

DESIGN BY SYLVAIN WILLENZ

HAY

REBAR TABLE

HIGHLIGHTS

- A series of marble-topped coffee and side tables in different colours and sizes
- The tables are available in different sizes in round, square and rectangular shapes
- Combines raw aesthetic with elegant marble to create unique contrasting design
- Marble is a natural material, meaning each stone's unique colour, pattern and texture gives it a one-of-a-kind quality
- Suitable for a wide variety of private and public environments
- Qualified for contract use

REBAR TABLE DESIGN BY SYLVAIN WILLENZ

Sylvain Willenz's Rebar collection is a series of coffee-, side- and tray tables that explores the possibilities of reconsidering construction materials and processes. The design juxtaposes the reinforced steel bar frame with marble tops and metal trays to create a balanced aesthetic. The tables are available in different sizes in round, square and rectangular shapes, and are suitable for using in private, corporate or public spaces.

Sylvain Willenz is a well-travelled designer from Belgium who established his own studio in Brussels in 2004. He is a graduate of the MA Design Products course at the Royal College of Art in London (2003). His design office has won several iF Awards and the Red Dot "Best of the Best" Award in Product Design, he was named Belgian Designer of the Year in 2009 and he regularly works in education for institutions such as ECAL and ENSAV La Cambre. Willenz is a particularly inquisitive designer, immersed in the language of products and industrial process. His work spans various typologies and is often inspired by graphics, drawings and other 2D sources - his desire is to create elegant and clean designs that are both unfamiliar and familiar. For HAY, Willenz has designed Brackets Incl. and Shapes.

SUSTAINABILITY

HAY focuses on developing long-lasting products that minimise the environmental impact throughout their lifecycle. We prioritise carefully selecting materials, such as recycled content, FSC-certified wood, and water-based lacquer, while continuously increasing the number of eco-certified products. We adhere to strict regulatory requirements, and the majority of our products are tested to meet international standards for strength, durability, and safety.
