Unicorn Brain Interface is a product of g.tec neurotechnology GmbH

You can think now.

A BCI for Scientists, Makers and Artists

Are you a scientist,
a maker, an artist,
a programmer?

Or simply a talented
open mind who wants
to do awesome stuff
with brain signals?
Say hello to Unicorn.
You want good data.
Unicorn will deliver.

Let your ideas
come true.

UNICORN HYBRID BLACK THE HARDWARE

The Unicorn Brain Interface is a high-quality wireless EEG-headset for brain-computer interface (BCI) applications to perfectly acquire brain waves.

It will acquire data from eight Unicorn Hybrid EEG Electrodes that allow dry recordings as well as with gel, for a multitude of different applications.

UNICORN SUITE THE SOFTWARE

The Unicorn Hybrid Black comes with the Unicorn Suite, the main software environment. It is fully programmable and consists of Unicorn Recorder, Unicorn C API and Unicorn .NET API to acquire, visualize, store data or to perform real-time analysis of brain waves.

Standalone applications such as Unicorn Speller, Unicorn Simulink Interface and Unicorn Python API can be purchased separately.
