Securing India's Machines

Collaboratively Engineering India's Own Innovation to Shield Mission-Critical Infrastructure

Cyber-Physical Systems (CPS) Protection with Remediation

- ✓ Purpose-built for industrial networks and environments
- ✓ Protocol-aware OT network security with advanced anomaly detection
- ✓ Deep visibility into key OT systems and components - PLCs, RTUs, ICS, SCADA and IoT/IIoT devices
- ✓ Risk-based vulnerability management and context-driven remediation

From Lab to Market - Made in India. Armored for Global OT Threats.

- ✓ Commercializing India's first indigenous OT security through technology transfer
- ✓ Powerful OT IDS, OT Firewall, Zero-Trust access, industrial ransomware protection, network segmentation and more
- ✓ Recognized by National Centre of Excellence (NCoE)
- ✓ Designed to secure critical assets and ops in Power & Utilities, Oil & Gas, Manufacturing, Healthcare, Renewable Energy and other industries

Indigenous Innovation with a Holistic Approach to OT Security

- ✓ Vendor-agnostic platform
- ✓ Broad coverage - from threat detection to exposure management and remediation
- ✓ Native security data lake
- ✓ 100% on-prem ready
- ✓ 24/7 continuous threat monitoring
- ✓ India-based SOC with dedicated local support for integration & deployment
- ✓ Audit support for compliance mandates

"The technology transfer holds significant implications for both Indian OT security and the global OT security landscape"

INVINSENSE

AI-powered cybersecurity platform unifying Detection and Response (built-in SIEM, SOAR and Next-Gen Anti-Ransomware), Exposure Management, Red Teaming, OT Security and Integrated Compliance Management.

AI-Augmented.
Expert-delivered.
100% Sovereign
Security for India's
Critical Infrastructure.
