**Born for
precision**

COMPANY
PROFILE

We are specialists

in the planning, design, and implementation of interiors, with a particular focus on commercial and retail spaces. We deliver store fit-outs either in individual stages or as complete turnkey projects, always with an emphasis on the client's corporate identity, our own production capabilities, and high-quality final execution.

One of our key strengths is our strong in-house metalworking facilities, which we complement with custom joinery production whenever required.

We work comprehensively,

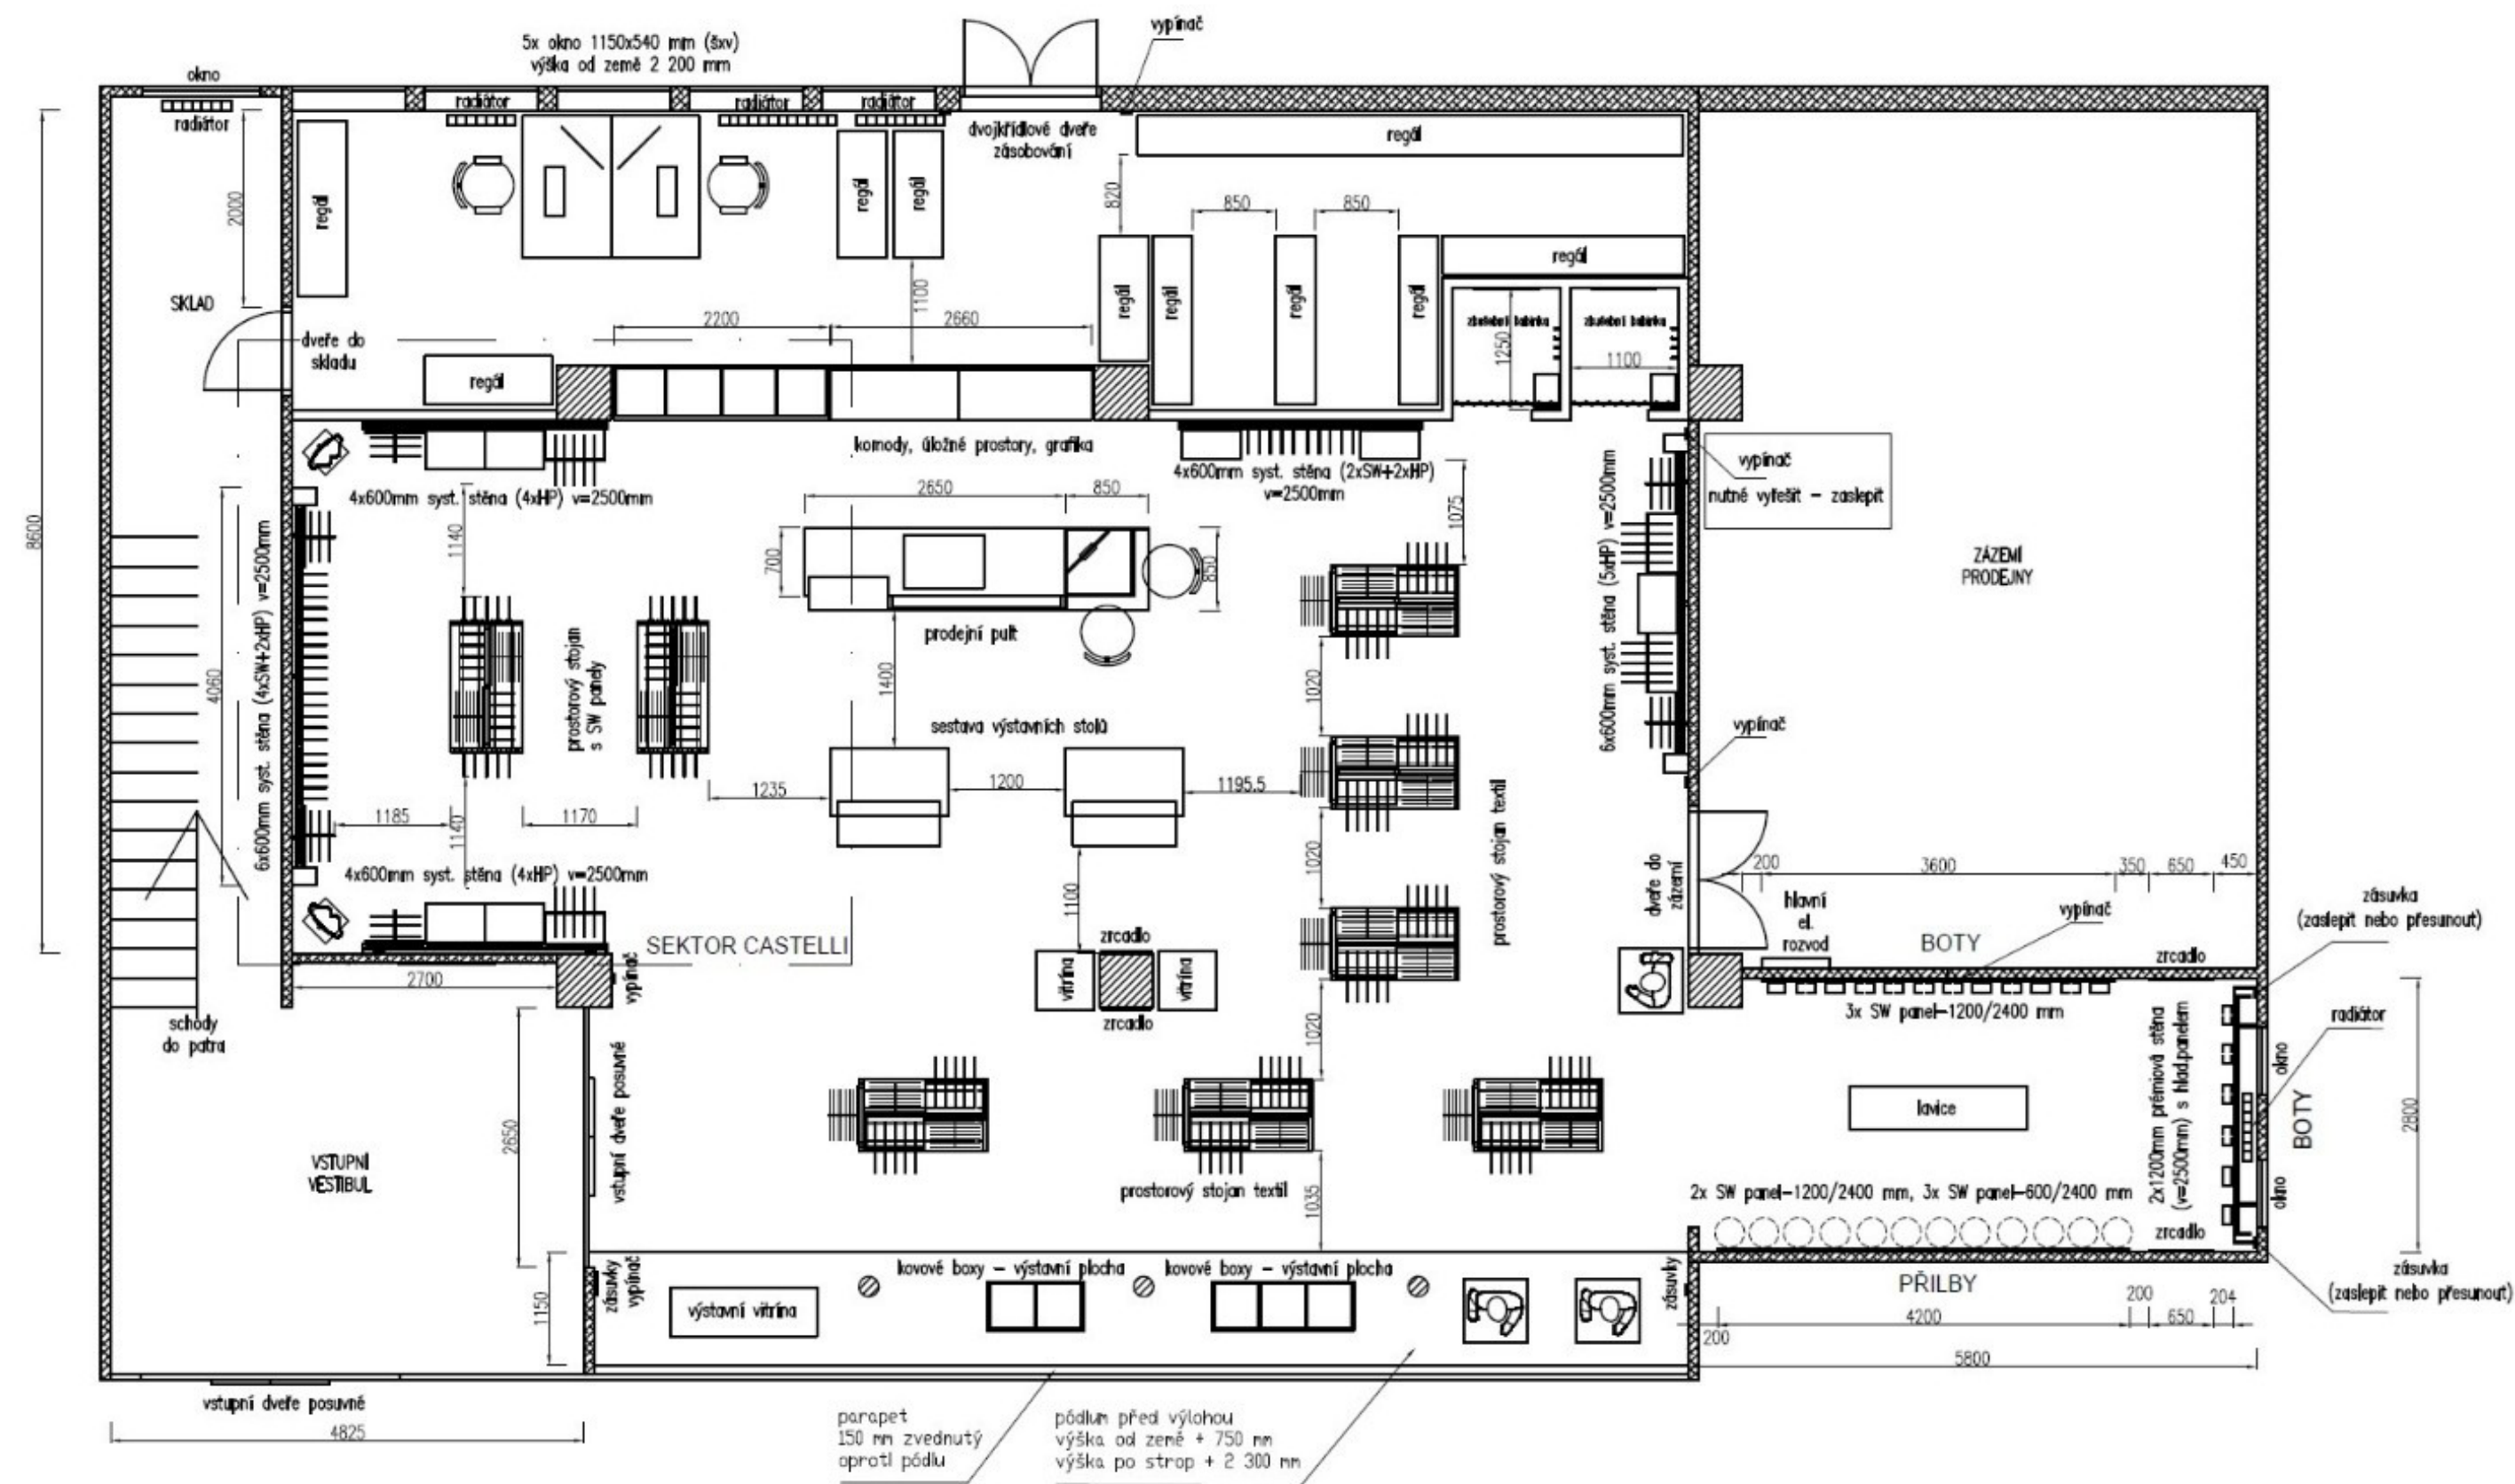

with projects in the form of standard 2D plans as well as 3D visualizations, always tailored to the client's specific requirements. We also collaborate with architects and design studios on a wide range of concepts and projects. We are happy to develop solutions for any type of space, provided that our style and approach to system-based or custom manufacturing meet the client's expectations.

We present our work

through reference projects and products
on **www.crdesign.cz**, where they are clearly
organized according to the individual areas
of our expertise. For a better overview of our
manufacturing capabilities in metalworking,
you can also visit **www.mibametal.cz**.

MIBA & CR DESIGN
METAL

We would be delighted to welcome you to our showroom and production facility in Brno, where we can discuss the available solutions and the specific requirements of your project in person. Based on the completed design or the materials provided, we will then prepare a detailed quotation for the proposed or requested solution.

We look forward to working with you.
