ccat | CENTRE FOR CONNECTED & AUTOMATED TRANSPORT

PROGRAM

CCAT International

ccat INTERNATIONAL 2026

About CCAT International

CCAT International is a three-part digital and hybrid conference connecting Australian stakeholders with global technology providers and experts in connected and automated transport. It starts from a simple premise: Australia cannot future-proof its transport system alone.

To keep its transport system safe, productive and sustainable, Australia needs visibility of emerging innovations, real-world deployments and international expertise, and this program offers an accessible way to connect with the leaders deploying these technologies without the need to travel.

Who you will hear from

More than 30 international and Australian expert speakers from technology providers, governments and regulators, research institutions and industry bodies, with use cases relevant to Australia across roads, freight, mining, ports, aerial mobility and agriculture.

DAY 1
18 November
Online

DAY 2
25 November
