Product Catalogue

OUTSIDE IN

2026

A complete system of planters, furniture and accessories —
grounded, architectural pieces designed to integrate seamlessly into any space.

COLLECTIONS

Foundations
Divide
Forest Floor
Surface
Canopy
Forest Wall

Freestanding planters, structural screens and architectural greenery — six collections, one considered system.

outsidein.com

Foundations

Grounded, timeless planters designed to anchor a space, from a single lobby statement to a full floor.

Dune

Soft, rounded planter forms inspired by shifting natural landscapes.

Boulder

Grounded sculptural planters with a strong, organic presence.

Terrace

Layered architectural planters designed to create rhythm and scale within a space.

Strata

Cylindrical planters with a signature brass ring detail, designed to be grouped.

Oxide

Earthy, mineral-toned planters with the depth and warmth of a natural patina.

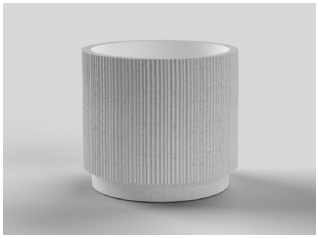

Basin

A wide, low-profile planter that anchors any grouping to build layered, landscape-style arrangements that feel grown rather than placed.

Terra Curv

Soft, sculptural curves inspired by natural contours and carved stone, in Sand and Clay finishes.

Ripple

Textural surface inspired by erosion and natural movement, finished in Sorrento terrazzo.

Geode

A smooth, biomorphic planter form with the presence of weathered stone, sculptural and grounded.

Plinth

A low-profile circular planter with a shadow-line recessed base, in a warm Sand finish.

Drift

A wide, low-slung oval planter that brings landscape-scale planting down to ground level, generous, fluid and quietly dramatic.

Caldera

A low, cushion-like planter with rounded square proportions, wide, grounded and quietly architectural.

outsidein.com

Divide

Structured planting screens and divider systems designed to shape space, create privacy and introduce greenery with architectural clarity.

Frame

Structural planting system designed to define, organise and inhabit space at scale.

Grid

Open wire planting screen that divides space without closing it.

Climb

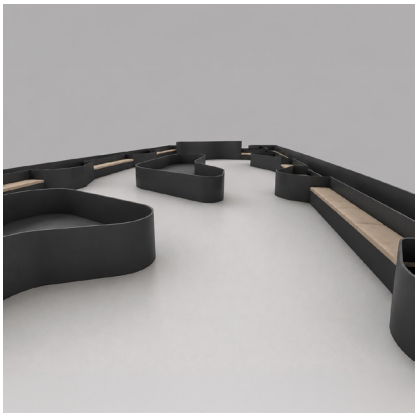

A living trellis that grows into the divider over time.

Forest Floor

Linear planters and trough systems inspired by natural landscapes, designed to create soft, biophilic environments with a calm architectural presence.

Forest Form Custom

Bespoke landscape-scale planting environments designed from the ground up.

Forest In-built

Permanent greenery integrated directly into the fabric of the interior.

Forest Trough

Clean-lined metal troughs that deliver generous planting capacity in a sharp, unfussy form.

outsidein.com

Surface

Lightweight, adaptable objects designed for and around surfaces, bringing greenery, texture and natural form into everyday spaces.

Orbit Desk

A desk-mounted planter designed to introduce greenery where floor space is limited.

Orbit Floor

A self-supporting planter column that introduces vertical greenery where floor space is limited.

Tambour

A slim, linear planter designed to sit neatly atop tambour cabinet storage.

Accent

A curated collection of glazed ceramic pots in eclectic forms, colours and finishes.

Oasis

A wide, shallow bowl that transforms any surface into a curated garden-in-a-bowl — the statement centrepiece for hospitality, reception and boardroom spaces.

outsidein.com

Canopy

Suspended greenery systems designed to create airy, immersive environments through layered overhead planting.

Cascade

A suspended aluminium trough that turns overhead space into a living aerial installation.

Vine

A simple ceiling-mounted system that brings trailing greenery to low ceilings and compact spaces.

Veil

An ultra-slim suspended ring that frames artificial arrangements with architectural elegance.

outsidein.com

Forest Wall

Architectural vertical planting systems designed to integrate greenery seamlessly into built environments.

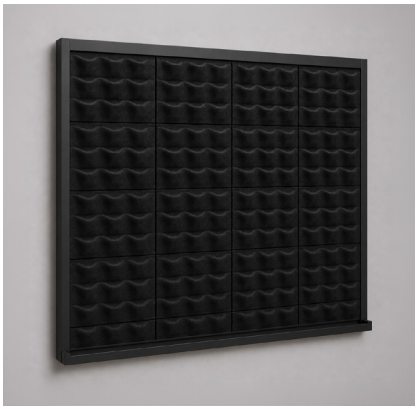

Ledge

A flush wall-mounted trough that brings greenery to vertical surfaces without sacrificing floor space.

Perch

A wall-mounted individual pot holder that works alone as an accent or grouped for a full plant wall.

Greenwalls

A textile panel of sculpted felt pockets that creates a full living wall on virtually any surface.

Living Facades

A wall-hanging wire mesh panel and planter base that gives climbing plants a structure to colonise indoors or out.
