

UEMP Zero-Day War Room

Know whether a new advisory or zero-day actually affects you.

TURN ZERO-DAY UNCERTAINTY INTO AN EVIDENCE-BACKED RESPONSE.

Product Overview

Invinsense UEMP Zero-Day War Room matches new advisories against live inventory, ranks urgency and tracks response as a coordinated campaign. It helps security teams move from public vulnerability uncertainty to an organization-specific, evidence-backed exposure answer. It compresses zero-day response from days of manual triage to hours of inventory-matched, evidence-backed action, so the business knows what is exposed the moment a CVE breaks.

Key Capabilities

Capability	What It Delivers
Advisory intelligence	Combine trusted sources such as NVD, CISA KEV and EPSS with scheduled and on-demand CVE ingestion.
Exposure matching	Match advisories against organizational inventory and avoid reopening resolved issues.
Urgency ranking	Rank using confidence, internet exposure, KEV, exploit availability, criticality, ownership and SLA.
Response campaigns	Create ranked exposure lists with ownership, status, gaps and evidence.
Proof packs	Generate concise branded PDF summaries for leadership.

Business Outcomes

- Triage new advisories quickly.
- Prioritize matched exposures using multiple risk signals.
- Coordinate owners, status and remediation.
- Identify inventory gaps that limit confidence.
- Produce leadership-ready evidence packs.

Use Cases

- **Zero-day triage**
Move from a public advisory to an organization-specific answer.
- **Emergency remediation**
Focus teams on the most urgent matched exposures.
- **Campaign governance**
Track response across owners, business units and affected assets.
- **Executive communication**
Provide evidence-backed exposure and response summaries.
