

Outsized × MyGigsters

From *spreadsheet* chaos to **fully automated** global payouts.

How a leading APAC professional services marketplace cut consultant payout cycles from days to minutes, and unlocked expansion into two new geographies without growing its finance team.

THE SHIFT

From manual *chaos* to a self-running engine.

With **132 active consultants** across ANZ and Singapore, Outsized's "one-by-one" bank transfer model couldn't keep up. Generic payment processors didn't solve for milestone-based billing, multi-currency payouts, or contractor compliance. **Every new consultant added linear overhead.**

THE SHIFT, IN NUMBERS

THE SOLUTION · THREE PILLARS

A purpose-built operating system for marketplace finance.

01

Payment Orchestration

End-to-end automation from submission to approval to payout. Multi-rail (PayID, bank, wire) with smart routing, auto-retries, and a real-time reconciliation dashboard.

02

Verification & Compliance

Digital KYC and right-to-work checks integrated into onboarding. Compliance bottleneck reduced from 30 days to 3–4 days, with consultants landing deployment-ready.

03

Embedded Finance

Fixed-day payouts decoupled from client remittance. EarlyPay gives consultants access to earned funds ahead of pay run, a powerful retention lever.

RESULTS

Operational efficiency, consultant *trust*, platform health. One motion.

ON-TIME SUBMISSION

66%

Up from 45% in Aug 2025. Outsized went from "chase culture" to predictable, on-time pay runs in seven months.

COST REDUCTION

-40%
