

Site360 - Quick Reference Guide 10

How to complete individual inductions

Your team members and sub-contractors are required to complete the relevant safety inductions prior to commencing any work in one of our stores / sites.

The available inductions are based upon the services your company provides to the Woolworths group.

Everyone is required to complete the general WHS induction and then complete the relevant induction related to your business.

You can add any induction that needs to be completed to your team members via the administration portal.
