

UEMP Vendor Watch

Outside-in monitoring for vendors, customers, subsidiaries and VIPs.

MAKE THIRD-PARTY EXPOSURE
MEASURABLE, REVIEWABLE AND
ACTIONABLE.

Product Overview

InVinsense UEMP Vendor Watch extends outside-in exposure monitoring to third parties without requiring agents or privileged access. It provides entity-level risk scoring, consolidated findings, evidence redaction and controlled vendor outreach. It replaces static, point-in-time questionnaires with continuous, evidence-based vendor risk visibility, cutting the manual effort needed to keep third-party risk current.

Key Capabilities

Capability	What It Delivers
Third-party risk scoring	Provide a 0–100 risk score with trend and history weighted toward serious signals.
Authorized monitoring	Use permission-gated monitoring to control who is monitored and why.
Consolidated findings	Combine phishing, typosquatting, dark-web/ransomware, credential, SSL and exposed-service findings.
Evidence redaction	Mask sensitive third-party evidence before review or sharing.
Vendor outreach	Provide draft, review and send workflows for notifications.
Exposure briefs	Generate redacted, shareable summaries of entity exposure.
Executive and identity monitoring	Monitor named executives and email-authentication posture for monitored entities.

Business Outcomes

Monitor third parties without deploying agents.

Risk-score monitored entities and track trends.

Consolidate external exposure into one entity view.

Share redacted evidence safely.

Move from finding to structured vendor engagement.

Use Cases

- ✓ **Entity risk view**
Maintain a focused exposure view for vendors, customers, subsidiaries and VIPs.
- ✓ **Controlled sharing**
Reduce disclosure of raw credentials and confidential evidence.
- ✓ **Executive exposure**
Include VIP and domain email-security posture in third-party oversight.
- ✓ **Trend and history**
Track changes in third-party risk over time.
- ✓ **Vendor engagement**
Turn findings into structured communication and remediation.
