Securing Digital Health

Beyond Compliance. Protecting Healthcare Data, Safeguarding Lives and Connected Medical Systems

Transformative Cybersecurity for Healthcare & Healthtech

- ✓ Unified visibility across all environments - IT, Cloud, OT
- ✓ Next-Gen Anti-Ransomware with data recovery and immutable forensic data preservation
- ✓ Exposure management covering medical systems, security controls, user actions, shadow IT, vulnerabilities and config errors

End-to-end Compliance and Risk Management

- ✓ Effective mapping of controls
- ✓ Built-in templates
- ✓ Supporting HIPAA, HITECH and other ePHI/EHR guidelines
- ✓ IT, Cyber & 3rd party risk management
- ✓ Security awareness trainings
- ✓ GRC Management + GRC Engineering

Enabling Secure Infrastructure and Organization-wide Cyber Resilience

- ✓ Seamless integration with existing ops and tech stack
- ✓ 24X7 SLA driven managed security delivered by certified security and compliance experts
- ✓ Cloud-agnostic, platform-agnostic and vendor-agnostic
- ✓ Native security data lake
- ✓ Mapped with healthcare use cases
- ✓ Transparent reporting
- ✓ Business-context driven threat and risk prioritization and remediation
- ✓ AI-powered, automatic security data normalization into OCSF format
- ✓ 100% on-prem ready

"In healthcare, cybersecurity is patient safety. With Infopercept's expert support, we've transformed our defense posture—not just by reacting faster, but by making our entire security ecosystem smarter and more resilient."
