17 - 18 SEPTEMBER  
BRISBANE CITY HALL

An aerial photograph of a city skyline, likely Melbourne, Australia, featuring a wide river in the foreground and a dense cluster of skyscrapers in the background. A network of white lines and dots is overlaid on the image, connecting various points across the city and sky. The sky is a deep blue with some light clouds.

# **NEVER BEFORE** HAS THERE BEEN A **NATIONAL** **TRANSPORT** **SUMMIT** LIKE THIS.

For the first time, government, industry  
and community will come together  
to shape a shared future for connected  
and automated transport in Australia.

**JOIN US. HELP DRIVE CHANGE.**

# Speakers

The Summit is an unprecedented national transport initiative – driven by the collective action of government, industry and academic leaders representing all modes of transport and diverse economic sectors and community interests. Summit delegates will be recognised as the architects of change, bringing forth next frontier in highly connected and automated transport.

# Proposed Recommendations

These recommendations were developed collaboratively by the Consortium and informed by the public consultation process.

They will be presented, debated and agreed upon at the Summit.

## 1. Safety

- 1.1. Prioritise safety opportunities
- 1.2. Harness the value of advanced vehicle and connected transport data
- 1.3. Establish a nationally coordinated transport technology innovation, testing and proving ecosystem

## 2. Productivity

- 2.1. Define the role of connected and automated transport in Australia's economic and productivity priorities
- 2.2. Support home-grown industry and market development

## 3. Sustainability

- 3.1. Recognise and quantify the potential sustainability benefits of connected and automated transport

## 4. Social Legitimacy

- 4.1. Recognise the diverse transport and accessibility needs of Australians
- 4.2. Promote community understanding of connected and automated technology
- 4.3. Plan for the future transport system capabilities and examine the impacts of connected and automated transport on employment and skills

## 5. Infrastructure

- 5.1. Take a system-wide view to planning and delivering the transport networks of the future
- 5.2. Deliver a robust digital infrastructure platform and cybersecurity regime
- 5.3. Review the ownership, management and funding of physical and digital transport infrastructure

## 6. Planning and Collaboration

- 6.1. National collaboration between governments, industry, academia and communities
- 6.2. Collaboratively plan for a nationally connected and automated transport future.

# Consortium

Spearheaded by the **Centre for Connected and Automated Transport (CCAT)**, the Summit is a collaborative effort between transport agencies, statutory bodies, transport and logistics associations, infrastructure providers, technology providers, community bodies, consultancies and research organisations, collectively known as **'the Summit Consortium'**.

Never before has a transport initiative assembled such a diverse and influential collective to create change.
