 to meet the need for a protected interlock. Typical designs using surface mounting techniques leave the interlock exposed and susceptible to serious damage during loading and unloading leading to costly down time and expensive repairs. The C500 series door assemblies feature a fully concealed interlock designed to provide years of low maintenance and trouble-free service.

FOR USE ON FREIGHT ELEVATORS,
MATERIAL LIFTS, VRC LIFTS.
